

# Druella Acantha Malvina's Column

**Gem of the Month - There is one thing about stupidity - you can be sure that it is genuine.**

Have you ever wondered why geese fly in V formation? As each bird flaps its wings it creates an uplift for the bird immediately following. By flying in a V, the whole flock has at least 71% greater flying range than if each bird flew on its own. When a goose falls out of formation, it suddenly feels the drag and resistance of trying to go it alone - and quickly gets back into formation.

When the lead goose gets tired, it rotates back in the wing and another goose flies point. Geese honk from behind to keep the group together.

Finally - and this is important - when a goose gets sick or is wounded and falls out of formation, other geese will fall out with it and follow it down to lend help and protection. If we have the sense of a goose, we will stand by each other like that.

- Taken from Reader's Digest

**Household Hint** - an easy way to remove old wallpaper is to wipe it down with a solution of vinegar and hot water, using either a roller or sponge. Then peel off the wallpaper.

Scientists have recently discovered a food that greatly reduces sex drive - it's called wedding cake.

Glaucoma (pressure on eyes) may be lowered by walking briskly 30 to 40 minutes four times a week but should not be relied upon solely to relieve the pressure. Patients should consult their eye-care specialist as medication may be needed also.
