months and consider what we might have done, or said, differently if we could go back and do, or say, it again. Rather like a short term report card, some rethinking can give us positive messages. Sometimes it is possible to retrieve any mistakes and misunderstandings before they sink too deeply into the void of forgetting. And sometimes the pleasure of realizing that something was done well fortifies confidence and encourages still more improvement.

Like dead-heading in the flower garden, such pruning helps stronger growth in the future. This time to rethink started September 22 and will last until October 13. Because it occurred just a day before the equinox and two days before a new moon, both

indicators of beginnings, all this suggests that Fall of 1995 is a particularly appropriate season to face facts and be prepared to change course, if necessary,

The equinox, when the lengths of day and night are equal all over the planet, is the half-way point of the Sun's yearly trip around the zodiac, as it moves into the sign of Libra. Symbolically it is the harvest time of whatever thoughts, actions or emotions were seeded in Spring. But Libra, the so-called peaceful sign, often goes to extremes. It offers the realization that actions and reactions are linked, like the boomerang coming back. This brings opportunities to understand the benefits of cooperation, equality and justice.
