ACTION COMMENCED.

The Mutual Reserve Fund Life Defends liself-tel. James is Acting for the

(From the Toronto Globe.)

The Mutual Reserve Fund Life Association has commenced proceedings against former officers and employees charged with circulating false and libellous charges against the association. The charges were fire made with the New York insurance Department, and when it was found that the department ignored them in its exhaustive report upon the association they were repeated to various New York newspapers until one was found willing to give them publicity.

Col. E. C. James, the eminent attorney in New York, is acting for the association, and the charges are to be pushed vigorously, not only against the original offenders, but also against anyone repeating the libellous statements. The move of the Mutual Reserve will, it is believed, commend itself to all honest men, and all who are interested in the association. It is a move that should have been made long ago. For years it has been slandered and villified through journals that are no credit either to the insurance business or to journalism. These arrh. There is no danger or risk in attacks have been put in circular form, using this pleasant and effective remattacks have been put in circular form, and sold by the thousands to competing companies, who supply their agents with them, who, in turn, distribute them among the people with a view to prejudice public opinion against the them are the manufacts of the lungs, and bronchial tubes. It cures because it cannot fail to reach the right spot. You breathe, it does the rest, \$1.00 at all snatched from the edge of the grave association.

One will naturally inquire what the Mutual Reserve has done to merit such unfair treatment. Its greatest sin seems to be that it has saved its policy-holders about forty millions of doilars which its competitors would have taken from them, and to this charge it pleads guilty. But why it should be abused for working for the peo-ple's interest is difficult to understand, unless it is on the principle that the most clubs and stones are always found under the best apple tree, and no doubt the insuring public will take that view of it. Indeed, it looks as though the the question of the future would be whether the public are to work for the stockholders of insurance companies, or their own families, as the business seems to be drifting into the hands of a few manipulators. In other words, is it to be life insur-ance for the people or Hooleyism?

There is one thing evident, when the association has come through such a rigid examination at the hands of an to put it mildly, did them scant justice, stile Department of Insurance, who solutely solvent with practically a million dollars of surplus over and above all liabilities actual or contingent, they have nothing to fear in the future. Had the law been carried out and justice done the association, it would have shown nearly two million dollars of a surplus. This is the strongest endorsation the association could possibly get. Not only so, but to the thoughtful mind it means that cible, and that the vile attempt that the association is practically invin-cible, and that the vile attempt that has been made to injure the interests of thousands of policy-holders will end in inspiring still greater confidence in the association, leading on to still greater achievements in the future, making thousands of homes happy at the lowest cost consistent with absolute safety.

The very men whom the shoulderers thought to please have long since been disgusted with their self-elected champions and ashamed that their business should seem to need such helpers. The Mutual Reserve Fund will doubtless follow up vigorously those who have foully tried to injure it, and all honest men will hold up its hands, for the public loves fairplay and is already tired of the persecution by disappointed money-seekers of an association which, with serious problems to solve, ls honestly trying to meet them.

THE CARRIAGE FOR WOMEN.

One reason for the popularity of the automobile among women is that it is such an absolutely clean conveyance. There is no dust to speak of; no mud thrown up by the hoofs of horses, and the most immaculate costume loses none of its freshness after the drive. Then there is a safety about the horseless carriage which also appeals to every woman who had been condemned to drive behind what are known as "ladies' horses," those staid old slowgoing animals that are tagged safe and reliable enough to be trusted under a feminine rein. Women like good horses, but very few have the strength nerve and skill necessary to drive them. That they are advancing in this particular accomplishment is proved by the fact that at recent horse shows women have carried off many of the first prizes. But the automobile, at present, is the chosen conveyance, and there is little doubt that New York, will soon see many of the carriages propelled by fair hands that have been trained to handle the brakes, to back and steer in the very adept fashion that Newport women are exploiting this summer. The fact that the eleccarriages have been exiled from the park drives has militated against their use in town, but that restriction is to be removed shortly, and this autumn the girls will probably glory in the use of these new-fangled driving machines, rejoicing in them all the more in that they eliminate from the life of womankind, one persistent terror, the cabman.
