been cut, in a small cross cut section of only 150 ft. having a combined width of 50 ft. of area. The average grade of the ore is \$12.00 per ton, top, bottom and sides. The Engineers report shows an estimated working cost on a 200 ton mill of \$5.50 per ton and on a 1,000 ton mill of \$3.50 per ton, which should leave a handsome profit from milling of ore.

### DOMES MINES PRODUCED \$353,495 DURING NOVEMBER

November gold production of Dome Mines was valued at \$353,495, as against \$382,712 in October. The mill handled 32,100 tons.

### HAD LIVED IN DISTRICT FOR TWENTY-SIX YEARS

In the last issue of The New Liskeard Speaker the following obituary notice appears:—

"On Friday last, Sarah Ann Pipp, widow of the late Marshall P. Mackenzie, Hudson Township, passed away in her seventy-fourth year. The funeral took place from Hillview, on Monday afternoon, December 4th, to New Liskeard Cemetery. Rev. Mr. France conducted services at the late residence and at the cemetery. The late Mrs. Mackenzie was born in Markham township, 18 miles from Toronto and her grandfather was a Captain whose sword is still in the possession of the family. He took part in the battle of York, now Toronto, and was only a few yards away from Sir Isaac Brock when he fell mortally wounded at the Battle of Queenstown Heights, Oct. 13th, 1812. He received a grant of land from the Crown, now the foot of Bay St., Toronto. Mrs. Mackenzie, with her late husband, was among the early pioneers of Temiskaming and came to this part of the country twenty-six years ago. There are left to mourn one son, Wellington, of Toronto, and three daughters, Mrs. E. Frisby, of New Liskeard, Mrs. W. Colman, of Toronto, and Mrs. F. Hoekley of Timmins."

The next meeting of the Caledonian Society of Timmins will be held in the I.O.O.F. Hall on Friday evening of next week, Dec. 22nd. It will be in the form of a Christmas Tree for the children, with a programme supplied by the children. A similar event last year was a huge success, and no doubt this year's Christmas Tree will be even more pleasant, as there are more children to enjoy the fun, and by enjoying themselves give pleasure to the others present.

ment will be progressively increased, but without these increases, there is definite assurance that this time next year the property will have \$8,000,000 in sight.

Active development has been confined to one claim on the west end of the property, while the balance of the property was explored by diamond drill, trenching, etc., to determine the length and width, direction and values of the main vein system. The section developed to date shows an ore reserve close on \$2,000,000, as contained in a quarter acre of ground, or for 3% of the length of the ore zone and for a depth of only 300 feet. The history of Porcupine today shows that ore has been developed to a depth of 2,000 ft. in a similar formation to that found on Night Hawk Peninsular Mines, and it is reasonable to anticipate a depth of ore to that of Porcupine Camp proper with ore shoots along the general ore zone where ore has already been located by diamond drilling, trenching etc. It will therefore be readily seen that there is in this area of 10,000 ft. by 2,000 ft., 231 parts, only one of which is developed.

On the 300 ft. level four veins have

## NIGHT HAWK PENINSULAR NOW OFFERED TO PUBLIC

One of the Most Promising and Best Conducted of the New Gold Mines.

A public offering is being made by A. E. Osler & Co., Toronto, of 300,000 treasury shares of Night Hawk Peninsular Mines, Limited, at \$1.00 per share. The capital of this Company is \$5,000,000, of which \$4,600,000 is issued, including this offering. At the completion of this financing the Company will have approximately \$600,000 cash in its treasury, ample for sufficient development, including the erection of an up-to-date mill.

During the past summer a complete new mining plant has been installed on the Night Hawk and was started in operation on Nov. 1st, so that now with a 15 drill compressor to carry development to 1,000 ft., a minimum of \$500,000 of new ore reserves are being definitely blocked out each month, and as new levels are opened the develop-
