### WIRELESS TELEPHONES FOR MANITOBA CAMPS.

According to The Pas Herald, wire-  
less telephones may be installed at the  
Pas, Manitoba, after the next session  
of the Manitoba Legislature, to judge  
by a statement recently made by Com-  
missioner Wallace, who inspected the  
tests now being carried on between  
Winnipeg and Selkirk. It is the plan  
to connect up all important mining  
camps in the district with The Pas.

### BETTER 'OLE TO MAKE SEVERAL 'HOLES' SOON.

The Better 'Ole Mining Company,  
with which the Artist, Bairnsfather,  
is connected and which is named after  
his famous cartoon of the great war,  
has let a contract calling for the sink-  
ing of several shafts, all to a depth of  
50 feet, to Mr. J. D. Smith, of  
Bourkes. The Better 'Ole properties  
are in Maisonneville Township, and  
about 2½ miles from Bourkes Station,  
south-east. A gang of men are now  
working at the cutting of roads and  
getting ready for the construction of  
camps. Mr. Fred Powers is in charge  
of the men at this work and every-  
thing is being pushed along. There is  
considerable activity at present in the  
Bourkes area.

### MAIDEN SPEECH OF MR. ANGUS McDONALD, M. P.

On Monday of last week Mr. Angus  
McDonald, the new Labour-U. F. O.  
member of Temiskaming, made his  
maiden speech in the Dominion Par-  
liament. This maiden speech made  
them all sit up and listen. Temis-  
kaming's M. P. severely criticized the  
bill to amend the Lemieux Act. He  
argued that the amendment would  
preclude individual properties in min-  
ing camps from making application  
for a Board under the Act. He said  
it would be necessary to have the  
support of the majority of the Union  
before such application could be made  
and there would be no way of getting  
redress on a single property if the bill  
became law. He considered that the  
effect of the amendment would be de-  
trimental to labour and would tend to  
increase strikes and other labour  
troubles.

### HUNDRED TON MILL FOR MATACHEWAN MINES.

Apparently active production is  
planned for the Fort Matatchewan  
area. The Matatchewan Gold Mines  
are commencing now the erection of  
an 100-ton mill, together with the  
necessary accompanying plant. Three  
diamond drills are going now at the  
Matatchewan Gold Mines, and there  
are other evidences of activity and  
progress. An idea of what the owners  
think of the prospects of the property  
is given by the fact that they suggest  
that if all goes as they expect the 100  
ton mill will be replaced by one of  
much larger capacity within the next  
two or three years. Mr. W. H. Sea-  
man is manager of the Matatchewan  
Gold Mines.

### ANNUAL MEETING OF THE DAVIDSON POSTPONED.

The annual meeting of the David-  
son Gold Mines called for last week  
was postponed until July 15th. The  
postponement was made at the sug-  
gestion of the President, Mr. H. H.  
Sutherland, who cabled from London,  
England. According to his cablegram,  
important developments are expected  
from negotiations now under way in  
London and it was believed to be good  
policy to wait the outcome of the pro-  
ceedings overseas before completing  
the annual meeting.

The report of the mine manager,  
Mr. Evered, for the period from Oct.  
1st 1919, to March 31st 1920 shows  
that operations during that time were  
confined to underground exploration  
and development work. The total  
amount of work done in the period  
was 1136.4 feet, as follows:—drifting,  
538.1 feet; crosscutting, 545.9 feet;  
raising, 52.4 feet. In addition to this  
nearly 2,000 feet of diamond drilling  
was done. The most important under-  
ground work was the extension of the  
west drift at the 500-foot level. This  
ore body apparently increases in  
width as the drift proceeds. Cross-  
cuts projected every 50 feet or so  
show it to have an average width of  
over 20 feet for about 500 feet. The  
vein, the report says, is apparently  
standing at a steep angle and heading  
for a big quartz exposure 1080 feet  
from the present face of this drift.  
The report also states that an average  
of all samples taken in this drift  
showed it to contain payable values  
for the whole distance opened up. The  
report further states that diamond  
drilling at the south section of the  
property cut two ore bodies, one at 45  
feet and the other at 72 feet, both of  
which gave high assay values. The  
chairman, in commenting on the re-  
port, said that the directors have as  
their ultimate object the installation  
of a mill, having a capacity of up to  
2000 tons a day as they believe that  
the property will call for a mill of  
this tonnage from present indications.

### FIRST LADY INSURANCE AGENT IN THE NORTH LAND.

Haileybury has the first lady insur-  
ance agent in the North Land. Miss  
Martha Owens has purchased the Fire  
Insurance business recently conducted  
in Haileybury by Mr. H. Borgford,  
and took possession on May 1st. Thus  
Miss Owens becomes the first regular  
pioneer lady insurance agent of the  
North Land. Miss Owens has had  
several years' experience in the work,  
and is said to have a thorough know-  
ledge of the business, so she will no  
doubt drive the business along like a  
house on fire.

### FREE MAP SHOWING THE RESOURCES OF CANADA.

A map of the Dominion of Canada,  
indicating Natural Resources, Trans-  
portation and Trade Routes, scale 100  
miles to the inch has just been publish-  
ed by the Department of the Interior,  
and can be obtained free of cost  
on application to the Superintendent,  
Natural Resources Intelligence  
Branch, Department of the Interior  
Ottawa.

"On this map the varieties of miner-  
al, agricultural and fishery resources,  
and the timber and fur in general, are  
printed in red lettering in their pro-  
per locations. The sites of important  
water powers, developed and un-  
developed, are indicated and the lines  
of all railroads completed up to date  
are clearly defined.

The resources shown on the map ex-  
tend from "whales" near Herschel  
Island in the Arctic to "salt" at the  
southern toe of the Ontario peninsula,  
and from the "white whales" of Un-  
gava Bay, to the "fruit lands" of  
Victoria, B. C. An important insert  
contains five circular diagrams show-  
ing the comparative contributions of  
each province to field crops, commer-  
cial timber, developed water power,  
fisheries, and minerals. A sixth dia-  
gram displays the proportion of the  
total exports filled in 1918 by manu-  
factures, and by the five great classes  
of Natural Resources severally.

The thorough reliability of this map  
is shown by the caution which ignores  
probabilities, however promising. The  
trader, manufacturer, investor and  
economic student will read the map  
as an open book. It appearance is  
very timely now, when demand is ab-  
normal and enlarged production a  
necessity.
