

They're off and hopping (Photo by Hogg)

It's not easy to run a race when there's a balloon stuck between your legs, but at least these girls all share the same handicap as they take off from the starting line. It was part

of the fun at a busy day of "Olympics" activities for students at German Mills public school last week.

Antiques stolen

KING — Stanley White of RR 2, King City, told police he saw two men leaving his premises last week with a chest of antiques.

After calling police from a neighbor's, he went back and saw the men get into a car and drive off. However, they left the chest full of antiques behind and White was also able to supply police with the make of their car and license number.

\$10,000 fire loss

KING — Faulty wiring was blamed for a fire at the home of Mary Franciotti, Con. 7, King, last week.

The fire, which broke out in the north end of the house, awakened Mrs. Franciotti, who called the Nobleton Fire Department to put it out. Damage was estimated at \$10,000.

A fire which started in a car owned by Richard Sheridan, Wilson Street, Markham, after it had been in an accident, caused \$500 damage.

The accident took place at Highway 7 and Kennedy Road at 5:30 p.m., Sept. 28, with the fire taking place at 11 p.m. that same night.

Sleep more peacefully tonight with the Sunbeam Smoke Sensor alarm system

...its flashing power signal is just one of seven advanced safety features

Why every home should have a smoke detector

Firefighters and fire prevention authorities all recommend the use of smoke detectors in private homes.

The reason: most fire victims die of asphyxiation, not burns. And close to half, these experts say, might be saved by early warning of fire.

The smoke detector's job is to provide this early warning—before smoke, flame or fumes are even apparent. And that's how a dependable detector can give you almost priceless peace of mind.

Which detector to choose

With so many smoke detectors available, how do you choose? These facts might help you.

The sooner your smoke detector is able to sense combustion and sound the alarm, the more time you and your family have to escape... and the more faith you can put in it. You want a unit as reliable as modern science can make it, with every possible check and countercheck built in.

Sunbeam safety facts

The new Sunbeam SMOKE SENSOR alarm system is engineered with the seven advanced performance features listed here. They're well worth studying. Above all, note the Sunbeam SMOKE

SENSOR alarm uses a "dual ionization" system. It senses combustion at the earliest stage of fire—often before you can see or smell smoke—to give you the earliest possible warning.

Inconspicuous, easy to install

The Sunbeam SMOKE SENSOR alarm system mounts unobtrusively on your ceiling. Modern, neatly styled in soft white, it blends with any decor. You can install it yourself with just two screws; no wiring or special hardware is needed.

Consider all the safety features Sunbeam offers

Test button. Tests the entire system: battery, circuit, sensing chambers, alarm.
Low-battery signal. Sounds intermittent warning for 7 days when battery is low.
Operating light. 60-second repeating light shows unit is getting power.
Alarm. 85-decibel horn gives powerful "wake-up" alarm.
Dual ionization. Accurate, stable, sensitive to earliest stage of combustion.
Solid state. Advanced circuitry is trouble-free, dependable.
Battery operated. Self-contained, works even when house power fails. Unit comes complete with special, 12.6-volt Mallory Duracell® battery.

Make this year for family safety

Consider the months ahead... the season for home heating, enjoying the fireplace, entertaining, Christmas trees and lights.

What wiser time to safeguard your family with the Sunbeam SMOKE SENSOR alarm system. For under \$50, including battery, it could be one of the best investments in family security you'll ever make.

Now at department, hardware, appliance, auto supply stores and home building centres.
