### Being Hard-Boiled Is Not Desirable

Preacher Editor Thinks Sentimentality Is Great Need In Life

The words "hard-boiled" have become too common in world affairs, Rev. Robert Graham, B.A., associate editor of the New Outlook, declared in a sermon to young people at a special service at Bellefair United Church, Toronto. Mr. Graham said that it was a sad state of affairs when people denied the presence of sentiment in their lives.

"Some people nowadays profess dislike for sentiment," he said, as he pointed out the prevalence of the selfconfessed "hard-boiled" person. Sentiment in writing, reading or thinking has come to be looked on as something childish, he said.

"Nothing But Machines"

"Hard-boiled" are two words that have become too frequently used of late and too many people love to boast that they are "hard-boiled" he said. As a matter of fact, he said, it isn't anything to boast about, for the man or woman who does not possess a heart and cannot feel sentimental at times is dead.

"And the man or woman or business firm who knows not sentiment are nothing but machines and they do not know the real glory of life,"

## Signs Point Out Onset of Stroke

Curb Is Found For Apoplexy -Withkin Foundation Able to Foresee and Prevent It.

Apoplexy, the "stroke" which heretofore has killed without warning, can now be foreseen and warded off, the American College of Physicians was informed recently.

Eight definite signs which foretell the approach of one of these apoplectic strokes (cerebral hemorrhage) were described by Dr. Albert S. Hyman, director of the Witkin Foundation for the study and prevention of heart disease.

A treatment which reduces blood pressure has ben developed by the foundation and proved to be effective in 81 per cent. of the cases treated," he said.

Japanese whalers will send observers to the international Antarctic whaling conference.

QUICK GARDENS

There are hundreds of annual flow-

ers which may be satisfactorily plant-

ed by the person who is not going to

stay long in one place. These annuals

will make their full growth in a few

weeks and bloom profusely from next

June until frost. Vegetable gardens,

too, can be developed in a few weeks

and will give ample returns in the

Even a fair layout of grounds can be

carried out by a tenant. Quick growing

grass will make a very fine lawn in

less than six weeks and one infinite-

ly better than a patch of mixed grass

and weeds. Instead of permanent

shrubbery and climbers, a perusal of

any good seed catalogue will disclose

many bushy annuals among the flow-

ers and some climbers which grow up

to twenty feet in a few months. There

are at least a score of big, bushy an-

nuals which reach a height of from

four to seven feet and can be used for

screening just as effectively as tall,

EARLY VEGETABLES

among the earliest vegetables sown.

These may be planted as soon as the

ground is fit to work. All of the first

named seeds should be sown at least

three times, at intervals of ten days so

that there will be a succession of veg-

etables. The second sown will be car-

rots, beets, onions, potatoes, etc., that

can stand a little frost, and then the

beans, corn and tomato, cabbage and

cauliflower plants, etc., which kill with

frost. Final seeding or planting will

# Seas May Become 150 Feet Deeper

Then Montreal Must Be Moved Inland, Declares Noted Geologist, Dr. A. P. Coleman; Lake Ontario's Bottom Tipping.

Toronto is to have a warmer climate; the temperature will be four or five degrees higher on the average, according to Dr. Arthur Philemon Coleman, professor emeritus of the University of Toronto, and one of the world's leading geologists.

Toronto he sees as an important inand port because the ocean will be 150 feet deeper. The bottom of Lake Ontario will continue to tip, forming marshes in the Humber and in other rivers flowing into it near Toronto.

All this will happen thousands of years from no for Dr. Coleman speaks in thousands and tens of thousands of years.

About 16,000 years ago, ice lay over Toronto's Scarboro bluffs, he said to the Toronto Star. That is why Toronto remains for him the most interesting part of the world. In the rocks of Scarboro and the Don Valley he can read the history of past ages.

His studies of Toronto's prehistoric history have produced the theory at the bottom of the Lake Ontario is tipping. The evidence is that the lake has overflowed its southern shore and marshes have formed in the Humber, Credit and other rivers near To-

"It will be warmer here," he predicted. "The climate will be like Pennsylvania or Ohio. As the ice melts the temperature gradually rises -about one degree a century. When the ice has all melted the oceans will rise 150 feet-Montreal will have to be moved inland - Toronto will be nearer the ocean.

"It is dangerous to prophesy," Dr. Coleman added, "but none of us will be here to see these things."

#### Horse's Owner Sued For Watch Swallowed

Mrs. Gertrude A Canniff, a Peekskill (N.Y.) housewife, filed a damage suit for \$1.950 this week against Mrs. Samuel Schilfer, of Elberon, N.J., charging that a prize stallion owned by Mrs. Schiffer bit her hand and swallowed her wristwatch as she passed a stall at the Peekskill Horse Show in November.

Mrs. Canniff asked \$450 for the watch and \$1,500 for personal damages. Her husband, Adrian Canniff, also filed suit, asking \$5,000 for medical expenses and loss of his wife's services.

# AT HOME 20 WEEKS WITH RHEUMATISM Wife Feared Husband

his back, this woman began to think he would never work again. At last, she said to him: "Let's try Kruschen", and the change that took place was, in her own words, "like a miracle." Here is her letter:

Would Never Work Again

When her husband had been at home 20 weeks with rheumatism in

"My husband is subject to rheumatism and suffered terribly with his back. Some time ago, I had him in the house 20 weeks with it. I really didn't think he would ever work again. We tried all the different kinds of salts you could mention, but none of them did him any good. Then I said, 'Let's try Kruschen." Since then, we have proved Kruschen Salts to be worth its weight in gold. My husband is back at his job, thanks to Kruschen. The change it made is like a miracle."-(Mrs.) B.

Two of the salts in Kruschen are the most effectual solvents of uric acid crystals known to science. They swiftly dull the sharp edges of the painful crystals and convert them into a harmless solution, which is then expelled through the natural chan-

the recession in business has affected the pulpwood and newsprint expansion plans. At the same time, he believed that looking toward greater diversification of industry, local operators should be given the right to develop plants on a sas in default to the crown and utilize those species of timber not required by pulp and paper mills.

Yields Million Cords

Mr. Johnson said Thunder Bay district has a sustained yield of 1,000,-000 cords per annum of all species with a natural, tributary market across the Great Lakes of 50,000,-000 people. Recent years have witnessed the penetration of this market by the Scandinavian countries. With ultimate diversification of industry in mind, he advocated closer co-operation with a government "that is demonstrating its desire to develop the north."

# Super Auto-Road Begun By Hitler

Turns First Spadeful of Earth For Highway Through Austria

workers, Adolf Hitler last week se out to fight the battle of Austria's 600,000 unemployed. Thousands of Austrian workers and.

peasants, including many jobless, cheered the Reichsfuehrer madly as he turned the first spadeful of earth for a new automobile super highway extending Germany's road system across Austria through Vienna to the Hungarian border.

At Salzburg it will join the highway from Munich, through Berchtesgaden, Hitler's mountain retreat. (The Nazis have promised to end Austria's unem ployment by such public works.)

The Nazis' penchant for spectacular displays furnished a thrill for the crowd. As Hitler stepped from the rostrum and turned up the first earth with his spade, a firest of birch and oak trees fell with a terrific roar. An area of 200 by 300 yards was

laid open along the route the highway is to traverse. Lumberjacks and soldiers worked together to perform this impressive stunt. One end of the clearing looked back at the end of the modern highway from Munich, with snow-covered mountains in the background. At the

other end it opened to show the valley

of the Salzach River, to be bridged

by the highway's first large viaduct

on Austrian soil. **'INSIDE INFORMATION''**
