## WHAT GETS RECYCLED INTO WHAT

COLLECTED IN BLUE BOX	RECYCLING PROCESS	BENEFIT
Newspapers, Magazines and Telephone Directories, Boxboard	De-inked filtered to remove contaminants, processed into new newsprint and new boxboard (cereal and shoe boxes). Also used to make construction materials, (wallboard, ceiling tiles, cellulose insulation), egg trays, animal bedding and mulching material.	Recycling one tonne saves the equivalent of 19 trees.
Glass Bottles and Jars	Crushed, melted and incorporated into new glass bottles and jars	Reduces stack emissions and requires 30% less energy than glass manufactured from virgin materials.
Aluminum Beverage Cans	Shredded, delacquered and melted. Formed into sheets from which new aluminum cans can be made.	95% energy savings.
Steel and Tin Food Cans	Chemical process separates tin from steel so both metals can be recycled. Steel scrap is used in steel making process.	74% energy savings when steel is made from recycled material instead of virgin ore. Every tonne of steel cans recycled saves 1.36 tonnes of iron ore.
P.E.T. - Clear Soft Drink Bottles, Clear Liquid Detergent Containers and H.D.P.E. - Opaque Containers for Milk, Juice and Water	Ground into flakes or pellets.	Made into fibrefill for quilts and pillows, coat linings, sleeping bags, twine, rope, car bumpers, drill handles, trays, etc..
Textiles	Clothing is sorted and distributed to the Salvation Army and third world countries.	

Let us know of any upcoming event of your club or organization and we will be glad to let all of our readers know about it. We will do all we can to help make your project successful. Advise us also if you are starting a new enterprise or have any announcements regarding an already established business.  
Just call 476-3798 and provide us with the details.
