

be gone and in it's place will stand a tree. Unless, of course, man decides to take a hand in the process. It takes countless years for nature to prepare fertile soil from which comes food for all living things. Man is converting soil back to rock, or the equivalent, many times faster than nature can produce more. That's worth thinking about.

FLOWER OF THE MONTH

THE ROCK GARDEN

Why not try a rock garden?

Before planning a rock garden, make a study of your property. The rock garden should be placed in a position adjoining your lawn, but away from formal planting. Be prepared to give much thought and hard work. Study your plant material and your rocks for a definite type of plant.

The site should be sunny. A slope facing north is ideal, especially if it is such
