Vaughan hires 3 companies to study Maple dumping

Three planning firms have been commissioned by Vaughan to study the future land use potential of a 1,000acre area near Maple, now being mined for gravel.

According to Councillor Jim Cameron, the study is based on the premise that

the pits do not have to be filled with garbage.

To cost \$20,000 and be completed by February, the study is intended to assist council in assessing future garbage landfill applications.

An application for a

recovery plant operation on 10 acres and a 50-acre sanitary landfill site has been forwarded by Crawford Sand and Gravel. A hearing of the Environmental Hearing Board is still pending.

two different things," Stephenson said. "What about bringing in a

recorded vote next year?" he was asked.

"The new council could bring in anything they wanted," Councillor Stephenson said. Development, or more

precisely, redevelopment of the downtown, or old town core, occupied much of the meeting. Chairman Richard opened Hook proceedings by asking the candidates what they would include in redevelopment.

No pat answers And for an issue that was supposed to be at the heart of just about everything where the Town of Richmond Hill was concerned, not all the answers were that enlightening.

"I haven't given it much attention," said mayoralty candidate David Schiller, "so I don't have pat answers"

Historically, the downtown core must be retained, he said. Also, better setbacks were needed, so the "landscape, or skyscape" could be retained.

"So far as specific projects are concerned, l haven't thought that much about them," Schiller said. Retain the present and

improve, rather than tear down, he concluded. Mayor William Lazenby saw it as an area which should preserve much of the old village amenities, with a small grocery store handy

to all. The downtown area had professional offices, and with the development of senior citizens' apartments, it was necessary to have such things as doctors' offices and a food store nearby.

"In the balance of the core, we have churches and municipal offices, but we need a small variety store,"

the mayor said. He cited Fisher Office Supplies on Yonge Street as

the "kind of thing we need". He said he saw no reason to knock out other homes ... Some might be redesigned to fit in.

Regional Councillor Lois Hancey said redevelopment also meant revitalizing the commercial area; it was essential to "include maintenance and retention of previous things and examine those things in question"

For example: those stores on Yonge Street that could be converted to boutiques.

On the record Mrs. Hancey said she was also "on record" to retain church spires and residential areas that were "characteristic" of the town; and for discarding that "which is no longer relevant".

Another regional coun cillor, Gordon Rowe, felt it was a matter of traffic. But there was a problem

they hoped to eliminate with the completion of Bathurst Street and Highway 404. Mr. Rowe said a financial study would have to be

made before Yonge Street could be redeveloped. He said also he "appreciated" the churches and felt by proper planning they could be retained.

"But I think there will have to be some development on Yonge Street," he said. "I know you won't all

agree with me." Street improvement Councillor Lou Wainwright, who is also running for region, said he would like to see some "proper storm sewers on streets

adjacent to the high school".

Duffy meeting Price in Ward 2

Speaking at Monday night's All Canadiates' meeting at Richmond Hill High School, candidate for the Ward 2 town council seat All Duffy supported public participation in municipal

decision-making. He promised, if elected, to control it." hold informal meetings to keep the people of his ward informed on what is happening and to learn what

they want to happen. Duffy said his training as shortage.' manager for a consulting firm will help him find out the residents' problems and to find a solution for them.

He opted for a controlled growth rate every year. He said in the 11 years he has lived in Richmond Hill he has seen the population double and would like to see the community atmosphere retained.

the trees were symbolic of Richmond Hill. People should also recognize that behind the narrow Yonge Street core, a variety of houses were left that were more symbolic of the old rezone because the She closed with, "You

"We shouldn't sacrifice that to compound or rectify the errors of the past when Yonge Street merchants were driven out of business by the over-expansion of commercial outlets before Richmond Hill had the population to support

them," Mrs. Graham said. She said she was "convinced there is a future". They could have nearby stores," as Mayor Lazenby pointed out and as many of us remember and still have office space and possibly apartment space, if there is rezoning"

Questions, answers

In the question-andanswer period that followed, considerable concern was expressed about keeping outside traffic from using the area within Bathurst, Vaughan Road, Yonge and Elgin Mills Road as a through area. It should be preserved for local traffic, was the feeling

Those candidates who spoke on the matter, agreed the area should remain basically residential, and any widening would change the character of the neighborhood and encourage through traffic.

However, Councillor Wainwright came up with what was probably the most succinct observation on the situation.

"We may not have arterial roads," said Mr. Wainwright, "but they're sure as hell being used as arterial roads." His comments were

greeted with a hearty round

of applause,

Mondays to Wednesdays 10-5 p.m. Thursdays and Fridays 10-6 p.m. Monday evenings and Saturday 10-1 p.m.
