Saves 25 per Cent. on Building Material

Choose the Bishopric System of Building and you will save at least 25 percent in cost of building materials, because it makes unnecessary the use of lumber and building paper, saves cement and gives you absolute protection against all future troubles so common to ordinary plaster or stucco work. Many of the best known architects, engineers and builders—men who KNOW, and are recognized experts in their line—agree that Bishopric Stucco Board is the IDEAL background for stucco, cement or plaster. They specify it and use it in the modest cottage, the artistic bungalow, the pretentious apartment building and the modern factory. It is also popularly adapted for INSIDE walls as a background for plaster

Bishopric Stucco or Plaster Board means much in BETTER work for less MONEY and enables you to BUILD ONCE AND FOR ALL, giving work that is put there to STAY. Put up in crates, 16 sheets 4 by 4 ft 256 square feet to crate. Price per crate \$11.50
