

Several burglaries have recently been committed in Hamilton.

It is reported by the Montreal Transcript that all the troops in this Province are soon to be withdrawn for service in India.

There is considerable excitement at the reported discovery of gold on the Chaudiere river, Lower Canada.

A young man named Robert Gibson, was accidentally drowned in the mill-dam at Clough Mills, West Flamboro', on Saturday night last.

The Bradford papers say that there is now in that town an organized gang of burglars, who have lately attempted to commit several robberies.

It is stated that the celebrated Mrs. Cunningham is about to appear in a new character, viz. as an authoress—not of another "bogus baby," but of a book!

The Montreal Herald states that counterfeit bills on the Quebec Bank are in circulation. They have been altered from one dollar to tens and twenties, and are said to be well executed.

The N. Y. Tribune says that the splendour of the Utah expedition has quite faded away. Only two regiments of infantry, one battery, and one squadron of dragoons, will go to Salt Lake.

Chief Justice Draper, and the Quebec and Kingston delegates on the seat of Government question, have returned from England in the Anglo-Saxon.

The Boston Pilot states that Illinois, this season, will produce two hundred and eight million bushels of grain, more than ten bushels for every man, woman and child in the United States.

The Hon. Franklin Dexter, of Boston, and one of the most prominent citizens of Massachusetts, died on Friday morning at his summer residence at Beverly.

An immense defalcation is said to have been discovered at the St. Nicholas Hotel, New York, and the chief book-keeper of that establishment has been arrested. From \$39,000 to \$50,000 have been appropriated.

The Bytown Gazette states that the mayor of that city (Ottawa) had received a letter from England, informing him that Ottawa has been selected as the future seat of Canadian Government.

FLOOD AT WESTON.—On Thursday night, the flats in the neighbourhood of Weston were flooded, and large quantities of fencing and farming produce carried off. We have heard of no damage having been done to houses or barns.

The London correspondent of the Paris Presse says that Ledra Kollia has brought an action against the London Times for an article alluding to him in connection with the recently discovered conspiracy.

The Kingston Whig intimates that the Bursar of the Penitentiary in that city, Mr. Thomas Marva, has been detected in certain criminal practices, and that certain strange revelations of dishonesty in that institution are to come out.

The peach season is just opening in New York. The delicious fruit is selling at \$2 per basket. The crop is rather deficient, but will exceed last year. The late varieties which ripen in September, are the only sort which will be plentiful.

Accurate experiments have been made in Illinois to test the comparative value of timothy and clover hay. The experiments were carried on for two years, and the results were that the clover hay until formerly yielded ten per cent, more milk than the timothy.

COAL.—A copper kettle has been found seventeen feet below the surface, firmly imbedded in a coal vein near Ottawa, Illinois. When found it was bottom side up, with coal firmly above and below it. The question is how could it come into a solid bed of coal.

A little boy, more thoughtful than boys generally are, but not more than they should be, on being tumbled into the mud by a comrade, was asked why he did not serve his abuser in the same manner, when he replied—"If I should there would be two suits of clothes to clean."

TELEGRAPHIC CHARGES.—It is stated that the charges on the Atlantic Telegraph will be something like the following:—From Newfoundland to Ireland for a message or 20 words or under, £2 10s. 6d.; and for a message of the same length direct from New York to London, £4 5s.

From the Townships of North Gwillimbury and Georgina we learn the late heavy rains did considerable damage to the crops. Fall wheat had commenced sprouting in shock, and spring grain had been levelled to the earth. Root crops promise well.—Era.

Frederick Sauvage, the first person to conceive the idea of applying the screw as an auxiliary of steam, died a few weeks ago in Havre, France. His fortune and health had been ruined by his labors in scientific discoveries, and his reason had left him in consequence of his chagrins of different kinds.

It is reported that the battery for the protection of the Clyde will be erected on a point north Rosneath shore to the eastward of Kilmoragga. It will command the river from Cloch to Dumbarton Castle, and will be mounted with formidable ordnance.

The Elora Backwoodsman warns its readers against taking bag money, and states that a number of American "quarters," dated 1855, and an excellent imitation of the genuine coin, are in circulation in that neighborhood. They are manufactured, it is believed, in the vicinity of Vienna, Canada West.

The business of the Bank of England is conducted by about 800 clerks, whose salaries amount to about £190,000. The bank in 1850, had about twenty million of bank notes in circulation. In the same year there were about five millions deposited in the savings bank of the metropolis.

We regret to learn, says the Montreal Pilot of Friday last, that some of the light fingered gentry were at work last evening at the Conversations given by the Natural History Society, in the City Concert Hall. Professor Stillman was relieved of about one hundred dollars while promoting the hall.

The Postmaster General of England reports that 478 millions of letters passed through the English post office in the year 1856, being an increase of 22 millions over the preceding year.

At the last regular meeting of the Loyal Orange Virgin Lodge, No. 328, Toronto, the Worshipful Master Wm. McMaster, Esq., presented the members with an elegantly bound Bible and cushion. The hand-ome gift was duly appreciated by the brethren present, and an appropriate address was presented to Mr. McMaster.—Globe.

DEPARTURE OF NINE MEN.—On Monday at two o'clock a sergeant and eight men of the 9th Regiment, forming the Garrison guard deserted from their posts by means of a boat lying at the Queen's wharf. One of them belonged to the band, and was at the time under arrest for some minor offence, but he managed to escape the vigilance of his guard.—Kingston News.

The Convention at Cleveland, called to devise a scheme for the emancipation of slaves on the compensation principle, has adjourned finally. The result of the labors of the Convention appear to be simply the adoption of a plan whereby the general and State governments shall purchase the slaves at the rate of \$225 each, and the organization of an association to carry on the movement.

The "good time coming" when flour, potatoes and sugar will be cheap, and that is the tendency of things now, and with the abundant crops and small demand, will continue to be. No speculations in breadstuffs cover the crops of this year, which are as good in Europe as here; and those holding sugar and molasses for better prices are in a poor way to make money.

On Saturday, about forty yards of the Grand Trunk track at Duck Harbor, between Port Hope and Cobourg, were swept away by the dashing of waves from the lake. On Saturday night, accordingly a train was sent down to the break, to meet that from Montreal, and the passengers passed from the one to the other. Steps were immediately taken to repair the breach, and yesterday the train passed over as usual.

A man named Gannon, who gave evidence against the priests in the case of the County of Mayo election, before a committee of parliament, was surrounded on his return home by a mob of about a hundred persons, who beat him till there is not a hand-breadth left unbruised on his whole body, and thrust out one of his eyes with an iron rod. This is the second act of the drama in which Bishop McHale's priests have won for themselves a bad reputation.

Lord Palmerston is said to be, just now the business man of the world. Having just emerged from war with Persia, he is deep in a contest with China; he has a revolt in India; he grapples with disaffection in the Ionian Islands; and the last news from Australia shows that country in the heart of a political crisis, which may eventuate in its declaring itself independent one of these days, and claiming rank among the nations of the earth as the Republic of Australia.

THE WINNER OF THE GOODWIN CUP.—It is stated in letters from London that the horse Monarque was sired by an English horse out of an English mare, and that the dam was taken across the Channel for the purpose of having the colt dropped in France, in order to claim the light weight, which, by the rules of the English Turf, is given to all foreign horses. Upon this state of facts the opinions of the judges are pending and all bets are in abeyance till the opinions of the judges are made known.

An extra of the official Gazette was issued on Monday, containing an order by the Queen in Council that in all Prayers, Litanyes, and Collects for the Royal Family, the words "The Prince Consort" be inserted in-tend of the words, "The Prince Albert," which order the Administrator of the Government is desired to make known throughout Canada, "the Right Reverend the Bishops" being commanded "to take care that obedience be paid to the same accordingly."

THE PRICE OF A FARM.—Mr. Moses Douglass sold his farm (100 acres) in Downie, on Tuesday last, to Mr. Reid, a gentleman lately arrived from England, for the handsome sum of \$6000, the greater part of which was paid down in cash. That does not look as if property was deteriorating in the vicinity of Stratford. We presume the Hon. Mr. Cayley did not refer to Stratford when he spoke of "so many places going backwards."—Banner.

We learn that during the heavy wind which arose about six o'clock on Friday evening, the Suspension Bridge at the Desjardins Canal, near Hamilton, was blown down. It is providential that no one was passing at the time, as hundreds of carriages are every hour crossing it. Otherwise we might have to record another sad disaster like that of the Montmorency Bridge at Quebec. Those who have seen it may remember the unsightly and unsafe appearance of this affair.—Colonist.

During the last illness of Dr. Chiarc, the celebrated French physician, he was attacked with delirium, on recovering from which, he felt his own pulse, mistaking himself for one of his patients. "Way was I not called in before?" said the doctor. "It is too late; as the gentleman been dead?" His attendants answered he was negative. "Then he is a dead man," answered Chiarc, "but he will not live six hours;" and his prediction was verified.

The Sussex (Eng) Advertiser says, from all sides we receive the most gratifying accounts of the crops. The blooming was completed during the most propitious weather, and the rain that did fall during that period only tended to refresh vegetation and impart more fullness to the grain and more vigor to the plant. Wheat cutting has already commenced in several quarters, and in a very few days will be more or less general throughout this district, thus rendering our harvest a full fortnight in advance of ordinary years in point of time.

TEARING DOWN A CHURCH.—Some time ago an exciting rencontre occurred on a Sunday near Mount Carmel Church, in Alexandria county, Va., to which a Sunday school teacher was a party. This teacher, named Austin, had so little of the spirit of holiness in his composition, that he shot and we believe killed a young man named James Burch. The Washington Union now says that one night last week the Mount Carmel Church was pulled down by a mob, and the ruins of the building have since been fired and consumed.

THE LAW OF RAILROADS.

A court in Ohio has decided that the loss of a railroad ticket falls on the purchaser, because the ticket being negotiable by delivery, any one picking up a lost ticket could use it; it was held further that passengers, by the purchase and delivery of tickets, do not become lessees of the cars, but are still under the control of the company and subject to ejection for proper cause, while in such a case a company would not be liable for assault and battery, but merely for a breach of their duty as common carriers.—A passenger on the Illinois Central Road lately offered the conductor a \$100 bill to pay \$1.55 in fare; the conductor refusing to make the change, and the passenger refusing to offer any other bill, the latter was ejected, and immediately brought suit for the recovery of damages—which the court denied him on the ground that the bill offered, although genuine, was not a reasonable tender.—The New York Court of Appeals has decided that a passenger is always obliged to show his ticket when required by the conductor to do so and may be ejected for a refusal, even though the conductor knows that he has paid his fare.

THE TORONTO AND OWEN SOUND CENTRAL RAILROAD.

We understand, that at a meeting of the inhabitant rate payers of Brampton, held on Friday evening last, George Wright, Esq., in the chair, it was agreed almost unanimously, that that municipality should take £10,000 stock in the Toronto and Owen Sound Central Railroad. The Mayor of Owen Sound, Richard Carney, Esq., was present, and represented the interests of that town and the adjacent country at the meeting. Mr. Carney entered very fully into the importance and necessity for the railroad; and John Lynch, Esq., Thos. Haggart Esq., Town Councillor, and most of the leading inhabitants of Brampton, ably and spiritedly seconded the views of Mr. Carney. The consequence was, after a slight show of opposition at first, the meeting nearly unanimously decided upon aiding the road; and agreed to the very handsome subscription we have named. In the present time of suspicion of nearly all railroad enterprises, and of distrust in their management, this step on the part of Brampton is at once a proof of the feasibility of the undertaking, and the integrity of the gentlemen who are pushing it forward.

A meeting was also held at Pine Grove in Vaughan, J. W. Gamble, Esq., M. P., in the chair, on Thursday last, to carry out the same object. Several of the leading inhabitants of the township and county were present, Messrs. Graham, Howland, of Kleinburg, Donaldson and Dennis, of Weston, Boulton, of Vaughan and Messrs. Orr and Brown of the same township, being among the number.—The meeting, after hearing the explanations of Mr. Carney; and discussing the matter fully, decided that the Township of Vaughan would also take £10,000 stock, providing the road took the route of the valley of the Humber. Altho. we are also informed, will likewise take £20,000, should the road pass through the Humber Valley, and Caledon will take £10,000 irrespective of the route it may take.

So far, the prospects of getting wealthy, and unburthened, municipalities to take an interest in this undertaking are excellent; and it is due to the enterprise itself, and to those concerned in it to say, that no municipalities in Upper Canada have been so cautious of railroad undertakings than those in question. The road itself, notwithstanding the damper which has been cast upon railroad enterprises by recent exposures, is rapidly gaining in public favor; and it is all important to this city and the country through which it passes, that it should be constructed as easily as possible.—Colonist.

CANADA THRIVING.

The New York Times had an article lately on the progress of Canada, which is well fitted to arrest the attention of all. In 25 years the population of Canada West has risen from 160,000 to 1,327,400; and her assessable property from £2,500,000 to £30,000,000. In 14 years her exports of wheat have increased from 299,620 bushels to 5,496,718. From 1834 to 1853 her exports and imports have advanced from £3,082,567 to £13,945,684, a seven-fold increase! It is not possible to contemplate the gradual but rapid progress and prosperity of such a colony without seeing here long it must of itself, become a mighty nation. The Yankee editor is smitten with the plague of "annexation," and his mouth waters for so precious a morsel as Canada. Perhaps he forgets the immense breadth of the frontier line, morally, from land on which the bloodhound tracks the innocent fugitive, to that which when his foot touches he is free. Let Canada prosper, but never may it be amalgamated with the land of slavery.

TORONTO MARKETS.

Tuesday, Sept. 31. There was a good attendance of farmers on the market this morning, and the amount of produce which changed hands was moderately large. Prices generally are unchanged.

WHEAT to the extent of 800 bushels was bought at prices ranging from 5s to 7s per bushel. One or two loads only of good samples were offered, the majority being of very inferior description, a great deal of it spoiled, and all of it shrunken. The high price is wholly sustained by the local demand.

Flour.—There is very little flour offering, and quotations are purely nominal. Superfine \$6 25 a \$6 50; Fancy \$7 25 a \$7 50; Extra \$7 75 a \$8 25 per bbl. A load of new farmers' flour, of good appearance, moved freely off the market at \$7 a \$7 50 per bbl. in bags.

In other articles no change is observable.

PATENT PUMPS!

THE Subscribers have pleasure in informing the Inhabitants of Whitchurch and surrounding Townships, that they are manufacturing the best pumps now made in Canada.

Patented by John Dennis. These Pumps are much better than the ordinary Wood Pump, for the following reasons:

Firstly.—The Water is much better, as there is not quarter as much wood in the well, and all free from sap. In order to do away with such heavy timber as is used in the common wood pump, they add a sufficient number of iron bands; this makes the pump stronger and so much lighter, that two men can take one out of a well sixty feet deep, in fifteen minutes.

Secondly.—By the use of the Patent Cylinder, which is turned perfectly smooth and true on the inside, the box wears longer and works easier than in the ordinary bored pumps.

Thirdly.—These Pumps are so simple that almost any man can repair them, and by means of the nut on the rod, the Bucket is secured in such a manner that it cannot get loose; and as the joints are all fitted true and tight, there is no jarring in the working of the pumps.

Lastly.—These Pumps are neatly turned and painted, making it an ornament as well as a most useful article. Below will be found a few of the hundreds of references we might give from the various Townships in which the pumps have been introduced.

We, the Undersigned, having in use the Pumps manufactured by J. James & Co., can cheerfully recommend them as the best Pumps we have had in use:—
