Fatal Fire Death

King Township Council expressed some concern Monday of last week that the municipality's fire department wasn't contacted when a recent fire took the life of a woman.

It was pointed out that the fire was responded to not only by Aurora and Newmarket Fire Departments but also the fire brigades from Bradford and Holland Landing were called in to assist.

Council's finance and administration committee headed by Councillor Stan Kuniski reported that it felt that "wherever possible the township fire brigade should be contacted and that in this instance King City and Schomberg were closer than some of the other fire departments that were called to assist with this

The committee expressed its desire that "in the future when there are fires in the Township of King and assistance is needed that wherever possible the existing local fire departments be called in to assist the fire department originally receiving the call."

"However, the council realizes that the fire departments are doing a good job and all the departments that serve the municipality are providing excellentservice." The fire referred to took
