

Although Rosseau Lake School provides the Ontario Department of Education curriculum for Grades 8 through 13, leading to university entrance, special emphasis is placed on the preparation of youth for future participation in the business and professional community of this country.

To establish Rosseau Lake School has required capital expenditures of approximately \$350,000 for the purchase of the property and for construction and improvements. Additional capital expenditures of about \$100,000 are required to provide the school with buildings and facilities required to enable it to fulfil its role in the academic community.

The Rosseau Lake School Founding Fund has been established to retire the capital indebtedness of the school and to provide funds for the necessary capital expenditures. Operating revenues of the school are adequate to meet all operating expenses.
