How Many Parents, who

have never given proper consideration and attention to their children's eyes, realize that five million out of twenty million children recently examined for eye trouble were in need of glasses?

Do you know that in nearly all instances where children's eyes are fitted with proper glasses in time, their eyes are so strengthened that glasses are not long needed and good future eyesight is assured?

Knowing how the proper glasses will benefit your children, if needed, you should consult us in time. Glasses made, designed and fitted.

HANDICAPS IN

life's work or its pleasures, caused by accidents or injuries, are now fast being overcome by scientific methods.

Many people, however, carry a handicap that is not the result of accident, but carelessness and neglect of the eyes. These people wonder why they feel tired or nervous and have headaches. We make, fit and design glasses to overcome such troubles.

Don't handicap your health, success or pleasures. If you need glasses our examination will show the kind you need.

There has always been so much newspaper talk of the T. & N. O. extension north of Cochrane, that newspaper items and reports that so many miles of steel have been laid, or the line completed so far, do not seem to have the full measure of actuality.
