HOROSCOPE - MAY

ARIES - March 21 - April 20

You might suddenly be impatient with staying too much in the background.

Seek work which can keep you so busy you do not have time to brood over unhappy situations. Be faithful to one who deserves your best and do not cast an interested eye upon someone new.

HOROSCOPE - MAY

TAURUS - April 21 - May 20

If you do not take active steps for relaxation and pleasure, the influence of this month can control you to the point of exhaustion. Be sure to get proper rest. Your naturally industrious nature is spurred on too much now; join pleasure seekers more often.

GEMINI - May 21 - June 20

There is every chance you will become more active in an organization for the public good. You have some financial ventures in mind but be careful in this direction. One who loves you may complain of being alone too much. Realize that marriage deserves companionship.

CANCER - June 21 - July 22

You can be nervous, restless and wondering what it's all about this month. You'll need much control, much thoughtful realization of practical duties, and due consideration for the requirements of the world. You may have delusions of grandeur and these must be dispelled. Ability to laugh at yourself is a big help.

LEO - July 23 - August 22

There are signs of major change which will mean some hard work but you can be so enthusiastic you won't even notice. Love and marriage have a smoother path just now and you are free from former jealousies. Keep your money under guard and don't be an overly generous person.

VIRGO - August 23 - September 22

If unmarried you may spend a lot of time with relatives at a distance.
