

A kind deal by the Province, I would say! We should be thankful that we still have sugar maples growing on our Reserve. They are hardy, beautiful, giving shade, food and contributing greatly to the making of homes and elegant and lasting furniture and appear in fantastic colours in the fall, which an artist admires and paints. The maple leaf is Canada's emblem, dear.

"Art is the child of Nature; yes
Her darling child,.....
He is the greatest artist, then
Whether of pencil or of pen,
Who follows Nature." ---Longfellow.

Juniors, here is a little verse for you to memorize,

THE MAPLE TREE

I love the sugar-maple tree
The best of any I know,
Because it gives us sugar sweet,
That's why I love it so.

Did you know?

That, Canada and the United States, are the only countries in the world, that can feed all their people without getting any food whatever from the outside. The food the people eat, is from the standpoint of nutrition, the best in the world. It is also the highest in quality; there are more different kinds of food, and they are easier to get at all seasons of the year.
