4 Legion teams entered golf tourney

Golf Many years ago, the Scots invented the above mentioned game. To our way of thinking, this was the worst crime of all time.

Here is a poor defenceless and inoffensive ball of goop. If found in the open, dogs use it for a teething bone, birds use it as an egg to be hatched, young lads use it as a means of raising much needed funds and grown-

ups chase this inanimate object for miles, smiting it every step of the way. It is jumped on, sworn at, swatted all over God's half acre, then in final frustration thrown in ponds, lakes, rivers or forests.

Now that we have got that off our chests, we will let you know that four teams of "golfers" (?) travelled to Sharon to take part in the Zone "E2" golf tournament Saturday.

One notices that these participants haven't given us any results. Does this mean what we think it does? Oh well, we'll try to get this highly important news to you next week.

We regret to say three of our members are incarcerated in our local hospital: Dorothy Fitzgerald, Urbain Ducharme and Marsh Tonner. Sure hope these nice people get out soon to enjoy the nice weather

Aluminum can be repainted with success... If the old coating is in good condition and adhering firmly, remove dirt and other surface debris and apply the new finish... However, if the old finish is glossy or unusually smooth, better adhesion may be obtained by roughening the surface with steel wool or sandpaper... If the existing paint surface has chipped or is peeling, and the metal is exposed in spots, sand the surface to smooth out rough edges and to remove loose paint... Prime the bare spots and then apply two finish coats if it seems necessary... The results of painting aluminum will, no doubt, be quite satisfying... Just make sure that you've checked out the condition of the old aluminum coating very carefully...
