Ford Car Dependability

IT IS a fact that no matter where any other car can go, a Ford Car will go farther. You know that—have seen it proven many times. But do you know why?

—Because the power of the Ford engine is more than sufficient to drive the Ford Car anywhere you want to go.

—The light weight of the Ford Car, with its strong, sturdy construction, driven by the Ford engine enables it to travel where no other car could get through.

—Its ample clearance carries it over obstructions where many other cars would be hopelessly stuck.

—That is why the Ford Car can go farther—and keep on going—than any other car, and at less cost for operation than any other car.

—Why it is the car for the man who wants a car absolutely dependable at all times.
