## NEW NEIGHBOURS. GOOD NEIGHBOURS.

In the fall of this year, Dow Pharmaceuticals will start constructing a new Canadian Headquarters in the north end of Richmond Hill. This new facility will manufacture pharmaceutical products which make an important contribution to the health of Canadians. The plant will be a link in the company's international Life Science programme, which has made such important research discoveries as Lirugen\* measles vaccine and Rifadin\* antitubercular antibiotic. It will be the base in Canada for our current activity in cough and cold remedies, prenatal supplements and for future expansion in the vital health field. And, because we at Dow believe in a greener, more pleasant environment, our new facility will be landscaped into a park-like setting. We think you'll like it.
