WHERE ARE THE DISUSED ROADS IN NORTH LAND?

Writer Asks the Premier to Bank Up Suggestion Made in the Legislature.

The following letter which explains itself has been received by The Advance, as well as by other newspapers in the North Land:—

Toronto, Jan. 31, 1923.
To The Editor of The Advance, Timmins.

Dear Sir:—Yesterday in the Legislature at Queen's Park, during the addresses in the debate on the Speech from the Throne, there was made an enlightening reference to Northern Ontario by the Premier, that reflects his real conception of conditions in the North and in my opinion should not be let go disregarded by the press of the North. The Hon. Mr. Ferguson had been slashing the Government for its disregard of Northern Ontario roads stating that "Northerners were exasperated to learn that while the Government was expending forty, fifty and one hundred thousand dollars a mile on southern roads, it was almost impossible to get \$100.00 per mile for roads in the North, or even any money at all." In reply the Premier said, "The people of the North know that we have realized their conditions and requirements in the way of roads, and they know we are attending to them in a liberal and broadminded manner, etc., but we are not wasting money, as our predecessors did, in building long and useless roads in advance of settlement just to give some of our friends a job. I venture to say that I know the North Country fully as well as my learned friend from Grenville (Mr. Ferguson), and one need only go through the North Country to see miles of roads out through the bush and partly built with the trees growing up again nine or ten years old."

The press and the people of the North Country have a right to know where the Premier has wandered to, to find a single road built by the former Governments for the past thirty years that has not been required or has passed into neglect and disuse. Where are they?

The city press does not mention the remarks referred to. The North Country papers have no reporters at Queen's Park, and unless someone from the North reports such matters by chance, these and other similar misconceived references to Northern interests never see the light of day.

With the best interests of the North in view I have set out the above and am sending same to several papers of the North to use as they see fit, but request that in doing so that they will be courteous enough not to mention my name as the writer is in a position where he might be singled out for reprobation.

With very best interests at heart for the good of the whole North in its fight for its just rights and dues, I am etc.

"NORTHERNER."

DISPLAY AT RINN BROS. OF FASHIONS FOR SPRING

This week Rinn Brothers announce a display of Princess Suits and Coats on Friday and Saturday, Feb. 9th and 10th, and a special invitation is extended to all the ladies of the town and district to visit the store and inspect these final fashions for Spring. The extent and variety of the high-grade garments to be shown will be of special interest and attraction. In addition the firm is also observing the occasion by inaugurating special prices throughout the store from Feb. 9th. to Feb. 17th.

SECOND HIGH SCHOOL LEAGUE GAME TO-NIGHT

Hockey fans should make a point of attending the second match in the High School League series, Timmins vs. South Porcupine, at Timmins Rink, to-night (Wednesday) Feb. 7th. Puck faced at 7 o'clock. The last game resulted in a tie score, with both teams putting up mighty good hockey. Puck faced at 7 o'clock.

NORTH ONLY GOLD AREA TO SHOW INCREASED PRODUCTION

During the year 1922 the North Land produced gold to the value of twenty-two million dollars. This was a material increase over the production last year. On the other hand every other country in the world showed a decline in 1922 from the production of 1921. The gold output through out the world was \$315,000,000.00 for 1922. This is a new low level, according to The Engineering and Mining Journal, which quotes the figures for 1915 (\$468,724,918.00) as striking proof of the general decline. The United States production of \$101,030,700.00 in 1915 and \$50,067,307.00 in 1921 is also quoted as pointing the general world decline in gold production. This decline in production of gold is particularly noteworthy in view of the fact that gold is at present so neces-

sary for the stabilizing of the world's finances. It does not require much reasoning to reach the conclusion that with the general production of gold decreasing, the fact that Ontario's gold production is increasing to noteworthy size makes Ontario and gold mining in this Province of special world importance. Further, as the Porcupine produces the greater part of Ontario's gold output and the increase in production is most noteworthy in the Porcupine Camp, this area will more and more attract attention from the outside world. Touching on this matter in a recent issue, Arthur E. Moysey & Co.'s Market Despatch says:—"The most productive gold regions in Northern Ontario, namely, Porcupine and Kirkland Lake are relatively just as important as are the great steel centers of the United States. The production of gold at such big mines as Hollinger, Dome, McIntyre, Lake Shore, Wright-Hargreaves and Teck-Hughes, really becomes a manufacturing business in which the most modern, scientific, and efficient methods prevail. This industry, therefore, deserves the support of forward-looking capitalists as well as of the investing public. Under present conditions, gold mining in Northern Ontario is profitable, but it promises to become even more so in the years ahead."

This is not "just broker's talk." It is sound, solid, far-sighted common sense.

How They Paid off the Mortgage

They Made Assurance Doubly Sure

"I HAVE found a way," cried John enthusiastically. "I am going to take out an Endowment policy in the Mutual Life. In ten years we'll have three thousand dollars to pay off our mortgage, and this house will only have cost us a low rent in the shape of interest and premiums—nothing like so much as we paid for the apartment. And the best of it is I'll be insured all the time and if anything should happen to me, you would be all right."

And he went into details until Mary interrupted.

"See here," she said. "When you mentioned all that money we paid for the apartment, I had an idea. Why not take

out a policy for each of us? I'm sure it would cost us no more than the apartment, and it would be a good way to save money. Then if anything happened to me—you would be all right."

"Nothing is going to happen to you," John assured her. "But," he added, "it's a good idea. We'll make assurance doubly sure."

Many young couples have adopted John's plan of financing their homes in co-operation with this company. Mutual profits help pay the premiums. Would you like to learn more about our profit-participating endowment policy, which affords protection at net cost and on maturity pays you back more than you paid in? Clip this coupon, fill in the blanks and mail it to us to-day.

The MUTUAL LIFE

OF CANADA: Waterloo, Ontario.
The Company of Net Cost Life Insurance

Please send me detailed information as to the Mutual Life System of insurance at cost, particularly concerning the plan of policy I have specified.

Name.....
Street Address.....
Post Office..... Province.....
Age..... Policy Plan.....

Doubled in Four Years

	1918	1922
Insurance in Force.....	\$17,398,195.00	\$34,460,044.00
Assets.....	2,554,434.33	4,789,562.74
Surplus Funds.....	94,660.21	464,954.65

The largest gains were in 1922.

The rapid growth of the insurance in force is accompanied by a still more rapid growth of surplus, which makes this company a leader in earning dividends for policyholders.
