

# Too late to transplant irises?

**By Marion Bluegrass**  
Dear Marion; I know you're supposed to transplant irises as soon as they finish blooming, and I'm wondering if it's too late to do it now.  
Mrs. P.L., Thornhill  
If you don't expect too much in the way of bloom next summer, I think you're fairly safe in dividing or transplanting irises now.  
They're such a hardy plant they usually can be moved successfully almost any time, and

## region gardener

wait till spring? I've never planted summer-flowering bulbs before.  
Mr. S.J., Langstaff  
You can plant the hardy summer-flowering anemone bulbs either in October or very early in the spring.  
Plant them about three inches deep, preferably in a partly shady location, and make sure they get plenty of water during the blooming season.  
It's a good idea to mulch if the bulbs are being planted in the fall.

Dear Marion; Should the foliage from day-lilies be cut down in the fall? Does leaving it there encourage the spread of disease?  
Mrs. L.G. Unionville  
Don't cut down the leaves from day-lily plants. This provides a natural mulch.  
You can, of course, remove the dead leaves in the spring once the new leaves have started to come up.  
What you can remove in fall is the unsightly dead flower heads.
