

Does rheumatism hinder your work?

"WHILE working in a quarry as a driller," writes Mr. John J. Hogan of South March, Ont., "I was seized with rheumatism in the left shoulder. I followed treatments for some time without relief. I had heard so much concerning Dr. Williams' Pink Pills that I decided to give them a trial. They were certainly the medicine that I needed for it was not long before I was as well as ever. Now I take them every Spring as a tonic."

This is one of hundreds of cases in which these blood-enriching pills have proved effective in eradicating rheumatism. Buy Dr. Williams' Pink Pills now at your druggist's or any dealer in medicine, or by mail, 50 cents, postpaid, from The Dr. Williams Medicine Co., Brockville, Ont.

Waxwork Secrets

New Wonders of Great-Grandson of Madame Tussaud

London.—The famous Madame Tussaud's has been modernized in surprising fashion. To old visitors the greatest surprise is to be able to step across the new Tussaud's restaurant to see and hear the latest thing in talkies. Mr. John T. Tussaud, the great-grandson of the original Madame, is now the presiding genius. He still holds family secrets in the making of waxwork portrait figures about which the world wonders. Madame Tussaud's has been entirely rebuilt and modernized since the fire in March, 1925.

The Sphinx and the Nile

London Observer (Ind.): The Anglo-Egyptian agreement awaits the judgment of the Parliaments of Britain and Egypt. The treaty which it contemplates is contingent on their approval. But more is at issue than the relations between two States whose destinies history and geography have linked together. The new proposals must needs react upon the situation in India. They are of intimate concern to the Dominions. They bear directly upon the moral prestige of Britain throughout the world.

LUXO

FOR THE HAIR

Ask Your Barber—He Knows

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

Department of Health

When the school bells rang in Ontario on September 3rd thousands of small boys and girls started on the greatest adventure of childhood—Going to school.

Every Starter a Healthy Scholar

Upon the health of the child as he enters school depends, to a large extent, his success or failure as a scholar. Everything that is done from the time a child is born to develop in him a strong, sound body is a contribution to his school success. Malnourished, sickly children not only are likely to miss school often, but they can not do the best work when they are in school. It takes a strong, vigorous child to get the most out of school life.

Parents who have children entering school for the first time this fall owe it to their children to have every possible handicap removed, every defect remedied which medical and dental science can correct. This common-sense idea of starting school without a handicap on the health score is fast becoming very popular in Ontario and hundreds of children are now entering school with health 100% perfect.

Protection Which Means Much

Diphtheria is disease which is particularly dangerous in childhood. There are very few deaths from this disease among grown-ups; it takes its greatest toll from among young children. In Ontario to-day there is no excuse for any child starting school without protection against diphtheria, for the reason that science has perfected a preventive which is supplied free of charge to physicians for the use of all children within the province. Toxoid is the name of this preventive; is given in three doses three weeks apart injected into the skin of the forearm.

Mothers and fathers would be willing to risk their lives to save a baby even if it meant pulling him from the railway track in face of an approaching train or dashing in front of a racing motor car. Yet the danger of diphtheria is an ever-present one for the unprotected child from one to ten years of age. Toxoid is a proven protection against this danger of childhood; it is insurance for the child and the parent—and is supplied free by the Department of Health of Ontario.

CIRCUMSTANCES

Man was meant to be not the slave, but the master, of circumstances; and in proportion as he recovers his humanity, in proportion as he gets back the spirit of manliness, which is self-sacrifice, affection, loyalty to an idea beyond himself a God above himself, so far will he rise above circumstances.—Kingsley.

The old gentleman's name was Page and he received the following unexpected epigrammatic reply which chagrined him so much that he left the neighborhood:

May we

Sir W. Beach Thomas in the Boston Atlantic Monthly: (Since the War fox hunting and other "blood sports" have been denounced by humanitarians). So far as we, with our limited imagination, can see, the sport of hunting plays—for the moment—an almost necessary part in the world's economy. The most professional of killers is known technically on British sporting estates as "keeper." It sounds a satiric title; but it remains that the sportsmen are everywhere the leaders of preservation. Those immense herds of wild animals that roam the greatest hunting ground in the world—in Kenya, Tanganyika, and East Africa—would have been clean wiped out but for sportsmen. They were the people who cared. It is the commercial mind, not the sporting, that is reckless and capable of a policy of extermination.

A WARNING TO MOTHERS

Watch Your Little Ones at All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the severity of these troubles. The mother should be constantly on her guard to prevent childhood ailments, or if they come on suddenly, as they usually do, to have the means at hand to relieve them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones—thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth easy. The Tablets are absolutely guaranteed free from injurious drugs and may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Science and Industry

Johannesburg Sunday Times: It would be well for Johannesburg—which is inclined to place material prosperity to the forefront of worshipful images—to dwell with some humility on the debt which industry (including gold-mining), in common with many other fields of human endeavor, already owes to pure and applied science. Your genuine scientist is a real servant of the public, seeking, more often than not, no other reward for his vast and complicated labors, beyond a bare living, than a successful conclusion to his investigations. Were such men recompensed on a scale commensurate with their service and ability they would indeed be rich. But few of them have great possessions, and they are content to spend their lives, and sometimes to sacrifice them, in the cause of human progress and enlightenment.

HAVING THE LAST WORD

An epitaph has given many a henpecked husband the opportunity of having the last word, and some of them have made the most of it. No conventional respect for the dead stopped the man who had this epitaph carved on his wife's tomb:—"Here lies my wife, poor Molly; let her lie.

She finds repose at last, and so do I." It was a Cornish husband who found it in his heart to inscribe upon a tombstone:

"My wife is dead, and here she lies, No man laughs, and no man cries, Where's gone, or how she fares, Nobody knows, and nobody cares." Here is another: "Beneath this stone a lump of clay Lies Arabella Young Who on the twenty-fourth of May Began to hold her tongue."

WASTE NOT TIME

An Italian philosopher expressed, in his motto, that time was his estate; an estate, indeed, that will produce nothing without cultivation, but will always abundantly repay the labors of industry, if no part of it be suffered to lie waste by negligence, to be overrun by noxious plants.—Dr. Johnson.

Minard's Liniment—Used for 50 years

There's Hope Yet

Boston Transcript. Andre Siegfried, author of "America Comes of Age," laments that the United States has no leisure class, which, he says, it must have before it can have a cultured class. Speaking only for Boston, we fear that Dr. Siegfried never has strolled over Boston Common.

"Your wife does so remind me of my elder sister." "She reminds me a great deal of her first husband."

"Sprucing Up" The Farm House

Awards have been announced in a little contest held among some farmers around St. Johns, N.B., which will be extended all through the country. Prizes were given for distribution among farmers whose properties fronted on two provincial highways to go to the men who made the greatest improvements in the appearance of their dwellings and their surroundings during the past summer season.

It is unfortunate but none the less true that very many country dwellers in Canada have never paid the attention they might to the appearance of their houses the creation of lawns, the planting of trees, shrubs and flowers around them—above all, to the painting or even whitewashing of houses, barns or outbuildings. Far too often the Canadian farmhouse and its immediate surroundings constitute an eyesore rather than an attractive feature of the rural landscape.

Our American neighbors as a rule set us an example in this respect that we might well follow. To-day, at least in the older portions of their country, farm houses are neat, clean, attractive, with well-kept lawns, bright flowers, healthy and well-placed trees. The motorist who crosses the border can, too commonly, tell that he has done so if by nothing else than the change from the trim, progressive-looking country-homes south of the line to the down-at-heel, shabby and generally neglected appearance of large numbers of Canadian farm houses.

It would be a fine thing if the experiment that has just been concluded so successfully around St. Johns would attract wide attention and imitation. The cost and the labor involved would be very slight in comparison with the results to be obtained.

The candidate was confident of "getting in." He had personally canvassed from door to door the whole constituency, and the promises assured him that the sea was his. When the poll was declared, he found himself at the bottom of the poll. The usual after result speeches from candidates were called for, and the only sentence he said was, "I am glad that I am not to represent such a lot of d—d liars as you." At the next election he was top of the poll.

DADDY CAN NOW EAT ANYTHING

He dearly loved a rich tit-bit. The spirit was willing, but the flesh was weak. Whenever he ate anything rich, his boys used to say, "Poor dad, he will pay the penalty to-morrow." Read the sequel in his own words:—"Since taking the regular dose of Kruschen Salts it is quite different, and my boys enjoy themselves seeing me eat what I dare not touch before. My eldest son was the same, but since he has taken Kruschen Salts he can eat and enjoy whatever is put in front of him."

Modern artificial conditions, errors of diet, overwork, lack of exercise, and so on, are bound to have injurious effects in the long run providing due precaution is not taken. Kruschen Salts should be your safeguard. Besides cleansing the body of impurities gently, surely and painlessly, they possess a vital power of giving new life and vitality to the countless millions of cells of which every body is composed. That is why physicians never hesitate to recommend Kruschen Salts.
