## A Word Of Caution

Walter Pitman, a former teacher at Langstaff Secondary School, has cautioned teachers not to ask to share power with school boards until they are willing to share their classroom authority with parents and their local neighbors. Mr. Pitman is a former New Democratic Member of the Ontario Legislature and his party's education critic. He is now dean of arts and sciences at Trent University in Peterboro.

His warning came during a speech and panel discussion session February 19 on teachers and the impact of politics on education at a professional development day for Toronto elementary teachers. It followed a statement by Ontario Teachers Federation President Geoffrey Wilkinson that teachers are frustrated and their militancy will subside only when they have "a full partnership in educational decision making." He also said that there is "a serious malaise in education." It is growing and creating more and more militants out of teachers." He attributed this change of attitude to increased frustration, hindrances in teaching and roadblocks on the path to correcting what they think is

Mr. Wilkinson himself was crit-

icized by Toronto Board of Education Chairman Mrs. Fiona Nelson for not consulting his members over proposed legislation to govern teacher bargaining. She said secret consultation between the government and top officials of the teacher federation only is no consultation at all for the classroom teachers.

We agree with Mr. Pitman that the teachers are heading towards future difficulties. Not only parents but the students themselves (who after all are the ones most directly affected by policy and curriculum changes) may well insist on sharing classroom authority - and if it is denied them follow the teachers' example by striking. The students may absent themselves from the classrooms and parents may withhold their tax support as weapons to gain their point.

It is also interesting to note that high school teachers in Peel County have broken off contract talks with that county's board of education because the board refuses to talk about anything beyond wages. The negotiations were being carried out by District 10 of the Ontario Secondary School Teachers Federation.

With most of the school news these days being centred around the teachers versus trustees controversy, it was a welcome change to see in a recent report of the York County Board of Education meeting, an item which, although small, spoke volumes.

The item was as follows: Despite a budget of \$10,000 for such things, York County Board of Education last year spent only \$2,545 on conventions and \$751 on workshops. . . . Largest sum spent by a trustee was \$489.85.

Can this be the same big bad board that the teachers claim has denied services to both teachers and students only in its zeal to stay within government - imposed spending ceilings? A board which indulged itself at the expense of others?

The \$7,455 saved by the board probably doesn't sound like much, and really isn't much in an overall budget of \$43,000,000.

But in this era of gimme, gimme, while in the background can be heard the never-ending "I demand my rights" chorus, the board members would have been

quite justified in indulging their rights by taking in all of the many conventions available to them. Instead they restricted themselves to a few and in doing so put the whole matter of budgets and spending in the proper perspective.

The point is that, although the saving may be small, the example presented is a big one. It shows a willingness to compromise, a willingness to see that it's really not all that important to spend every cent that's coming to you when the gain in other ways may not be all that great.

Compromise, of course, is a dirty word anymore, the teachers especially seeming to feel any kind of compromise demeans them.

It's impossible to do anything else. Compromises on both sides are necessary, and lest anyone feels that means losing a little face, let them heed the words of the Danish poet, Piet Hein:

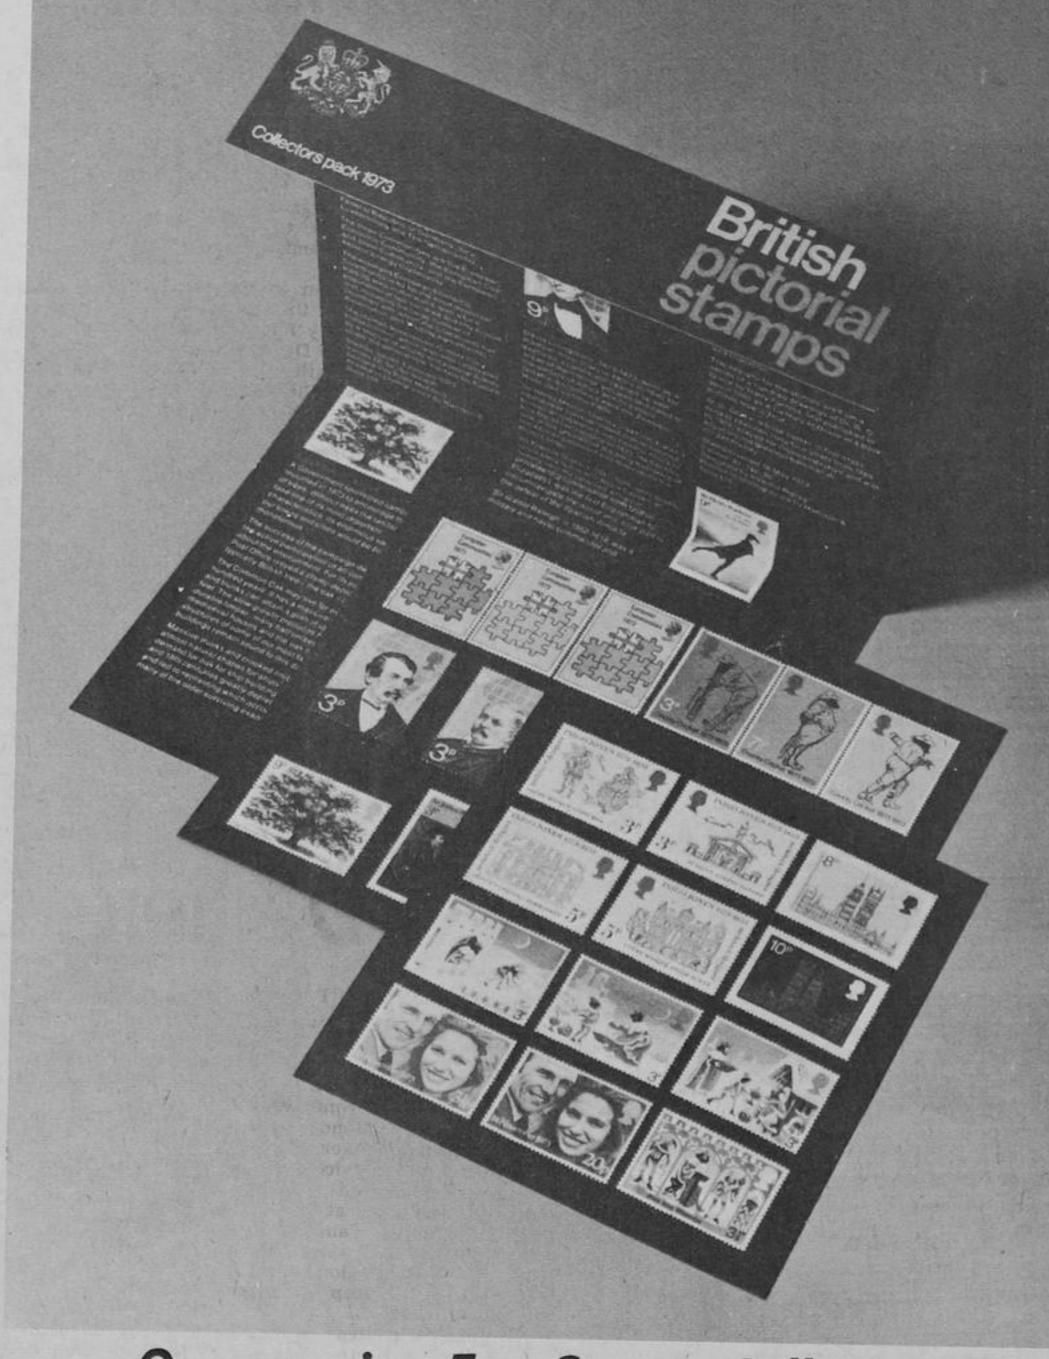

The noble art of losing face May someday save the human

And turn into eternal merit What lesser minds would call disgrace.

# Opportunity For Stamp Collectors

Stamp Collecting is a universal hobby. Most youngsters at some time or another take an interest in collecting stamps of Canada and/or foreign countries and many people continue this interest into adulthood and become very knowledgeable about the countries which issued their stamps.

Collectors of British stamps have many new issues to add to their collections with the Royal Wedding (two stamps), five stamps

### Role Of Clergy In Community Is Expanding

The role of the clergy in community affairs has expanded greatly over the years, extending its range of activities to deal with the changing times. One example of this trend is "The Lost And Found Department", a jazz group composed of eight Presbyterian Ministers from in or nearby

Rev. Terry Samuel of Thornhill Presbyterian, who plays an accordion and "any other instrument in the band", says that the message which the group is trying to convey is one of love, and the joy of life in Christ. Its repertoire includes both secular and religious songs, from pop hits and folk ballads to old time hymns. The ministers have played so far at a number of churches and schools, where they were enthusiastically

This dosen't take into consideration the fact 154 Baythorn Drive. that concentration powers Thornhill. will be low as it is and to lengthen the school day will make catching up impossible.

Night classes have also been suggested, but a lot of Regarding your news story grade 13 students have jobs

at night. Therefore, in summary, no matter how the dispute is settled, we, the students, the Richmond Hill Commitand particularly the grade 13 students, are the real losers. It is painfully ironic that while two groups whose job and public duty it is to educate us are fighting it out, it is the product of their labors which will absorb the

net damage from this fight. May the two parties remember this - there is a writ which can be issued by a higher court, called the Writ of Mandamus, which orders a public official to do his or her duty. To disobey this writ will invoke the wrath of the courts. I think it is a fair statement to say that they weren't doing their duty to their particular office. May both parties continue this course of action

at their peril. What I am really getting at is this - that the teachers must get back soon or the situation will become unbearable for both students
