# MOVE MANAGEMENT

If you want the security, scope and income of a management career in business or government, consider these facts.

As a professional RIA Management Accountant, you will have a rare combination of skills that are in great demand.

The RIA study program provides much more than an in-depth grasp of accounting. You will also gain a broad range of management insights and skills. So you will be equipped to work with other members of the management team in planning activities . . . setting objectives . and monitoring results. Unlike the traditional "scorekeeping accountant, the RIA has his eye on the future.

And your future will be unlimited. Every organization needs effective management. And "numbers" play a part in almost every management decision. That's why so many RIA's have achieved senior management ranks — and why you can look forward to joining them.

As an RIA, you can select from the widest choice of management opportunities because you will have studied the full Management Accounting Body of Knowledge.

#### Consider this fact too.

Only the RIA program is designed specifically for the broad opportunities of the Management Accounting profession. It combines evening lectures or home study with your practical on-the-job experience. So it helps your career long before you graduate.

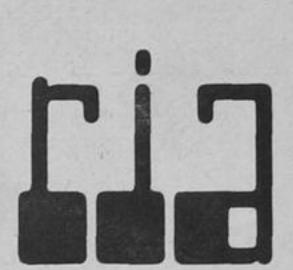

#### Start moving up now!

For more information, contact:

Henning von Kaufmann, R.I.A. Days: 865-0311
