BISHOPRIC Stucco Board

Built on the Wisdom of the Ages

A modern combination of materials and principles that ages of actual use have proven the most efficient in building construction

Choose the Bishopric system of building and you will save at least 25 per cent. in cost of building materials, because it makes unnecessary the use of lumber and building paper, saves cement, and gives you absolute protection against all future troubles so common to ordinary plaster or stucco work. Many of the best-known architects, engineers, and builders, men who know and are recognized experts in their line, agree that Bishopric Stucco Board is the ideal background for stucco, cement, or plaster. They specify it, and use it in the modest cottage, the artistic bungalow, the pretentious apartment building, and the modern factory. It is also popularly adopted for inside walls as a background for plaster.

Plaster Board means much in better work for less money, and enables you to build once and for all with a material put there to stay.

Old houses are changed to new. Scores of house owners have taken their old frame buildings and quickly and at very low cost transformed them into modern, up-to-the-minute structures. The plan is an appealing one. It is simple, easy, and very little money is needed. All that is necessary is to nail the Bishopric Stucco Board over clapboards or other finish and apply stucco. In this way you can, without the aid of Aladdin's lamp, enjoy the greatest satisfaction and get rid of continuous painting and repairs. Bishopric Stucco or

NEPONSET WALL BOARD

for Walls and Ceilings and Many Other Uses

Only a hammer and a saw are needed. It can be nailed right on walls or studding and will not crack. It comes in sheets from 7 to 12 feet long ready to use, in two styles—Quartered Oak and Cream Finish.

It need not be painted, but can be. It is waterproof and sanitary, and is easily cleaned with a dampcloth. It is economical to buy and easy to apply

Oak finish . . . \$50 per M
Cream finish . . . \$45 per M
