 Over the past few weeks, TV 10 has zeroed in on regional and municipal planning staff in its special series, "The York Region—Planning and You". This week it is the mayors' turn.
 Beginning at 7 pm Markham Mayor Tony Roman, Richmond Hill Mayor William Lazenby, Vaughan Mayor Garnet Williams and Whitby Mayor Stouffville Mayor Gord Ratcliff will be fielding questions tossed out to them by Richmond Hill Citizen John Graham.
 Together they will be exploring such facets of municipal planning as senior citizen housing, the impact of citizens' groups, and pressures from the sprawling urban area to the south.
 One question posed to each of the mayors will be "What do you consider to be the top priority for planning in your area?" For their reactions tune in to Channel 10 at 7 pm, or at the top of each hour until midnight.
 Next week, it will be the people's turn to give their views.
 The proposed Ontario Hydro Nanticoke-to-Pickering power corridor has run into opposition from local government authorities to the west of here.
 Burlington municipal planners, a farmer and the Halton Conservation Authority appeared at the Solandt Commission hearings at Queen's Park to oppose aspects of the plan in their area.
 The proposed route was criticized on the grounds of extra expense and destruction of prime farm land needed for food production.
MARS LANDSCAPE
 Richard Moskal, director of long range planning for Burlington said construction of towers about 150 feet high would mar one of Southern Ontario's most scenic landscapes, the area along Mount Nemo and Rattlesnake Point.
 At the same time, according to Moskal, the proposed route will cost Hydro millions of extra dollars than an alternative that could shift the corridor further north to run east towards Pickering, basically along Highway 401, before shifting south to a transformer station near Milton.
 Moskal said \$66 million could be saved with the power corridor run north from Middleport across the Niagara escarpment near Highway 401 and then east in the same corridor as the lines from the Bruce Peninsula generating station, even though this joint route was rejected by Hydro for security reasons in the event of natural disasters.
FARMER COMPLAINS
 Milton area farmer R. W. Gardhouse said the corridor would cross his land diagonally and would destroy the farm as an economic unit, just as planner Moskal said farms would be hit, opening the way for demands to allow other development and land use.
 The Halton Region Conservation Authority agreed with Gardhouse and Moskal, saying the proposed corridor through the northern part of Burlington would destroy the scenery and agricultural land.
 Ralph Southward, speaking for the Kildebreen citizen committee, presented numerous color slides to the commission to demonstrate the scenery as it exists now and the effects a 600-foot-wide hydro corridor with 150-foot-high towers would have.
 The hearings are continuing.

 The hearings are continuing.

Workmen Start Fire In Vaughan Home
 An estimated \$7,500 damage was done in a fire at the home of Gerry Kimmel, 53 Arnold Avenue, Thornhill, November 17 about 4 pm.
 According to Vaughan Fire Department, which answered the call, the fire was started by workmen using a soldering torch in the kitchen.
 The fire spread to the attic before it was brought under control.
 The town of Markham faced a definite fuel shortage November 12 when a two-inch gas line broke at Charles Manard and Sons, Eureka Street, Unionville, and about 6,000 gallons spilled into a dike area.
 Markham Fire Department attended. The loss was estimated at \$3,000.

To Discharge Refrigeration Water Into Stream

Nursing Home Laundry OK On Premises

John Fedyna, proprietor of Country Place Nursing Home, admitted to Richmond Hill Council November 12 that he put himself into a "little problem regarding sewage outlet capacity."
 In applying for a building permit for the second nursing facility on his site, he promised to eliminate laundry on the premises to allow 6,000 gallons per building sewage capacity.
 Later he was informed by his refrigeration engineers that removal of the water from the air-conditioning unit would bring a saving of approximately 4,800 gallons a day. This water will now be discharged into the watercourse and he reported he has been told it will not cause thermal pollution of the stream. Elimination of laundry on the premises would save only 2,800 gallons per day, he said.
STILL IN TOWN'S SEWERS
 Fedyna said he obtained some quotations and has come to an agreement with the owner of a local coin laundry facility from midnight to 7 am with his own staff and take the wet wash back to dry in his own dryers. "But the laundry water would still be going into the town's sewage disposal system," he pointed out. His request was that he be allowed to do the laundry on his own premises.
 Mayor William Lazenby asked if Fedyna considered the co-operative service used by York Central Hospital. "We have been lucky that the hospital's laundry has required neither our water nor our sewage disposal system."
 Fedyna said the hospital alternative is too expensive. "We have to work on a lower cost than the hospital. Our problem is really one of pennies per unit," he said.
ENOUGH WATER
 "Is it possible to put in a reclamation system to reuse the laundry water," Regional Councillor Lois Hancey asked.

tercourse and he reported he has been told it will not cause thermal pollution of the stream. Elimination of laundry on the premises would save only 2,800 gallons per day, he said.
STILL IN TOWN'S SEWERS

On York Region Official Plan

R. Hill Wants Official Clarification Of Regional And Town Roles

"What we want to know is what are the responsibilities of the region and of the area municipalities — where their ends and where ours begin," said Regional Councillor Lois Hancey when she spoke at the Richmond Hill Council's Planning Committee, preparing by Planning Director Hesse Rimon on the aims and objectives of the Region of York's Official Plan.
 This was the theme of the director's comments. "So far there has been no discussion in regard to the individual roles of the municipalities in the planning process as opposed to the regional role," he told the committee.
 "Let's tell them what we want," commented Committee Chairman David Stephenson.
STRONG REGIONAL ROLE
 "I think the regional planning department would like to strengthen the responsibility at the regional level for what occurs in the individual municipalities to ensure that the region is developing in line with the goals and objectives adopted by regional council," said Mrs. Hancey. "Some of these are already out of date because of today's meeting with regional chairman at which the committee recently that the amending bylaw be sent immediately after the third reading to the province, at the same time being circulated to property owners within 400 feet for comment."
 Rimon said the Planning Act requires such bylaws to be circulated once they are law (i.e. after passing three readings).
 However the consensus of committee members was that this did not protect the public and they agreed to the suggested procedure only if the bylaw is circulated after the second reading, giving sufficient time for comment from those concerned before the third and final reading.
 In this way they felt the public would be protected and their rights would not be jeopardized.

"What we want to know is what are the responsibilities of the region and of the area municipalities — where their ends and where ours begin," said Regional Councillor Lois Hancey when she spoke at the Richmond Hill Council's Planning Committee, preparing by Planning Director Hesse Rimon on the aims and objectives of the Region of York's Official Plan.
 This was the theme of the director's comments. "So far there has been no discussion in regard to the individual roles of the municipalities in the planning process as opposed to the regional role," he told the committee.
 "Let's tell them what we want," commented Committee Chairman David Stephenson.
STRONG REGIONAL ROLE
 "I think the regional planning department would like to strengthen the responsibility at the regional level for what occurs in the individual municipalities to ensure that the region is developing in line with the goals and objectives adopted by regional council," said Mrs. Hancey. "Some of these are already out of date because of today's meeting with regional chairman at which the committee recently that the amending bylaw be sent immediately after the third reading to the province, at the same time being circulated to property owners within 400 feet for comment."
