PATENT PUMPS:

THE Subscribers have pleasure in inform ing the Inhabitants of Whitchurch and urrounding Townships, that they are manufac-

uring the best I umps now made in Canada, Patented by John Dennis. These Pumps are much better than the ordinary Wood Pump, for the following reasons : Firstly-The Water is much better, as there is not quarter as much wood in the well, and all ree from sap. In order to do away with such

heavy timber as is used in the common wood

pump, they add a sufficent number of iron bands; this makes the pump stronger and so much lighter, that two men c n take one out of a well sixty feet deep, in fifteen minutes. Secondly-By the use of the Patent Culinder, which is turned perfectly smooth and true on the inside, the box wears longer and Richmond Hill, July 23, 1857. works easier than in the ordinary bored pumps. Thirdly-These Pumps are so simple that al-

joints are all fitted true and tight, there is no jarring in the working of the pumps. Lastly-These Pumps are neatly turned and painted, making it an ornament as well as a most iseful article. Below will be found a few of the hundreds of references we might give from the

most any man can repair them, and by means of
