SHAREHOLDERS TO VISIT NIGHT HAWK PENINSULAR

Visit Will be Early Next Month.
Night Hawk Peninsular Making
Noteworthy Progress.

There is much pleasing information in the following letter recently sent out from the executive office of the company at Pittsburgh, Pa., by Mr. Jas. R. Dodworth, Chairman of the Board of the Night Hawk Peninsular Mines, Limited:—

"It gives the directors great pleasure to inform you of the steady and rapid progress being made to bring the property to production stage. Our manager hopes to have the mine operating between the 1st and 15th of October.

"Power—The transmission line has been completed and the power plant is now being operated by electrical power instead of steam.

"All the power necessary to operate the mill, as well as all other departments of the mine is now available, which will greatly reduce the cost of operation. The steam plant will be kept intact, to be used as an emergency plant, if necessary.

"Mill—The mill is being very rapidly completed. The concrete foundations for all the machinery are in, and the superstructure is rapidly going up. All the machinery, motors, timbers, tanks, etc., have been purchased and are on the ground, only a few small parts are yet to arrive.

"New Shaft—The diamond drill hole put down to establish the location for the triple compartment shaft reached a depth of 701 feet and the ore veins penetrated appear to be the same in structure and character. This being the case, the shaft will be sunk about 250 feet East of the mill, and about 800 feet East of the present shaft, and, when completed, will serve as the main source of ore supply to the mill. Until this shaft is completed, the ore to start the mill will be taken from the present shaft and the ore dump.

"Fire Danger—During June, bush fires burned within a quarter of a mile of the property and only by the vigilance and hard work of the mine staff and entire working force was fire loss averted. During the winter and early spring, Mr. Globe had the wood cutters busy clearing about 40 acres adjoining the plant, which prevented any buildings from being destroyed.

SAXOPHONE PLAYER GETS TWO YEARS FOR HOLD-UP

Arthur Hebert, a saxophone player who has been in various orchestras in the North Land during the past few years, including a time at Timmins, was sentenced last week to a two year term by Judge Hartman. Those who hate jazz must not think the sentence was for any saxophone playing. It wasn't. Hebert plays pleasantly. The sentence was on a charge of robbery, the case arising from the holding-up of a card party at Kirkland Lake on July 26th. According to his own admissions Hebert in a fancy costume, with his face masked, and a revolver in his hand, entered the club room at an early hour in the morning and at the point of the gun gathered in all the money that could be found. He made the man nearest the door collect from the others, then he searched that man himself. Hebert is understood to have only secured about \$120.00 from the hold-up, though \$600.00 and \$700.00 were freely mentioned as the proceeds previous to his capture. At the same time as the robbery a young girl disappeared from Swastika, and her father had a warrant issued for Hebert's arrest on a charge of abduction. Hebert was caught at North Bay, being taken off a sleeping car by the Provincial police. He was taken back to Kirkland Lake. He was acquitted on the abduction charge the evidence of the girl, who had been located previously at Englehart, and of others knowing the facts of the case showing that Hebert had not been guilty of abduction. On the other charge of being the hold-up artist with the gun Hebert was given preliminary trial by Magistrate Atkinson and committed for trial before the Judge. He came before Judge Hartman last week and was given the two-year term as noted above. When arrested Hebert was on his way to Ottawa. He had about seventy dollars on him, the balance of his takings having been expended for railroad fare, berth, expenses, etc.

The total loss was 70 cords of wood. The property is now 100 per cent. free from fires of this character. I might add that all the buildings and machinery are fully insured.

"Development—During the period since my last letter, underground work has been confined to the development of No. 4 vein on the 4th level, raising on No. 1 vein on 180 ft. level, raising on No. 1 vein on 300 ft. level, raising on No. 4 vein on 300 ft. level, and raising on No. 1 vein on 400 ft. level, and erecting timber chute gates in the above raises in preparation for production. No. 4 vein on the 4th level has widened out to 18 feet and has been drifted on for a length of 50 feet West and 76 feet East from No. 29 crosscut. From No. 26 crosscut by diamond drill hole, the same vein has been cut, showing well mineralized quartz. With this extension, we have an ore shoot on this level of 350 feet in length with a strong indication of greater length. This vein is averaging \$11.00 per ton in gold.

"Conclusion—Many of our stock holders have expressed a wish to visit the property and to this end a trip has been arranged, for about October 8th. The directors therefore cordially invite you to become one of the party going upon this trip, as apart from seeing your own property, you will have the opportunity of seeing other properties in the immediate neighborhood and the trip should prove highly interesting and very instructive. The expense of the entire trip would not exceed \$75.00. I should certainly be very pleased to receive a letter from you advising that you will become one of our party."

After a couple of prisoners escaped from the Cobalt lock-up the Cobalt authorities last week made arrangements to have the doors and windows of the jail re-inforced. In these days of automobiles, people may have forgotten the old proverb about "locking the stable door after the horse is stolen."

BRITISH CAPITAL NOW FAVOURABLE TO NORTH LAND

A distinct change in the attitude of English capital toward the gold fields of Northern Ontario, as compared with that of a few years ago, is reported by Mr. Gordon Taylor, of A. E. Osler & Co., who has just returned from a visit to the continent. Mr. Taylor's visit to England was for the purpose of seeking capital for the gold fields of this province and following his visit, a number of prominent mining interests have had their representatives in Canada.

In 1921, when he was in London, financial men were not interested in Canadian mines, for one reason, because they were not conversant with them and, for another, because the industrial field was attractive.

One result of his visit was that such groups as the Central Mining Investing Trust, which controls 50 per cent.

of the gold production of the Rand, have just had their chief consulting engineer go through the Porcupine field. The Anglo-French group have had their consulting engineer from South Africa in the North Land for some time past.

Mr. Taylor stated that the Ontario Government had given a great deal of publicity to these fields and had been instrumental in attracting a good deal of attention to its possibilities. However, one of the greatest difficulties which he experienced was large capitalization and a tendency to place too high a value on developed and partially developed properties.

The Northern News, of Cobalt, last week said:—"Mr. and Mrs. C. Kemsley and family of Timmins, are spending a holiday at Twin Lakes, the guests of Mr. and Mrs. R. S. Taylor."

For anything in Watches, Clocks, Silverware, Chinaware, Crown Derby, Cut Glass, Etc., it will pay you to come to
