We Need Them

"You can't fight city hall," was a familiar saying some years ago, which people accepted on face value and because of it bowed to the decrees of municipal politicians. That was all changed when it was discovered that citizens could fight city hall and win by the successful battle against the Spadina Expressway.

However, it is not always necessary to fight city hall or the local equivalent. All members of council are elected by the people and so are very sensitive to the wishes of the majority of the the people. Almost all are approachable at all times and will do their utmost to see that ratepayers' problems are given immediate attention. The answer may not always please the complaining ratepayer since the final decision must always take into consideration the good of the municipality as a whole, but at least he will know that he has had a hearing.

Most councils now not only welcome but invite criticism and constructive suggestions about proposed legislation. In this way such bylaws are more apt to fill the needs within the municipality, protect the individual citizen, and preserve the unique character of the community. In fact, the provincial government has recognized that there is a vast pool of knowledge available in the private sector of each municipality which can be tapped and requires that opportunity be given for public input, particularly in the planning of future development.

A ratepayer or any other interested citizen may well find that he (or she) can make the most effective contribution to local government through an organization. The need for these is becoming recognized by the people themselves and local ratepayers' groups are being organized or revitalized to play a role on the municipal scene.

It was evident in a recent presentation to Richmond Hill Council's traffic, transportation and parking committee by ratepayers from Ward 4, and again at a recent meeting of the fledgling Ward 3 Ratepayers' Association that a large number of capable people are willing to devote hours and hours of time in pinpointing problems of their immediate areas and of the town as a whole, in researching applicable legislation and in probing for solutions to apparent problems.

They are also willing to share the knowledge acquired painstakingly with their fellow citizens and in so doing create a large body of ratepayers who will know what municipal government is all about, what it can do and what it can't do, and of how the average John or Mary Citizen can make a worthwhile contribution.

We tip our hats to them and hope that they will continue their efforts to make Richmond Hill a better place in which to live - or at least to preserve those aspects of the town which make them proud to belong to it.

Land Tax Unfair

The land speculation tax recently tabled at Queen's Park is cruel legislation which heavily penalizes thousands of rural landowning Ontario residents whom we suspect have no idea that they are being acted against. When the law is passed, these people will find they are subject to a tax of 50 percent on their lands when sold. The tax will be in addition to any capital gains tax they have to pay the federal government. All of this amounts to expropriation of lands with little compensation.

The following is a partial list of

properties taxable:

· All lands owned by rural residents, unless the property is smaller than 10 acres and is lived on. If it is lived on and is greater than 10 acres, then it becomes taxable.

 With few exceptions, all rural income-producing properties which are not a place of residence.

This provincial tax is unfair to farmers, lumbermen and other rural people who have worked all their lives on their lands and have their life savings tied up in this asset. You really have to stretch

your imagination far to classify them as land speculators, as the title of the bill suggests.

The provincial government has stated that it intends driving the price of real estate down by passing the land speculation tax and another tax of 20 percent if a rural resident sells any of his property to a foreigner. This, of course, will enable the government to buy rural lands at cheap prices. The legislation is conveniently worded to read that if land is sold to the Crown instead of to private persons, the tax will not be payable. The government will then be in position to force the farmer or lumberman to sell his land to

Land speculation and skyrocketing house prices are strictly urban problems. This being the case, why should the farmer and the rural resident have to suffer because of the situation in the big cities and surrounding areas? It is unfair to harness country people with this legislation. This proposed speculation tax should cover only certain cities and towns and not the whole province.

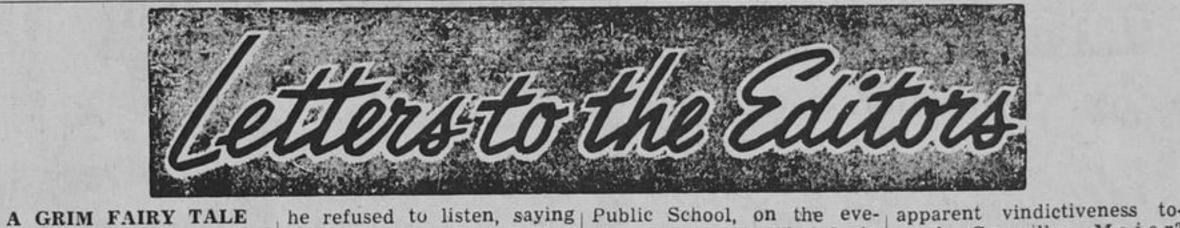

One of the first 10 conservation minded citizens to receive Honor Roll Awards from the Metro Conservation Authority is Dr. Fred van Nostrand, 77, well known retired Toronto and local area specialist in neurology and psychiatry. A native and life resident of the Vandorf area of Whitchurch-Stouffville Town, an air force pilot in World War I, Dr. van Nostrand is a member of an old and long established family at RR 1, Gormley. Whitchurch-Stouffville Councillor Mrs. Betty Van Nostrand is his daughter-in-law.

Dr. van Nostrand is shown during the recent Arbor Day Ceremony planting one of 10 trees in an honor grove marked by plaques in front of the conservation authority headquarters at 5 Shoreham Drive, Downsview. At left is Chairman Elgin Card of the Metro Conservation Foundation with Authority Secretary-Treasurer Fred Lunn. Dr. van Nostrand was the Whitchurch municipal representative on the Authority for years and was cited "for

Sites program and particularly the Black Creek Pioneer Village; as Vice-Chairman of the Historical Sites Advisory Board from 1959 until his retirement in 1972." Others honored at the Arbor Day tree planting ceremony included former Metro chairman Frederick Gardiner QC and former Premier John Robarts QC. The Arbor Day honor tree planting ceremony is to become an annual event of the Authority.

Guest speaker was Lorne Maeck MLA, Parry Sound, Parliamentary Assistant to Natural Resources Minister Leo Bernier. He said Arbor Day has traditionally been marked by the planting of trees and it was most fitting that Arbor Day was picked to "plant these trees to honor these conservationists." The watershed conservation authority concept has been tested over and over again and has proven valid. It is spreading to more provinces and countries, Maeck said.

By DIANA COOK Bill And Pat Bedford Off To Northwest Territories This July, Bill and Pat Bedford of 377 Sugar

In the Spotlight 9

Maple Lane, will be leaving Richmond Hill and moving to a small town in the Northwest Territories. Fort Smith, with a population of 2,500, is the site of the School of Dental Therapy where Dr. Bedford will be taking up a position as a teacher of a two year course in clinical dentistry. Having taught part time on the University of Toronto Faculty of Dentistry, as well as operating his own practise here in Richmond Hill, he is well qualified for such a position.

The Bedfords moved to Richmond Hill fifteen years ago. Since then they have become involved in numerous activities within the community. Bill was for three years the coach of a little league hockey team, and a member of the Rotary Club. Pat taught in the YWCA's fitness recreation program, helped found the Citizen's Advisory Committee, worked on the BAIF Task Force, and in a number of capacities for St. Mary's Anglican Church.

Though the Bedfords are going to find it difficult to leave the roots they have established over the years, in Richmond Hill, they are looking forward enthusiastically to settling into their

They expect quite a change in lifestyle, though not so drastic a one as many might think. The Territories have undergone rapid development of late. Fort Smith contains a skating rink, library and new modern schools. Considering the number of actual inhabitants, it covers a large area of land. This is one aspect of living in the Territories to which the Bedfords will have to adjust, for the situation is just the opposite in Southern Ontario. Towns in the Territories are so far apart that the airplane is a more common means of transportation than the car.

The winter will, of course, be longer, stretching approximately from October to May. The terrain around Fort Smith is considered to be one of the best in the world for cross country skiing. Luckily the Bedfords are all ardent

The School of Dental Therapy in Fort Smith is composed of a series of mobile homes linked together. The actual number of students who attend is quite small, but the percentage of young people choosing to continue their education is steadily increasing. Approximately 45% of the population is made up of white people, the remainder are either Indian, Metis or Eskimo. Many of the recreational programs are designed to revive and enhance the language and culture of the native people in the area.

The Bedfords plan to leave for their new home early in July. They will travel across Canada by car, camping along the way, a journey which they intend to make in about 3-4 weeks. With two dogs, three children and a couple of warnings about the calibre of roads in the Territories, the trip should prove a highly eventful

and enjoyable one. Though the Bedford's move will be this community's loss, I'm sure that it won't be long before Fort Smith is benefited by the same kind of active participation that they contributed in

Richmond Hill.
