

Electronic media carries the Gospel of Jesus

By REV CECIL ROSENBERGER, Gormley Missionary Church 887-5846

You've seen them — ambling down the street, meandering through the park or wandering through a plaza. They're either gyrating to the beat, thumping to the drums or trying to sing along with the tune.

The "plugged in" generation they call them. Or better still, "wired for sound", as they listen to their transistor radios or portable 8-tracks via an ear plug. We're part of the electronic media generation. Millions of these small pieces of equipment are sold all over the world at increasing amounts every year. Those who capitalize on the

product are doing well, but so are those who program for them. Radio meets you where you are. Talking, music and singing are where people are at.

Dr. Paul Freed of World Trans Radio realized this 25 years ago. He was convinced that Jesus' words in Matthew 28:19 "... go and make disciples of all nations ..." (NIV)

included using the medium of radio. A fledgling start in February of 1954 involved broadcasting in two languages on a used 2,500 watt transmitter.

Twenty-five years later, there are more than 80 languages broadcasted — with more than five million watts of power!

Short wave transmitters are now

located at Bonaire in South America, Monte Carlo in Monaco, Swaziland in South Africa and on the Island of Guam.

On September 4, 1977, Trans World Radio went on the air on Guam with two 100,000 watt short wave transmitters. The reason? To beam the Gospel of Jesus Christ to more than 900 million people in China.

In addition to this, the masses of Indonesia, Southeast Asia, Japan, and Eastern Soviet Union are hearing as well.

What does it sound like? To those countless thousands buying transistor radios every year in these areas — it means the hearing of LIFE for them in God's Son Jesus Christ.
