LAC DELAGE, Que. — Mohawk leader Billy Two Rivers angrily suggested Wednesday that the federal cabinet should be executed for its support of low-level military flights over Labrador.

Calling them “pimps” and “whoremasters,” Two Rivers said Prime Minister Jean Chretien and his ministers are making money from foreign countries for the training flights even though they are causing pregnant Innu women to have miscarriages.

The government is looking at increasing the number of flights to 15,000 annually, from 10,000.

“Sometimes, I don’t think they are human beings in the way that they think . . . If they are robots and they are just machines serving the establishment, then maybe they should be put against the wall and shot” said Two Rivers, who also said the Pope is a “hypocrite” for not vocally supporting the Innu after they met him in Rome.

The outspoken former pro wrestler made the comments to a meeting of Quebec and Labrador Indian chiefs.
