NORTH LAND EXHIBIT ONE OF SIGHTS OF THE FAIR

Home and Agricultural Products from
North Impres Folk "Down
Below."

The following is the reference made last week by The Toronto Mail & Empire to the exhibits showing the North Land's agricultural possibilities:—

"The Ontario Government's exhibit showing the home and agricultural products of Northern Ontario settlers at the Canadian National Exhibition, is a remarkable object lesson, a striking illustration of what has been accomplished by thrift and energy in a new land. The display is unquestionably one of the sights of the Fair, and serves to outline to the prospective homeseeker the wonderful possibilities of this great territory, 330,000 square miles in extent and 121,000 square miles larger than the combined territory of Great Britain, France and Germany.

"Tastefully arranged in the Log Cabin building, located to the north of the Grand Stand, the visitor sees at a glance the wonderful products and minerals of this new land with an enviable reputation. Courteous officials in attendance are ever ready to explain to visitors the various and outstanding features of the exhibit. At a glance the visitor and prospective homeseeker is afforded an excellent opportunity of ascertaining first hand something of what has been done in a new territory abounding in agricultural and mineral wealth, not forgetting its immense resources in timber, un-

AMPLE FINANCES FOR THE ARGONAUT GOLD MINES

A recent statement by Mr. J. H. Rainsville, president of the Argonaut Gold Mine, says that the property is now amply financed. "The company," he says "has pulled through the hardest time that could come to any mining corporation in the last few years, and is not going to back down now. The new mill should be ready for operation during the month of December as construction will be pushed forward vigorously now that we have solved the problem of the value of the ore bodies at the 500-ft level." The Argonaut, which is located in the bush

developed water-power, us, game and scenery.

"The general layout of the exhibit is most complete, sections being allotted to settlers' and Government exhibits from the various outstanding districts—Sudbury, Algoma, Temiskaming, Muskoka, Rainy River and Thunder Bay. The richness of the fertile soil is exemplified in each exhibit. For instance, you are privileged to view vegetables of all kinds, fruits, numerous varieties of grains, honey and other products of the fields and minerals unexcelled in any part of the world. The citizens of Northern Ontario are proud of their new land, very aptly described as "a land of elbow room where the able and willing worker can make an independent home for himself and call no man master upon earth, where a man can begin with little or no capital, and soon become a prosperous settler." Many beautiful views showing the developed sections of the different districts form an attractive section of the exhibit."

about 20 miles east of Dane on the T & N. O. does not owe a cent and has no bank indebtedness. Over \$750,000 has been expended on the property since work first started and about

\$50,000 more will look after the completion of the mill. This has been fully provided for and the company will not need to carry out any further financing plans.

Every Home Needs A "Keepsweet" Herd

IT is hard to judge how much milk and cream to buy from the milkman every day.

Sometimes you buy too much and it spoils before you can use it up. Other days you run short of milk or cream just when you need it most.

You can avoid all this costly waste of milk and cream—all the annoyance of running short—by buying your milk and cream from the grocer or fruit store in Keepsweet cans instead of from the milkman in bottles.

You can buy a whole week's or month's supply at a time. You can have a Keepsweet Herd on the pantry shelf ready at all times to supply you with rich, thick cream or pure, undiluted milk.

Just open a can as you need it. Keepsweet Milk and Cream will keep sweet, fresh and pure in the unopened cans without ice or care or trouble.

It's the wonderful Keepsweet process that does it. By this process Keepsweet Milk and Cream are sterilized in a way that retains their purity, freshness and quality without condensing, evaporating, powdering or medicating—without giving that strong, cooked taste. Nothing is added and nothing is taken away by the marvelous

Keepsweet process. The food value of the milk and cream remains the same.

Open a can of Keepsweet Cream. Notice how rich and thick it is. It's not a thin, half-cream. It's more like the famous English Devonshire Cream. Taste it. You'll find Keepsweet delicious. Just the very cream you've wanted for your coffee, puddings and desserts.

Dominion Milk Corporation
Limited
