### UPPER AND LOWER.

"Let me have sleeping accommodation on the train to Ottawa," I said to the man at the window, who didn't seem at all concerned whether I took the trip or stayed at home.

"For single passenger?" he finally said.

"No," I replied, "I'm married but I'm not taking anybody with me. A single sheet will answer."

"Upper or lower?" he asked.

"What's the difference?" I enquired.

"A difference of fifty cents," came the answer.

"Our prices to Ottawa are \$1.50 and \$2.00."

"You understand of course," exclaimed the agent, "the lower is higher than the upper. The higher price is for the lower berth. If you want it lower you'll have to go higher. We sell the upper lower than the lower. It didn't used to be so, but we found everybody wanted the lower. In other words the higher the lower."

"Why do they prefer the lower?" I broke in.

"On account of its convenience," he replied. "Most persons don't like the upper, although its lower, on account of it being higher, and because when you occupy an upper you have to get up to go to bed, and then get down when you get up. I would advise you to take the lower, although it's higher than the upper, for the reason I have stated, that the upper is lower than the lower because it is higher. You can have the lower if you pay higher; but if you are willing to pay higher it will be lower."
