COCHRANE-TIMMINS GAME WENT TWELVE INNINGS

Keenly Contested and Thrilling Game
Of Classy Ball on Wednesday
Last.

The game here last Wednesday between Cochrane and Timmins in the District Baseball League was the finest ball and the liveliest contest seen here this season. There was a good crowd out to the game and all felt they added their money's worth and then some. In the first innings Cochrane got away with two runs, but Timmins then steadied down and there was no more scoring except by the home team. There were nine innings without a score on either side. Indeed there were five innings where neither team got a hit. Six innings had not a single error scored against either side, so it may be considered as good baseball all right. In the fifth innings Timmins scored two runs, tying the score and this tie was unbroken at the end of the ninth. Two more innings saw the two teams without further scoring, but in the last of the twelfth Timmins scored the winning run and the game was won, 3 to 2, with Timmins still at bat. The Cochrane pitcher, Thacker, is worth writing home about and he had good support, the Cochrane boys giving a classy exhibition of good ball. But Thacker didn't have anything on Lefty Farr pitching for Timmins. Lefty played a whole of a game as the score shows. He pitched a brand of ball that had the Cochrane boys gaping and that kept the home crowd cheering him most of the game. Some great catches by the Cochrane boys featured the game, while Bill Pierce also got a couple of unusual ones by his clever work. McLean's three-base hit was another special of the game. Mr. Smith of Iroquois Falls made a capable and impartial umpire, while Mr. Coster, Timmins, was the same on bases. The following official report of the game by Mr. J. N. Levine, official scorer, gives the story in detail:—

1st. innings
Cochrane—D. Campbell safe when Spring let his grounder get away. Mc Kinnon singled over 2nd. Bellevue out on an infield fly. G. Campbell bunted and everybody safe. McCurry let Thacker's easy grounder through his legs, scoring D. Campbell and Mc Kinnon. Casey hit to McCurry, forced Thacker at 2nd. Casey had reached 2nd but had started back to 1st thinking a foul had been hit and was thrown out. Farr to Scully. 2 runs, 1 hit, 2 errors.

Timmins—McCurry called out on strikes. Scully flied out to St. Jean. Sheehan called out on strikes. 0 runs 0 hits, 0 errors.

2nd. innings
Cochrane—Hann thrown out by Farr. Dempsey struck out. St. Jean to Farr and out. 0 runs, 0 hits, 0 errors.

Timmins—Spring hit in front of the plate and was thrown out by Hann. Farr struck out. Pierce flied to G. Campbell. 0 runs, 0 hits, 0 errors.

3rd. innings
Cochrane—D. Campbell walked. Mc Kinnon, Bellevue, and G. Campbell struck out, in order named. 0 runs, 0 hits, 0 errors.

Timmins—Lake out. G. Campbell to McKinnon, McLean popped to short. McIntyre struck out. 0 runs, 0 hits, 0 errors.

4th. innings
Cochrane—Thacker struck out. Casey dropped a single over 3rd. Hann popped to Pierce, doubling Casey at 1st. 0 runs, 0 hits, 0 errors.

Timmins—McCurry popped to Bellevue. Scully walked and stole 2nd. Sheehan and Spring popped to G. Campbell. 0 runs, 0 hits, 0 errors.

5th. innings
Cochrane—Dempsey struck out. St. Jean thrown out by Spring. D. Campbell out. Farr to Pierce. 0 runs, 0 hits, 0 errors.

Timmins—Farr hit by pitched ball. Pierce beat out a bunt. Lake also bunted, safely scoring Farr. Pierce and Lake stealing 3rd. and 2nd. Pierce stole home. Lake going to 3rd. Lake out on McLean fielder's choice. McLean going to 2nd. McIntyre struck out. McCurry out. Thacker to McKinnon. 2 runs, 2 hits, 1 error.

6th. innings
Cochrane—McKinnon walked and was caught napping at 1st. Farr to Pierce to McLean. Bellevue struck out. G. Campbell thrown out by Scully. 0 runs, 0 hits, 0 errors.

Timmins—Scully struck out. Sheehan popped to G. Campbell. Spring struck out. 0 runs, 0 hits, 0 errors.

7th. innings
Cochrane—Thacker safe when Scully muffed his grounder. McIntyre in trying to get Thacker at 1st threw the

TIMMINS CHAUTAUQUA A DELIGHTFUL SUCCESS

Good Crowds and Wonderful Programmes of the Finest Entertainment and Inspiration.

The four-day Chautauqua in Timmins, Aug. 18th. to 22nd. proved an unqualified success, and all concerned, and especially the Daughters of the Empire who brought the event here, are to be very sincerely congratulated and commended. The event entailed an immense amount of work upon the ladies of the Daughters of the Empire, but they have at least the satisfaction of knowing that they provided the town and district with a series of unrivalled entertainments that were very generally appreciated. The weather lessened the attendance at a couple of the sessions, but people who knew the quality of the programmes would not be kept away even by the rain. The concerts generally were well attended and for the evening events the big tent on the public school grounds was specially crowded.

The programmes were noteworthy not only for their high standard of excellence in every branch, but also for their pleasing variety. They were a most delightful combination of entertainment, education and inspiration. It is largely a matter of opinion or taste as to which was the "best" item or programme, but there seems to be very general agreement that all were "very good." When it is remembered that the season's tickets brought the price of each programme down to 27½ cents (including war tax) the Chautauqua may well be set down as not only the very best but the cheapest form of entertainment ever offered to the people of the North Land and the people naturally should be grateful to the local I.O.D.E. who made the opportunity for all in this town and district. Anyone who would kick on the 1921 Timmins Chautauqua will pick flaws in the petty gates, if they get that far.

The Chautauqua opened here with an afternoon concert by the Chester Scott Company, a delightful and high-class event. Mr. Scott is a wonderful cornet player, and with the fine talent of Mrs. Scott as a pianist and banjoist, a fine programme was given. There were rare but very pleasing combinations of instruments, including saxophone, trombone, cornet, banjos, violin and guitar. In the evening, the Chester Scott Company again delighted all with their attractive music, and then there was the outstanding lecture of Dr. J. Franklin Babb of Boston. Many look upon this lecture as the finest item on the programme. It assuredly was good, full of humor, eloquence, interest, philosophy and truth. He spoke on the "Hundred per cent. Man," and he had his audience enthusiastically with him from start to close.

Prince (a regular King of Concert Accordionists) was the popular musical feature of the second afternoon and evening. In the afternoon Lieut. W. J. Osborne-Dempster, the gallant Canadian who has travelled 22,000 miles through Bolshevik Russia, lectured on "Red Russia with the Lid Off." In forceful and eloquent manner he pictured Russia as it is to-day, as he himself knew it with its disorders, its immoralities, its hunger and its pain and sin. He scored the Bolsheviks, the I.W.W. and all that sort. In the evening wonderful magic was given by Davis, the Master Magician, who made the evening fly along with his mirth, mystery and magic. He did some wonderful stunts, and his running fire of talk with "Clark" who he selected as an assistant was a never-failing source of laughter.

Delightful vocal and instrumental music by the John Qualen Trio and Henry Reed featured the third day. Saturday evening the comedy, "Contentment," a very pleasing feature, was given with outstanding talent by the Elias Day Play Company. The lecture was "The Power of Song," by D. Lee Fitzpatrick, attractive, inspiring and delightful. "This was the best of the lectures" is the opinion of many. Anyway, it was a remarkably pleasing feature.

The last day (Monday) kept up the high standard of previous days, and the announcement that the Daughters of the Empire were considering signing a contract for the Chautauqua next year brought very enthusiastic applause. Ferguson's Light Opera Quintette furnished the music. It was all good, featuring songs and medleys of very attractive kind. The lecture, "With Allenby in Palestine and Lawrence in Arabia," was a very interesting and educative feature. The eloquent address of Dr. Frederic Poole, the gifted Oriental traveller,

AUTOS WANTED FOR THE SCHOOL TEACHERS VISIT

Citizens Asked to Help Out In Entertaining Visiting Party.

The Board of Trade is anxious to have as many autos as possible supplied to take around the important party visiting here to-morrow morning. This important party is the group of 200 school teachers now touring the North Land. The impressions they gather will have a material effect in influencing ideas and opinions throughout the southern part of the Province. It is desired to show them as much as possible of the town and district on their visit here (tomorrow) Thursday morning and accordingly all who can loan their autos for a few hours will be helping along things much by this accommodation. The autos will not be required until 9:30 sharp and then only for a couple of hours or so. Any who can help by the loan of their autos for the good purpose suggested should let Mr. D. Ostrosser, chairman of the Board of Trade, know of their willingness to thus assist. Last year a large number of good citizens kindly assisted in this way and it is hoped that the same kindness will be shown again this year.

BAPTIST SERVICES NOW IN MONETA NEW SCHOOL

The gospel meetings formerly conducted in the big tent on Balsam street are now being held in the fine new school at Moneta, a large room in that excellent building being secured for the purpose, and the Baptist Home Mission Board supplying the necessary chairs for equipment. Rev. J. Proudfoot, returned soldier from Sudbury, is conducting the services this week, the concluding meeting of the mission to be on Sunday evening next. After that it is probable that the Baptist church may be re-opened here. Word received this week from the Superintendent of Baptist Home Missions is to the effect that the Board is considering the placing of a permanent pastor at Timmins.

A special feature at the services in the Moneta school last Sunday was the singing of the male quartette. This quartette will also give of their talent at the services this coming Sunday evening.

ASSOCIATED BOARDS OF TRADE TO MEET SOON

The next meeting of the Associated Boards of Trade is scheduled for Haileybury and the date will be announced in the course of the next day or two. The last regular meeting of the Associated Boards of Trade was deferred owing to the hot weather months, the absence of so many interested and other causes. It was thought that it was better to defer the meeting and have a bumper assembly at the next meeting instead. This idea is being carried along and it is hoped to have a big meeting with special interest and helpfulness when the Associated Boards meet at Haileybury in the near future. One of the reasons for deferring the previous meeting was that the local boards had forwarded no special resolutions or subjects for discussion or consideration. At the meeting in Haileybury, however, it is expected that there will be a number of live questions up for discussion and consideration. Among them will likely be the question of Roads and Fire Protection, ever timely in this North Land, and ever needing consideration and attention. It may also be that the question of a bridge over the Narrows near Ville Marie will be dealt with. This bridge would connect up Haileybury and the adjacent country with a large and prosperous part of Quebec Province to the general advantage of all. Other questions of equal importance will also no doubt be before the meeting and in general it is expected that this session of the Associated Boards of Trade will be one of the most important yet held. The date for this meeting at Haileybury will be announced in the course of the next day or two.

Mr. D. H. Crighton will arrive this week to join the Hamilton B. Wills & Co. staff as stenographer. Mr. A. E. Riddell leaves the first of next week to take up his new duties in the Wills new office at Sudbury.

was illustrated by excellent pictures of the districts referred and striking sidelights on life in the East. Dr. Poole brought home to his audience striking and important phases of the late war so far as it related to the East, and his story was listened to with unflagging interest.

WINDOW SMASHED AND ORE COLLECTION STOLEN

Fine Collection of Odd and Valuable Ore Specimens Taken by Bold Bad Thieves.

The valuable collection of ore samples in the Hamilton B. Wills & Co. window are away. The window was smashed, apparently with a large stone, on Saturday morning around three or four o'clock. The thieves then reached in and took every sample they could lay their fingers upon. Only two or three samples were left out of what was the finest collection of ore samples in this part of the North and the only one in Timmins on public exhibition. The collection was very valuable as a collection. It included gold ore from the famous Dome gold sidewalk, as well as many other fine samples of Porcupine's rich ore. Asbestos, copper, and other mineral samples secured in this rich district were also in the collection as well as odd exhibits including tungsten from Nova Scotia, placer gold from the Yukon, molybdenite and asbestos from Quebec, etc. The collection was started by Mr. A. S. Fuller and had been added to by the H. B. Wills firm. At the time of its loss it had assumed noteworthy proportions and was indeed a valuable collection of rare and rich specimens. So far as the intrinsic value of the collection was concerned, the value was not so noteworthy, and if the thieves played their game with the purpose of selling the ore for what valuable metals may be obtained from the samples it is doubtful if they will be more than a hundred dollars ahead by the crime. As rare samples, however, the collection naturally has a higher value.

The robbery, apparently, was carried through in very speedy and impudent fashion. Members of the H. B. Wills & Co. staff have apartments in the upstairs of the building and the thieves took the chance of rousing them as well as the danger of being observed by passersby. As a matter of fact the crash of glass did waken Mr. J. Heppleston, the manager of the local H. B. Wills & Co. office. He came downstairs to investigate, and found the smashed window, but the thieves and the ore samples had already disappeared. Mr. Heppleston at once notified the police, and the latter are at work upon the case.

TAXES LOW IN TIMMINS COMPARED TO COBALT, EH?

Cobalt's tax rate this year is 59½ mills for public school supporters and 69½ mills for separate school supporters. This is 27 mills higher than last year. The rate for general purposes is almost as much as Timmins whole rate, for schools and all. Cobalt's general rate is 43 mills, the school rate for public schools being 16½ and for separate schools 26½ mills. Part of the reason for Cobalt's high rate, in fact the chief reason, is the difference this year from last in the matter of returns from the mines. Most of Cobalt's silver mines have been closed down or partly closed down on account of the price of silver. Last year the mines contributed \$69,000.00 to the Cobalt exchequer. This year the amount is estimated at only \$36,000.

TIMMINS TO PLAY AT COCHRANE ON SATURDAY

According to the revised schedule of the District Baseball League Timmins goes to Cochrane for a game on Saturday of this week. In view of the fine ball put up by Cochrane, Saturday's game will be well worth seeing. Cochrane no doubt feels it came close last week to putting one over on Timmins and so will make an extra effort in Saturday's game.

With Saturday's game out of the way the series will centre down to the old-time battle between Timmins and Iroquois Falls. Timmins has won 4 games and lost 1, with three to play. Iroquois Falls has won 3, lost 1, and four to play. If Cochrane wins from either the Falls or Timmins, it will have a material effect on the chances, while if Cochrane loses to both then it will be the old rivals to fight it out. Cochrane, however, by wins at this stage might turn the balance in favour of one or the other of the opposing teams. And Cochrane very decidedly is a good enough team to be carefully reckoned as still a possible live factor.

Iroquois Falls and Cochrane have two postponed games to play, and then the schedule resolves itself into Iroquois Falls at Timmins and Timmins at Iroquois Falls. These two latter games will undoubtedly be hummers.

COUNCIL PASSES SEWER CONNECTIONS BY-LAW

Measure Provides That No Final Connection Can be Made Until Disposal Plant Complete. Other Council Business.

The regular meeting of the Town Council was held on Monday afternoon with the Mayor in the chair and Councillors J. E. Sullivan, L. S. Newton, T. F. King and J. E. Morin present.

One of the chief items of business was the passing of the by-law regarding sewer connections. To permit the work to be done this year, arrangements are to be made with the Provincial Board of Health for permission for connections to be made into the houses so that as soon as the disposal plant is ready the final connections can be made. Under ordinary circumstances the Provincial Board would forbid any work on connections until the disposal plant was completed. This would mean that practically no one would be able to get sewer connection this year. The Council's plan is to have the connections all ready, all but the final joining up for use, the latter to be held up until the disposal plant is ready. The by-law provides that householders can only secure permission to go on with the work of making connections by signing an agreement that they will conform to the rules and regulations laid down in the by-law, the most important of which regulations is that no attempt at final connections must be attempted until after the disposal plant is built and the work approved by the authorities. The Town further agrees to prosecute any cases where attempt is improperly made to connect with the sewers until the disposal plant is ready. The penalty for breach of this by-law is a heavy one. The by-law was given its required readings and duly passed. It contains full rules and regulations as to materials and methods to be used in doing the sewer connection work.

Councillor L. S. Newton reported on the matter of Mr. W. Gagne's planing mill in town. He had impressed on Mr. Gagne the absolute necessity of keeping the place clean and as free as possible from inflammable material. Mr. Gagne had agreed to make frequent removal of all shavings, etc., and to do all possible to guard against any danger. Councillor Newton thought it would be a hardship to refuse Mr. Gagne permission to carry on the business, though it must be admitted as more or less of a danger. The Mayor suggested that Mr. Gagne be given permission to run for the present but that he find another location less objectionable from the town's standpoint. There was no desire to work hardship on anyone, but the town's interest must be guarded. Such places in the centre of the town would have a tendency to keep up insurance rates, as well as being an actual danger to adjoining places. Eventually on motion of Councillors Newton and Sullivan, Mr. Gagne was given permission to carry on his business with the proviso that within three months he must secure a more suitable site.

On motion of Councillors King and Morin permission was given for the building of chimneys on brackets, instead of from the ground up as required by the by-law.

On motion of Councillors King and Morin authority was given for the appointment of Mr. J. D. Maclean as an assistant inspector to assist the Town Engineer in the present large pressure of work in connection with the disposal plant, roads, sidewalks, etc., etc.

The Mayor referred to the sharp turns in the road to the McIntyre. The Hollinger had done the work of building the road and they had generally made a good job of it, but there were two dangerous turns that might cause accidents for which the Town might be mulcted if no preventative measures were taken. Councillor King pointed out that when the telephone poles were removed as ordered by the motion of Councillors King and Newton the Hollinger Consolidated is to be notified that until the approval of the Town Engineer is secured for the work on the road the Town disallows liability for this piece of road.

The tender for fixing Cedar street was accepted, the gravel to come from Dalton's pit.

The Mayor referred to the proposed arrangement with the Fesserton Company. The Company had agreed to give \$3000 in cash and take \$5000 in bonds for an option on the property desired. He suggested that the matter should be speeded along, as the Fessertons were anxious to have it settled. The matter will be dealt with

TRACK MEETS FEATURE AT THE FALLS LABOUR DAY

Teams from Several Towns to Compete for Cup. Hoped to Have Meets at Other Towns.

One of the special features at the Labour Day event at Iroquois Falls on Monday, Sept. 5th will be the Field and Track meet. The special feature is that the various towns of the district will be represented by teams at this meet. There will be teams to represent Timmins, South Porcupine, Schumacher, Kirkland Lake, Cochrane and Iroquois Falls. Each member of each team must be strictly amateur. In each event the placing, first, second, third, etc., will be scored by points, and the team getting the largest total number of points will win the Cup. The hope is that Timmins, Cochrane, South Porcupine and the other towns of the North Land will follow this up and at their next sporting gatherings have athletic and track meets for the towns of the North. For the best team Iroquois Falls Labour Day Committee is putting up a handsome cup, valued at \$125.00. There are also individual prizes for the various events, these being medals. The Cup is to be in competition for five years, the team winning it the most times in that period having the ownership of the handsome trophy. If the other towns of the North will take up this idea of Iroquois Falls and feature the inter-town competition in field and track events, there will undoubtedly be aroused a much keener interest in this type of athletics and sports.

According to the programmes published this week by the Iroquois Falls people, the following are the events for the "Northern Ontario Trek Meet" which is scheduled for 2:30 p.m. on Labour Day at the Falls: one mile, half-mile, 100 yard dash, 220 yard dash, broad jump, high jump hop-step-and-jump, shot put, 16 lbs. Also Tug-of-War open to all.

In addition the programme provides for:—Children's sports, at 9 a.m.; Tennis Tournament, singles and doubles, Cochrane, Timmins, Kirkland Lake and Iroquois Falls, prize valued at \$75.00; Huge Labour Parade, over 1000 men in the line, as well as floats, at 10 a.m.; Baseball, Kirkland Lake vs. Cochrane, at 1 p.m.; League Baseball, Timmins vs. Cochrane, at 3:30 p.m.; Annual Ball of the Pulp and Sulphite Union, at 9 p.m.

Arrangements have been made to provide visitors from other towns with good meals at low prices. Everything is being done to assure everybody a pleasant day at the Falls Labour Day. Timmins Band has been engaged to supply music for the occasion in addition to the Iroquois Falls Band which will of course be on the job all day. It is likely that a big crowd will go over to the Falls from Timmins and district on Labour Day.

GIN GETS THIS LAD INTO A BIG HEAP OF TROUBLE

Usually it is bad booze that gets people into the worst of trouble, but occasionally a man is landed in wrong through perfectly good liquor. It seems to be so in the case of Frank Calodoni, of Moneta, arrested early Monday morning by Constable Rayercroft. The Constable says that Calodoni was making for the bush with a nice case of gin when he caught him. Further it is claimed that the case was taken from the home of Mr. A. E. Gentile, the latter being at present in Toronto owing to the illness of his wife there. Further it is alleged that Calodoni was seen entering the premises of Mr. Gentile unlawfully. So, as a consequence of the whole affair Calodoni may be called upon to face a number of charges, including theft and breach of the O.T.A. He will be up before Magistrate Atkinson tomorrow.

by the Finance Committee, the Water works Committee and the Town Engineer.

The need for extra land at the dumping ground was again referred to. Four more acres could be secured at \$100.00 per acre. It was also suggested that a fence be placed around the dump to prevent promiscuous dumping.

Asbestos shingles were authorized for use on buildings of frame already constructed, with the approval of the Town Engineer.

Messrs Lafamme and English asked the Council to construct a sidewalk on Spruce street. Council's reply was to the effect that this would be done as soon as possible but of course the most important works had to come first.
