**ALL SHOULD ATTEND THE  
FIREMEN'S BENEFIT DANCE**

No lover of good dancing should miss the Firemen's Benefit Dance on Friday, Sept. 19th, for the Firemen have a well deserved reputation for successful and enjoyable dances. Nor should any lover of good fellows miss buying a ticket for this event for it is a benefit dance for that prince of good fellows, Mr. J. D. MacLean, the deputy fire chief, and Town Foreman. The Benefit Dance will be held in the Masonic Hall. Dancing at 9. 30 p. m. Colombo's Orchestra. A good time assured to all attending.

**LADIES AUXILIARY TO  
GIVE EUCHRE AND DANCE**

The Ladies Auxiliary of the Porcupine Miners' Union are giving a Euchre Party and Dance on Monday evening, September 22nd, in the Miners' Union Hall, Timmins. Euchre at 8 p.m. Dancing at 10 p.m. Music by Colombo's Orchestra. The nominal charge of 50 cents each is made for tickets, and all attending may be assured of a very pleasant evening. The social events put on by the Ladies Auxiliary are assurance that the euchre and dance on the 22nd will be an enjoyable and successful event.

**MRS. P. PETERIK DIES  
AFTER BRIEF ILLNESS.**

After an illness of only ten days Mrs. Pete Peterik, of Moneta, passed away last Wednesday, Sept. 10th. Mrs. Peterik had suffered first from a cold and this later developed into intestinal influenza and despite all that medical care and attention could do she died last week. The late Mrs. Peterik was only 29 years of age and was born in Poland. She had lived many years in Canada, being a resident of the North Land for several years. She was popular and esteemed by all who knew her and her death is much regretted. In addition to the bereaved husband four small children survive, the youngest child being an infant only a few months old. Interment was made on Friday in the R. C. cemetery.

**THE CLIMATE OF THIS  
GREAT NORTH COUNTRY**

In a booklet, "Northern Ontario, Canada—A New Land Nearby," printed and issued by order of the Legislative Assembly of Ontario, it is stated that nearly fifty settlers in Northern Ontario have recently written the Bureau of Colonization, on the subject of the climate, and by far the greatest number have pronounced in its favor, some of them using such words as—"It is fine, warm days and cool nights in summer, and generally clear and cold in winter, mostly calm,"—and such strong language as—"It is invigorating, health-giving, glorious." The booklet points out that Northern Ontario covers an area of 330,000 square miles and extends 770 miles from north to south, so it will be readily seen that elaborate details of climate are impossible to give. "Generally speaking," says the booklet, "the summers are warm, and the winters very cold, and bracing. Speaking of the country for 60 miles north to Cochrane and along the Canadian National Railway for 136 miles from Abitibi west to Hearst (this section taking in the Porcupine, Troquois Falls, etc.) an expert writes:—"Where only small clearings have been made and the land has not been properly drained, summer frosts occasionally occur and damage the crops, but not to any greater extent than in the older parts of Ontario before the timber was cleared off. As to the winters, they are much longer than in Old Ontario, but are not more severe than in the Rainy River Valley or in Manitoba. Frosts have their limitations in Northern Ontario as well as on the prairies. The Western farmers have been able to grow big crops of wheat notwithstanding early autumn frosts, summer hailstorms and dry summers." The booklet also gives tables showing the average temperatures, rainfall, snowfall, etc., of the Kenora, Temiskaming, Abitibi and other districts. The description of the climate is an accurate one, and fair enough in the impression left. The winters up in this North Land are cold and long, but bracing and healthful. When this is said about all the ill words deserved by the climate are given, except mention of the black flies. Of course the booklet did not mention them, but how could it? Black flies are not "climate," even if they do cause the climate to be so much cursed. That is one of the beauties of the long winters here,—that there are no black flies all that time. The black flies, however, recede from the settled portions, so even this objection to the summer is not an insurmountable one.

**MISS MALTAIS' MILLINERY  
OPENING THIS WEEK**

Miss L. Maltais, who recently returned from a visit to Toronto and other of the big millinery fashion centres, is holding her autumn millinery opening on Friday and Saturday of this week. Miss Maltais is displaying at her millinery parlors, Third Avenue, Timmins, a very pleasing showing of the latest and best in fashionable millinery and novelties for 1919—and 1920, and extends a cordial invitation to all the ladies of Timmins and district to attend on the opening days.

**FORMER RESIDENT HERE  
MEETS DEATH AT COBALT**

N. Olenski, until some months ago a resident of Timmins, met his death at the Hudson Bay Mine, Cobalt, on Friday of last week. His body was found at the bottom of an open cut, about one hundred feet from the surface. So far as known now, there were no witnesses of the accident that caused his death, and no one has yet come forward to tell how he came to drop into the cut. The deceased was a Russian Pole, and the authorities in Timmins say that he was of superior class to those associated with him here. This very fact, however, they suggest caused him more or less trouble and annoyance, as he was charged on one or more occasions with breaches of the law for which he had no responsibility, the supposition being that others of his countrymen who were jealous of his respectability sought to have him set back a bit. An inquest is being held this week and the cause of Olenski's death may or may not be made clear.

**Alcohol is Poison**  
Doctors Say It Is a Menace  
in Any and All Forms

**F**IVE ounces of alcohol will kill a full-grown healthy man within ten hours. Taken in smaller but repeated doses alcohol lets him live longer but gets him in the end. All alcoholic beverages are poison, slow or swift.

Medical science has established that alcohol is a poison and a narcotic chemically related to ether and chloroform, and not a stimulant. A man was once brought out of ether who had taken eight ounces, and a man was once brought out of chloroform who had taken 22½ ounces, but no man ever revived who swallowed five ounces of alcohol at a single dose. The unconsciousness or coma produced by alcohol if not broken within ten or twelve hours is followed by practically certain death.

Alcohol as medicine has been expelled from the American Pharmacopoeia by the American Medical Association.

**2.51% Alcohol in Beer  
Makes it Poison**

**T**HE beer of the ballot contains 2.51% alcohol by weight—over twice as strong as the beer of the Ontario Temperance Act (2.50 Proof Spirits). The Beer of the Ballot is intoxicating. Three glasses of the Beer of the Ballot contains as much alcohol as a glass of whiskey.

When you are asked are you in favor of beer containing 2.51% alcohol by weight—in shops, bars, or anywhere else, vote

**"No!"—Four Times—"No!"**

Save yourself, save your family, save your country for the destiny God intended unhandicapped by "booze."

Be careful—mark your ballot after each question with an X under the column headed "No," or your vote will be lost to Temperance.

**Ontario Referendum Committee**

JOHN MACDONALD,  
Chairman.

D. A. DUNLAP,  
Treasurer.

ANDREW S. GRANT,  
Vice-Chairman and Secretary,  
(1001 Excelsior Life Bldg., Toronto.)
