**25-WATT AM/FM  
STEREO RECEIVER AT A  
REAL BUDGET PRICE**

Regular \$149<sup>95</sup>

**NOW 119<sup>95</sup>**

The 2- $\mu$ V sensitivity FET/IC FM circuit pulls in stereo with clarity and richness. Silicon transistors insure "no skimp" performance. Tuning meter shows center-channel for FM, signal-strength for AM. Dial pointer glows yellow on mono, red on stereocasts; 5 x 16 x 10-7/8".

31-2048

**REALISTIC® STA 18**

**REALISTIC® STA 120-B**

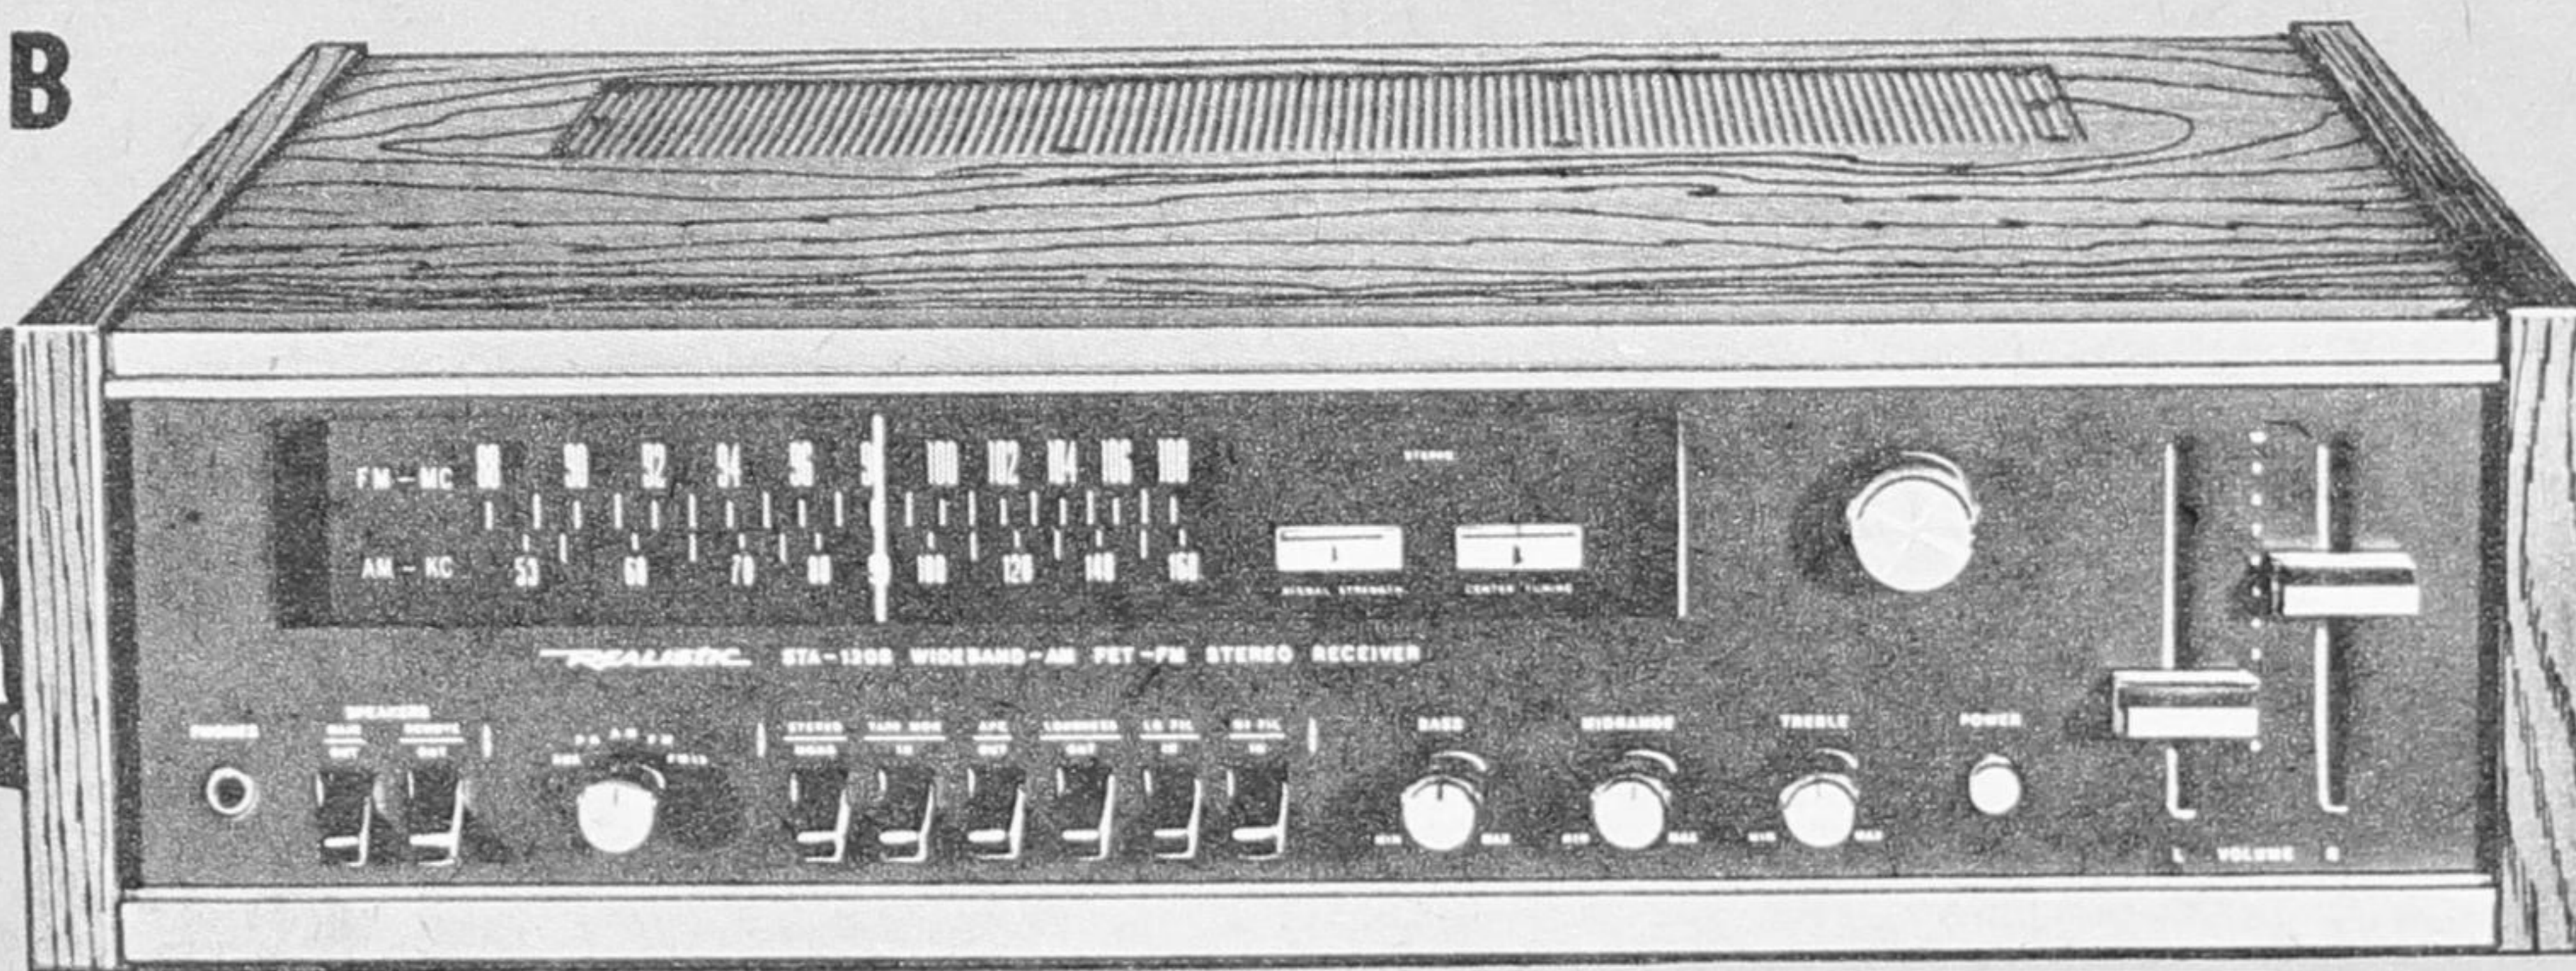

**150-WATT AM/FM  
STEREO RECEIVER  
GREAT POWER  
AND FEATURES**

Regular 369<sup>95</sup>

**NOW 299<sup>95</sup>**

31-2042

**BLOCK  
BUSTER**

Advanced solid-state circuit features direct-coupled amplifier (NO transformers!) for full power across the ENTIRE frequency bandwidth. Plug-in circuit boards for easier-than-ever servicing and maintenance; integrated circuit IF

amplifier for superb stereo separation. Latest design output-protection-circuit stops speaker overloads and burnouts. Tape monitor with volume control, main/remote speaker switches, AFC and stereo-mono switches, much more.
