PATENT PUMPS:

THE Subscribers have pleasure in inform. ing the Inhabitants of Whitchurch and surrounding Townships, that they are manufac-

uring the best | umps now made in Canada, Patented by John Dennis. These Pumps are much better than the ordinary Wood Pump, for the following reasons:

Firstly-The Water is much better, as there is PURE DRUGS, DYE-STUFFS, not quarier as much wood in the well, and free from sap. In order to do away with such CHEMICALS, heavy timber as is used in the common wood SPICES, oump, they add a sufficent number of iron bands; Mansfield, Owen this makes the pump stronger and so much lighter, FANCY SOAPS, VARNISHES, that two men c n take one out of a well sixty feet

Secondly-By the use of the Patent Culinder, which is turned perfectly smooth and true on the inside, the box wears longer and works easier than in the ordinary bored pumps. Thirdly-These Pumps are so simple that alnost any man can repair them, and by means of Dealers and Painters to the he not on the rod, the Bucket is secured in such a manner that it cannot get loose; and as the joints are all fitted true and tight, there is no jarring in the working of the pumps.

useful article. Below will be found a few of the Toronto, June 26, 1857. Rutledge, Elizabeth hundreds of references we might give from the various Townships in which the pumps have
