**The Hollinger People to Provide Comfortable Quarters for Employees of Mine**

The Hollinger people at Timmins have plans drawn for forty cottages to be erected at Timmins, six of which are well under way and be completed this fall in time for occupancy before the severe weather of winter sets in. The cottages will be of seven rooms and exceedingly well finished with all the modern conveniences possible to give. The houses are being built to rent to employees of the mine, or others at the lowest figure possible with the actual cost of building. The building operations will not be continued after the severe weather comes on as the outside of the cottages are to be cement finished.
