CONSIDERABLE INTEREST IN MONETA-PORCUPINE MINE

There have been many rumors recently in regard to the Moneta Porcupine Mine. One rumor to the effect that certain important financial interests were seeking a large block of the Moneta stock with a view to contro. and inaugurating an energetic development campaign on the property has been discussed with much general interest. There is however, no official announcement in the matter and so all the tales may be set down as no more than street talk, though many would make them true if wishing could do it. In any event there is a general feeling that the Moneta is too promising a property and too welllocated to be left unworked these

The Moneta Porcupine Mines Limited, is capitalized at \$2,000,000, the capital issued being \$1,541,000.00. The company owns 120 acres adjoining the Hollinger on the West. There is a shaft down on the property 120 feet with about 500 feet of underground workings. Sir Henry Pellatt was formerly the president and in general control of the company's policy. It is understood, however, that | the Steindler interests of New York are now in control. From its location and from the results from the work done on it, the Moneta looks to be a very attractive property.
