We have a well assorted stock of Flour and Feed on hand

Four years development Over 1,000,000 miles of Testing

DURING the last four years, over a hundred six-cylinder motors—of every conceivable type . . . were built by Chevrolet engineers and tested on the General Motors Proving Ground, before the present motor was developed and pronounced correct.

At the same time, the frame, springs, brakes, wheels, axles, steering mechanism and other parts of the car were being developed, so that the entire chassis represents a finished product of balanced design—to which Fisher Body craftsmen have added the smartness and luxury of handsome new body designs.
