new 'RCA' 20" 'AccuColor XL-100's'

great-looking portable color TV's

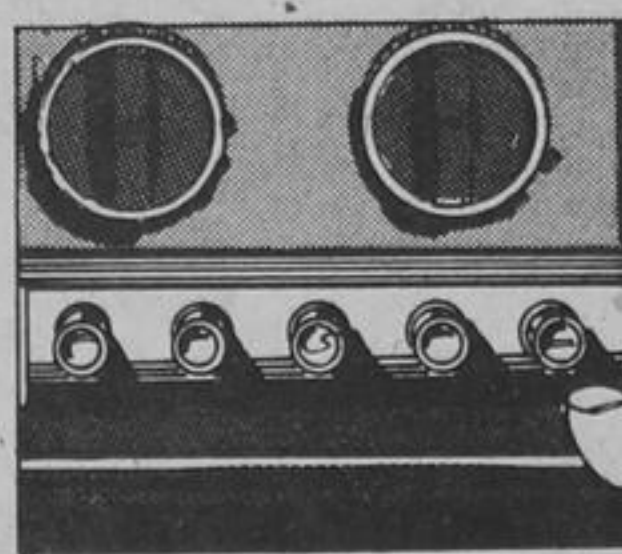

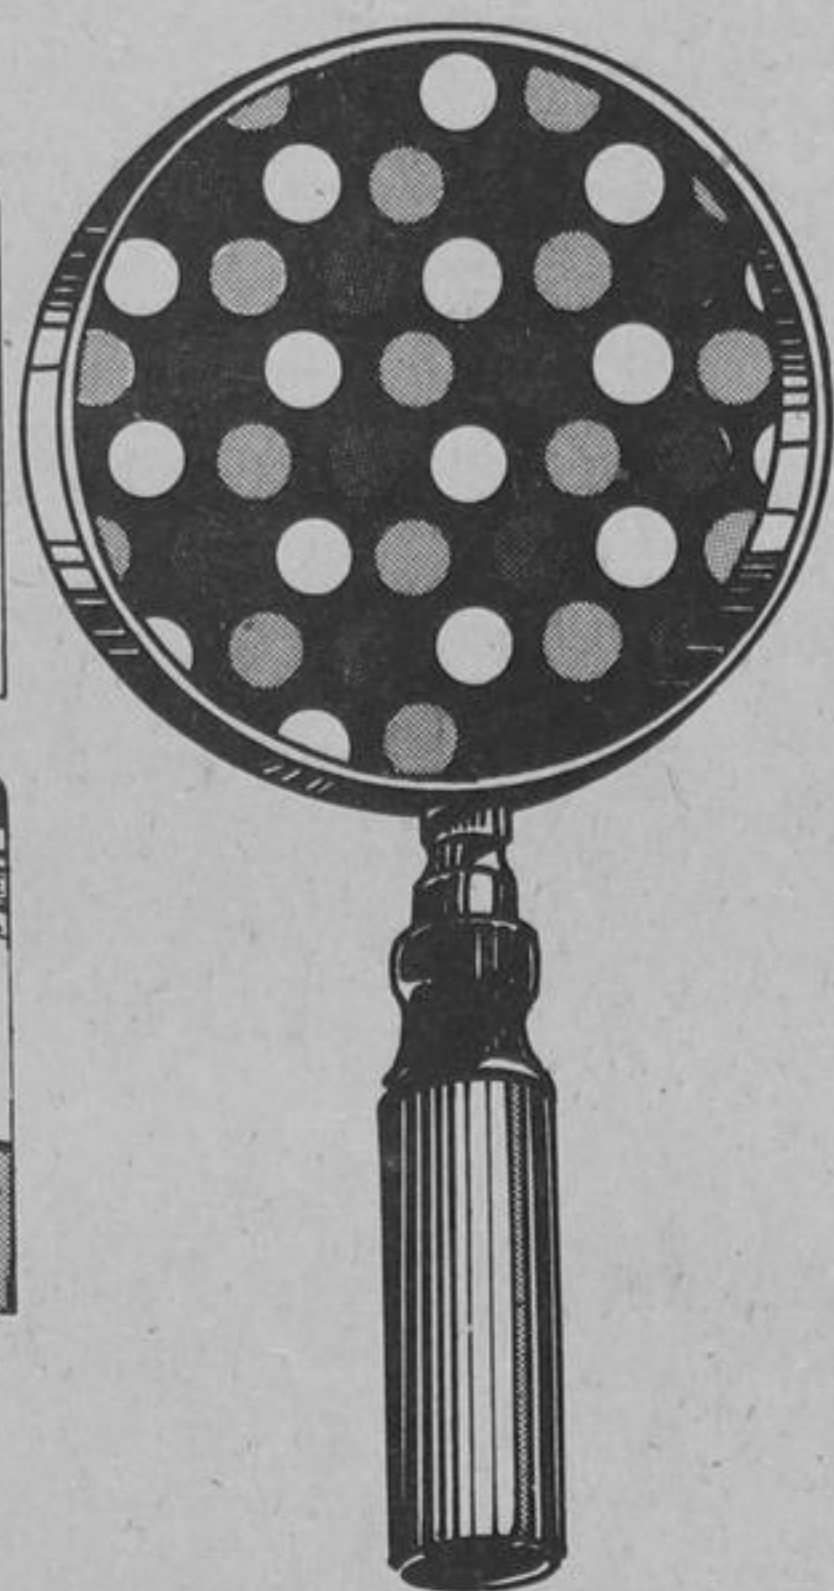

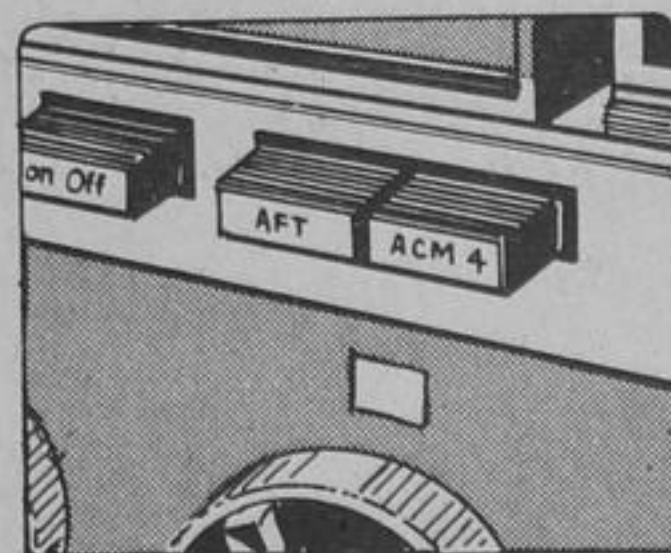

with 100% solid-state chassis

and an impressive list of features

100% solid state chassis with 31,200 volts - 'RCA's' most powerful yet. With new heat-absorbing aluminum frame for cooler operation and longer component life.

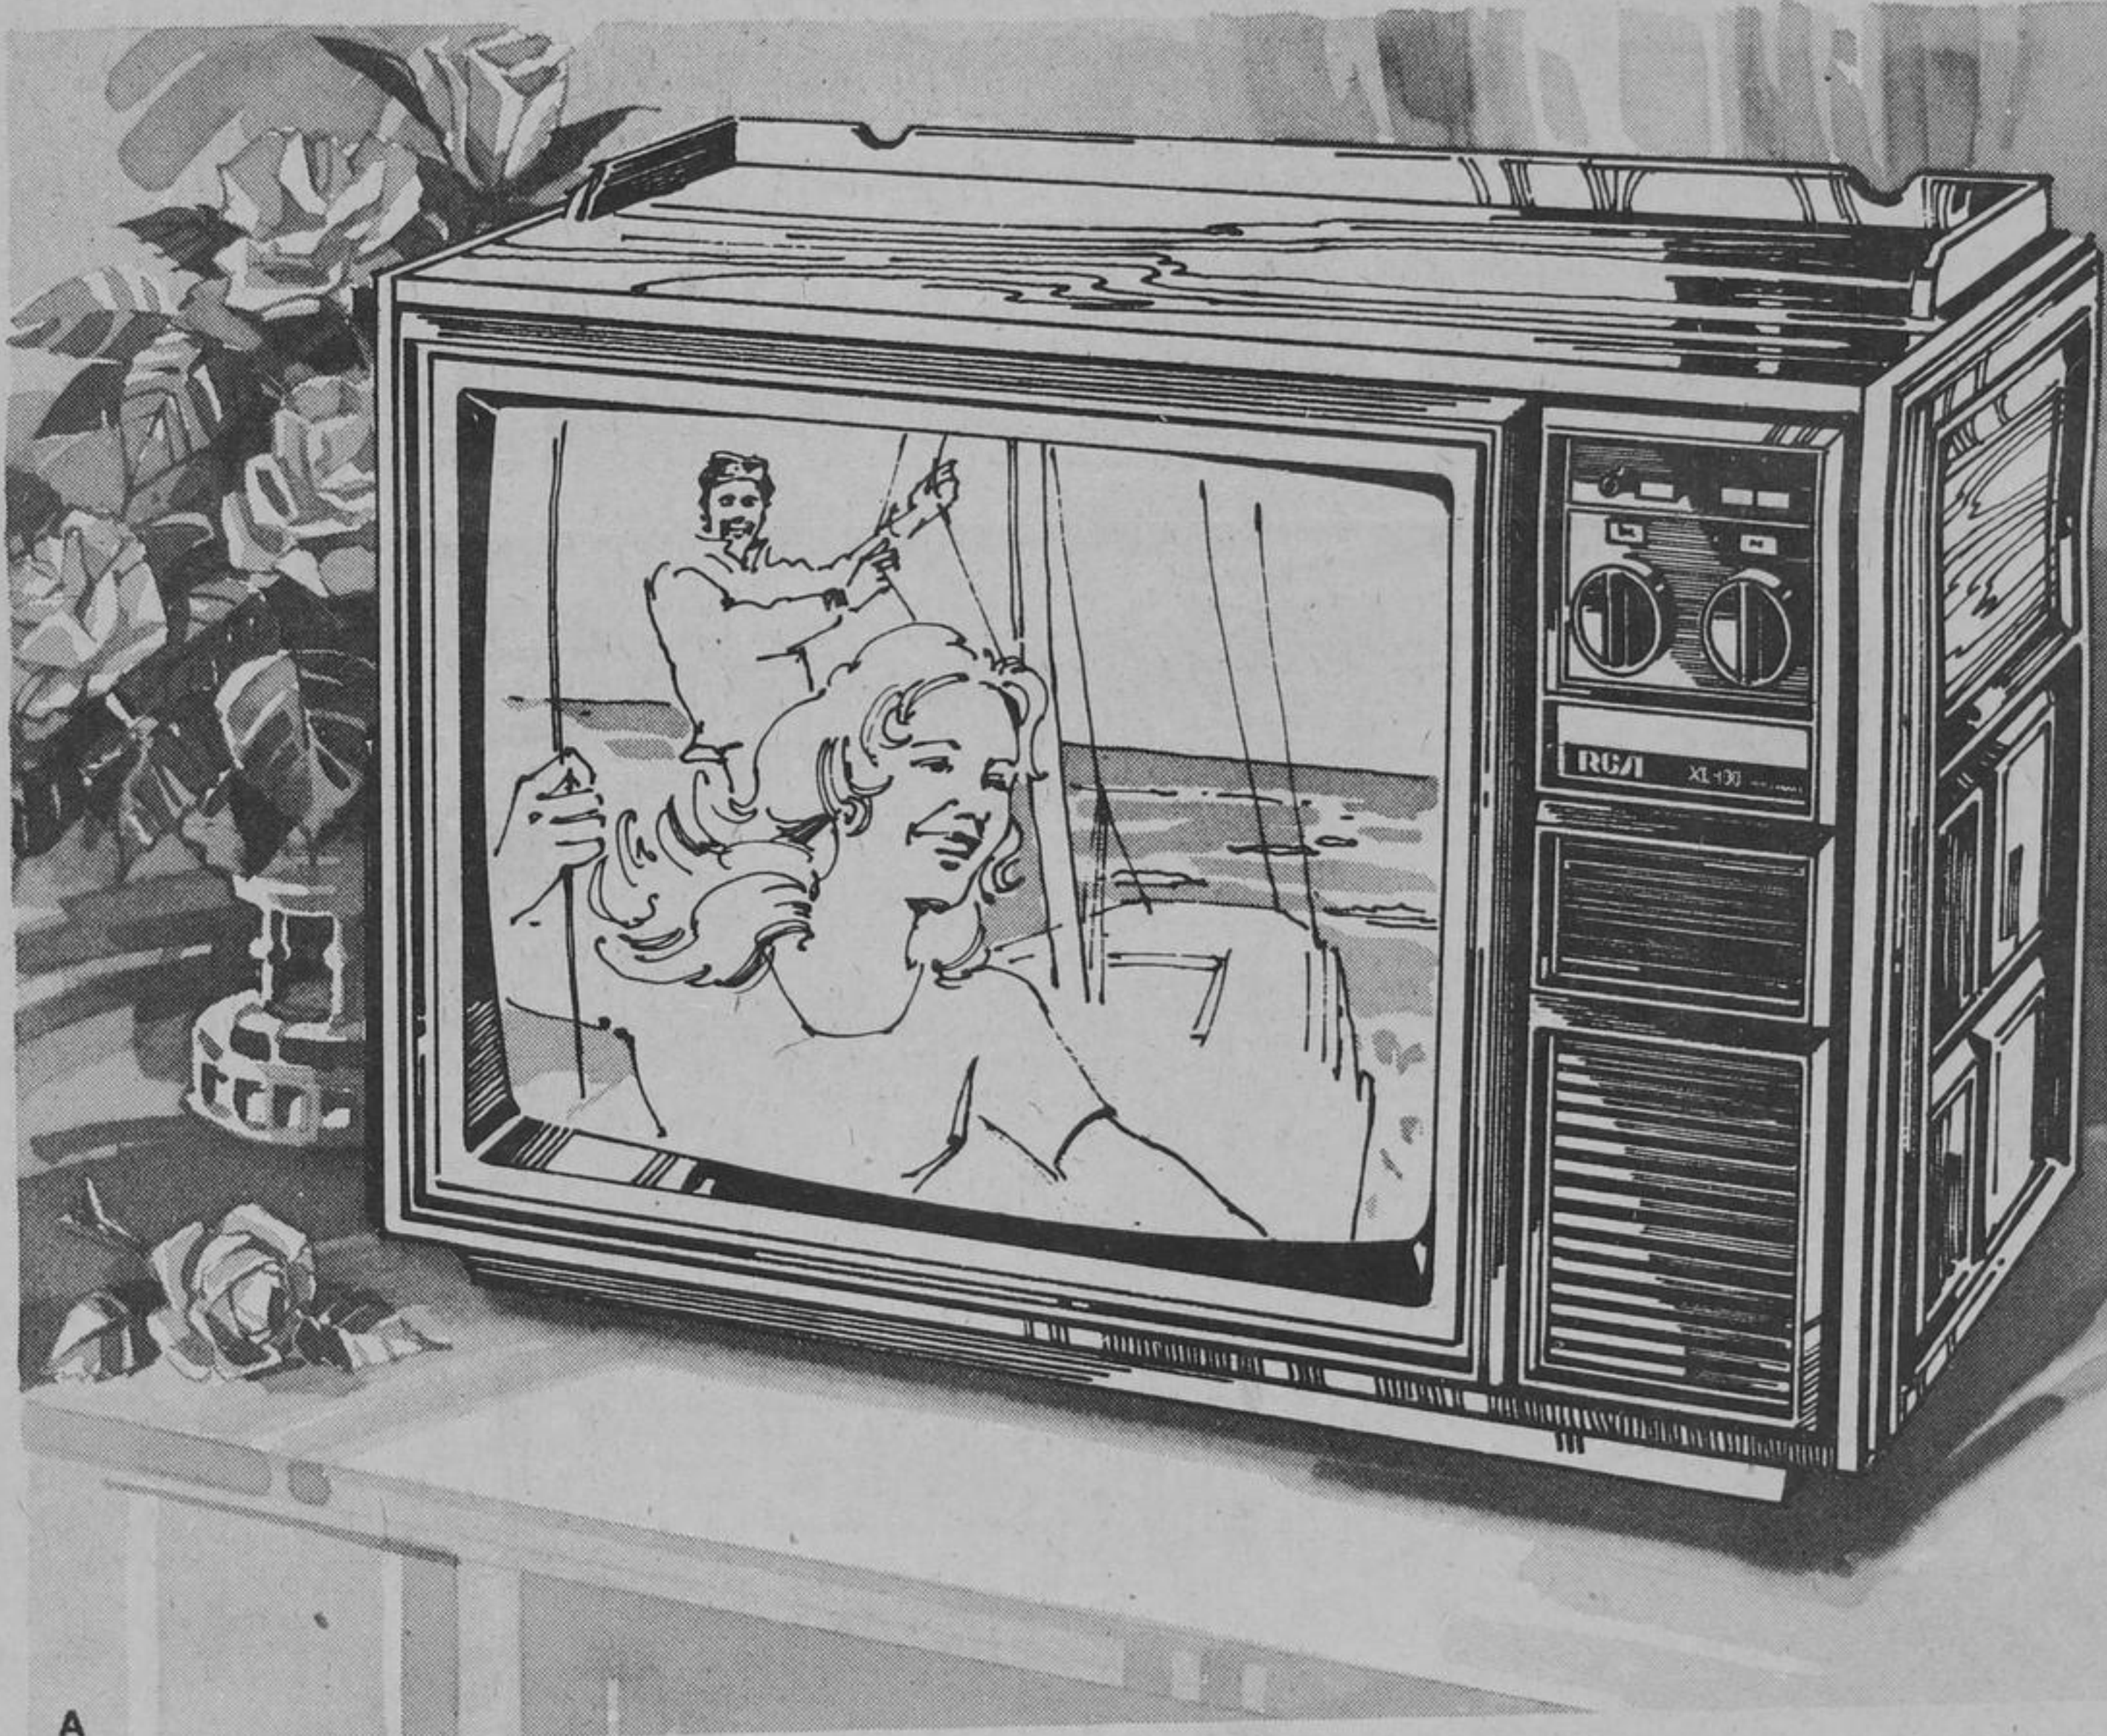

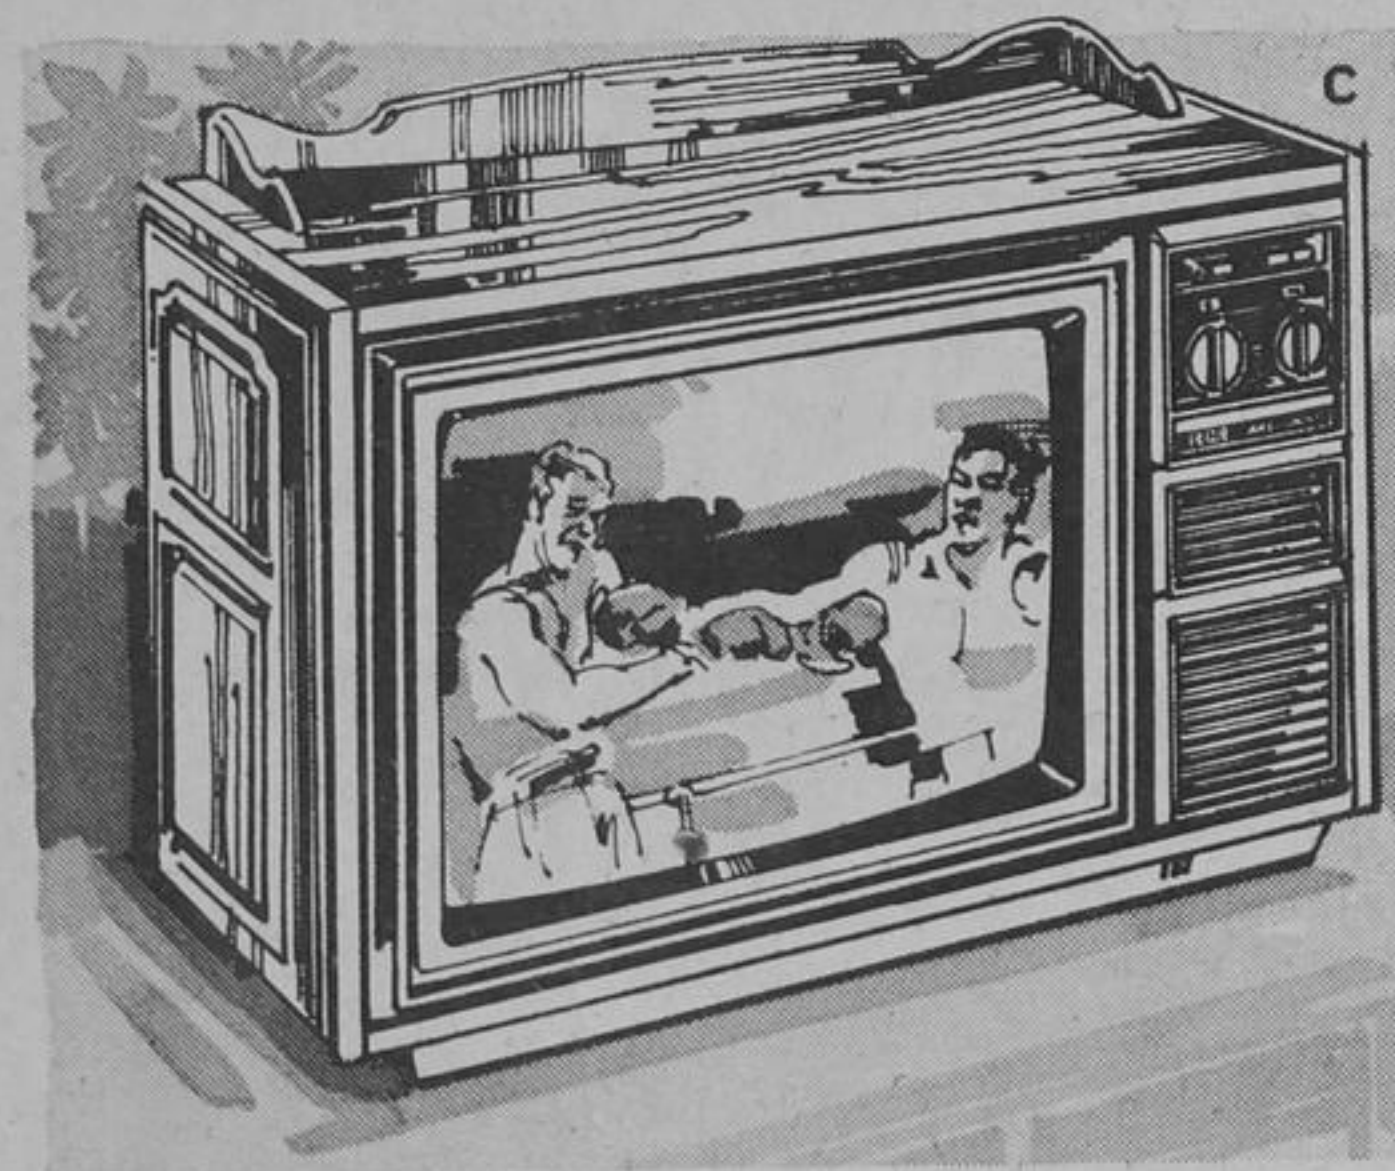

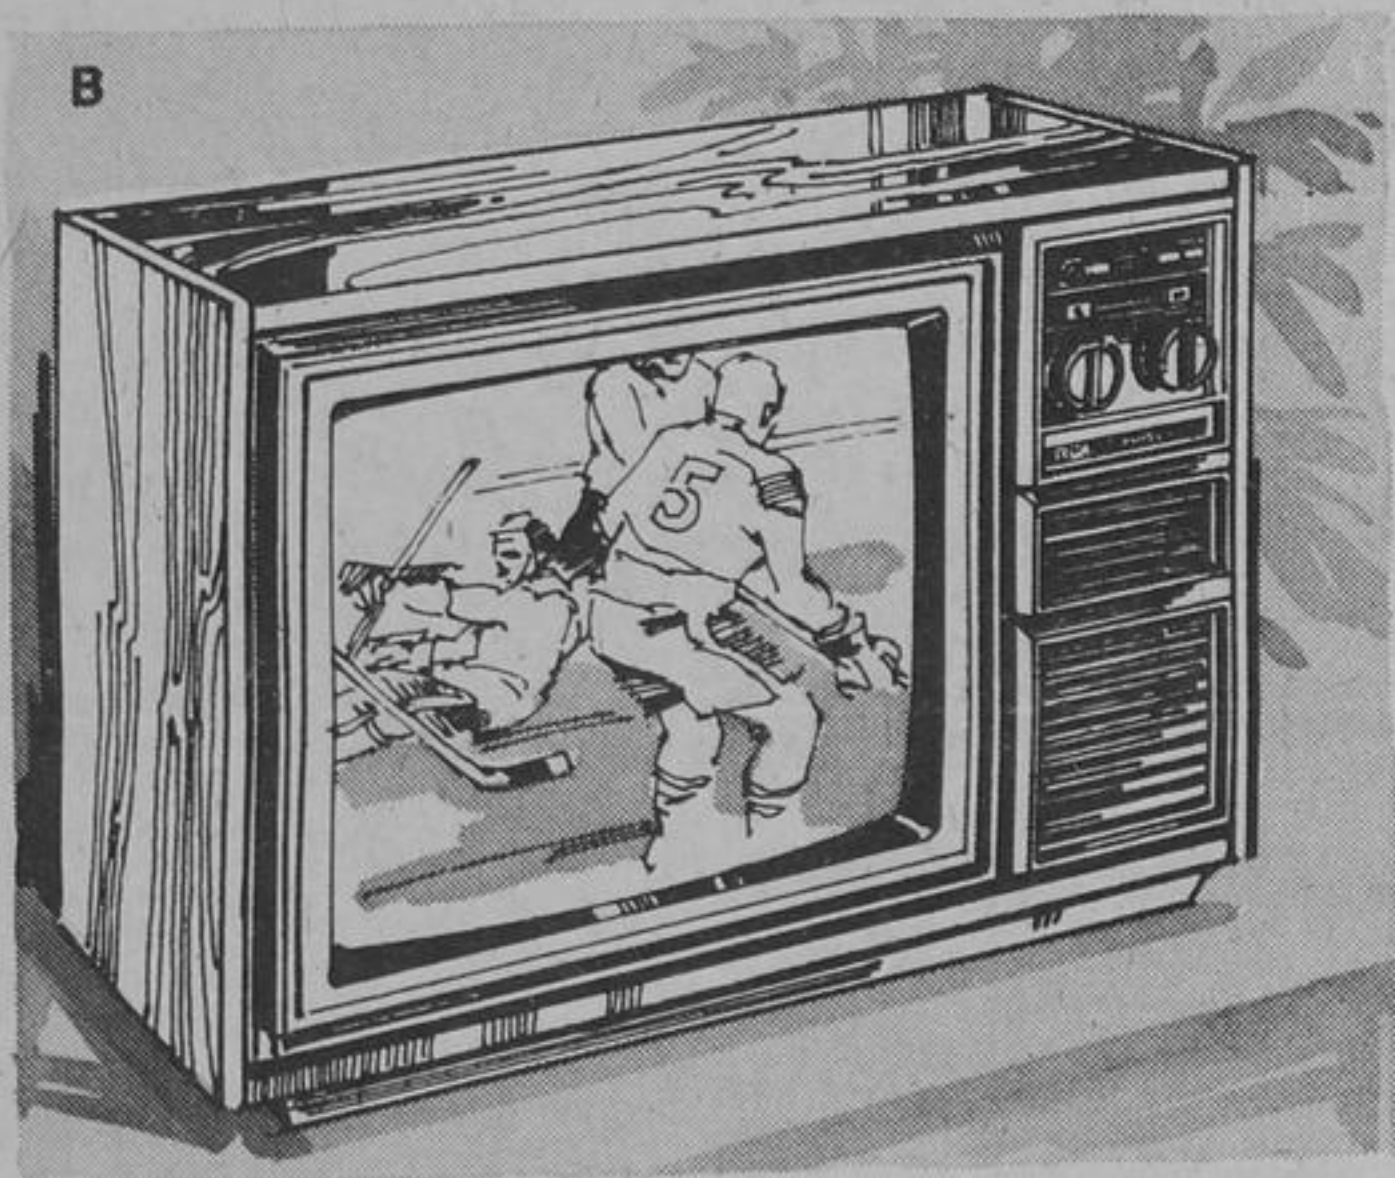

'AccuMatic 4' (ACM) push-button instantly balances color, tint, brightness, contrast, automatically. Automatic fine tuning (AFT) pushbutton locks in correct signal after one, initial, pre-tuning adjustment to each channel.

XL-100 Personal Preference Centre - a convenient slide-out panel on the front of the set lets you adjust brightness, contrast, color level, tint, sharpness - even tone - to your own taste.

'Super XL-100 AccuColor' black matrix picture tube - 'RCA's' best big-screen tube gives brilliant, contrast color. 3-to-4 picture-tube ratio is same as movie screen so no part of picture is lost as a result of picture tube size.

RCA

Here is fine cabinet styling teamed with an impressive list of features. And there are more than those shown above. A cable-guard shielded tuner helps prevent local "on-air" signals from interfering with your cable TV picture. 75-ohm antenna connection is built-in; cable can be connected without a special adapter or additional service. There's UHF/VHF solid state tuning with lighted channel indicators. A 6" round Duocone speaker. Plus picture and sound in seconds. See every feature in action at Simpsons. And get yourself a portable color TV with great looks.

2-year warranty on picture tube; one year unlimited home service in 'RCA' service area. Enquire about 'RCA' 5 year extended picture tube warranty.
