ONTARIO TO BE WORLD'S CHIEF MINING CENTRE

Mr. H. F. Marriott Is Enthusiastic Regarding the North Land. Also Strong on Radio.

When Mr. H. F. Marriott was in the North Land recently on his world tour regarding the British Empire Council of Mining and Metallurgy, he expressed very pleasing optimism regarding the prospects of the North Land from the mining viewpoint. By the time he reached Toronto on his trip his enthusiasm had reached an even higher point. The Toronto Telegram interviewed Mr. Marriott in the city, and as a result published the following interview:—

"If Ontario is not the chief mining centre of the world within the next 10 or 15 years, as regards gold and silver, well, you will have to find something else in the world to beat them."

Hugh F. Marriott, past president of the Institute of Mining and Metallurgy, governor of the Imperial Mineral Resources Bureau and manager of the Central Mining Association of London, England, who arrived from Sudbury Friday morning, smiled at his own enthusiasm as he spoke. "Perhaps you had better put it this way," he added—"The prospects of Northern Ontario leading the world in these metals are probably brighter for the next ten or fifteen years than anywhere else in the world."

"I went out to Australia last July as scientific representative of the Pan-Pacific Congress and travelled thousands of miles, seeing everything practically there was to be seen. One little detail of my visit there is that I was chairman of the radio section of the Congress, because I see vast possibilities for the closer binding of the British Empire together by radio telephony."

"The type of amateur research in radio going on in the world today is far better than that professionally conducted," contended Mr. Marriott. "I know personally of private inventions, of things going on—well people wouldn't believe it if I were to tell them," he said. "Within less than two years' time it should be practicable to talk around the world."

"My mission here is seeing people, I have a commission from the Imperial Mission of Science and Technology to discuss a closer union with the different universities in the Dominion. Another thing, I am going around to the universities of the British Empire forming closer union with the sister institutions in the Dominion."

"Mr. Marriott emphasized the importance of saving thousands of miles travel to obtain authentic information by the mere fact of having a little radio box in the room."

"Mr. Marriott, who is here also in the interest of the first Empire Mining and Metallurgical Congress, to be held in 1924, and the formation of an Empire Council of Mining and Metallurgical Engineering Institutions, spoke also at Convocation Hall, Toronto, Friday night."

RECORDING OFFICE MAY BE OPENED AT AMOS, QUE.

Until recently gold mining was not looked upon as likely to be a specially important industry in the Province of Quebec, and so did not receive as particular attention as it might otherwise have had. Lately, however, the noteworthy finds in the Abitibi and Rouyn districts has roused great interest in gold mining in Quebec Province and the authorities are understood to be giving much thought to gold and gold mining. It is said that as a result of the interest aroused by the exploration and development work in the Abitibi and Rouyn fields there will be important amendments to the Quebec Mining Act at the next session of the Legislature of the Province, so that the requirements of the case may be met with the greatest advantage to all concerned, and the industry may be given all encouragement and assistance that may be practical. There is considerable activity expected in the two new gold areas next year and it is understood that the temporary Mining Recording office at Ville Marie will be made permanent. Also, it is understood that to give proper facilities to the gold field further north a new Mining Recording office will be opened next year at Amos, Que., to meet the demand in that district for facilities to register claims, etc.

North Bay Council recently amended the Town by-law regarding live stock and poultry being at large on the streets. According to the new section "chickens and goats" are specifically forbidden to be at large on the streets. Will not such a regulation greatly reduce traffic on North Bay streets?

MASQUERADE DANCE AT SCHUMACHER, DECEMBER 4

A Masquerade Dance is announced for the McIntyre Recreation Hall, Schumacher, on Tuesday evening, December 4th. Music will be furnished by the Blue Ribbon Orchestra. There will be ten costume prizes given. Mrs. Davis will be the hostess. Previous events under the same auspices fully justify the expectation of a pleasing and successful event next Tuesday.

INTERMEDIATE AND JUNIOR SCHEDULES TO BE ON DEC. 12

A letter this week from the Secretary of the N.O.H.A., Mr. H. P. Charlton, announces that Mr. Geo. Lake has been appointed Convenor for the Northern Intermediates (Iroquois Falls and Timmins) and the Northern Juniors (Iroquois Falls and Timmins). Schedules must be in the hands of the N.O.H.A. secretary not later than Wednesday, Dec. 12th, and Mr. Charlton concludes his letter with the words, "I trust that you will arrange suitable schedules between the above mentioned clubs, group winners to be decided by February 15th."

AN OUTSTANDING PLAY WITH A NOBLE PURPOSE

There should be special interest in the motion picture drama, "Human Wreckage" to be shown at the New Empire Theatre on Friday and Saturday of this week, Nov. 30th and Dec. 1st. This is Mrs. Wallace Reid's new play which has made so great an impression in the centres of the south. It is the effort wrung from her heart to combat the dope menace. Robbed of her husband, with two orphaned children to ask her innocent but painful questions about their absent father, who was not only their idol but the favorite of a million fans, Mrs. Reid became the implacable foe of the propagators of the vicious habit that is now obtaining a deathlike grip on the flower of American youth. Unsparring of her own sensibilities, she bared every detail of her daily heroic struggle at the bedside of her martyr husband, so that the dope ring and its agents might experience the searing ray of publicity and, like the rodents they are, be forced to scamp from cover. But the drama, "Human Wreckage," is much more than propaganda against the dope evil. It is generally hailed as a play of singular power and with a story that holds unflinching interest and attention from first to last. Moreover, the cast is a very capable one, and wherever shown "Human Wreckage" has been hailed as a play of gripping power, very effectively presented, as well as a timely and thrilling plea against an infernal traffic.

ABITIBI CO.'S GOOD WORK FOR FOREST PROTECTION

The following of general interest is from the last issue of The Illustrated Canadian Forest and Outdoors, the official journal of the Canadian Forestry Association:—

When so much of the country is depleted annually through forest fires it is gratifying to note that the Abitibi Power and Paper Company, Ltd., has had an efficient fire service in operation all Spring and Summer, and other companies will no doubt follow suit in that respect. The company's woodmen supplement the Government's fire service throughout the limits, and especially along the railroad tracks, where the danger of fire is greatest. The company's fire rangers, in fact, are under strict written orders to take their instructions from the Government rangers in case a fire breaks out and supply them with all available equipment. In such an event the two company rangers, the pumps, tanks and all other appliances would be automatically under the orders of the Government rangers in charge. Among the company's precautions against fire is a tank car with a capacity of 7,000 gallons and 2,000 feet of hose. There is also a pump with a capacity of 55 gallons per minute that goes along the line up and down on each trip. Two additional pumps and hose can be loaded on a speeder and sent to any place on the line. From a lookout tower fifty feet high, situated on the top of a rocky hill, a view can be secured of the surrounding country in every direction for a distance of twenty miles. A pair of the very finest field glasses is at this point for the use of the rangers. Both of the company's rangers carry chemical fire extinguishers on their cars. Large signs in French and English at various points warn sojourners of the dangers of fire and how to avoid such a contingency.

Visitor: (from city) "Don't you think this radio broadcasting is a great invention?"
Farmer: "Not so much. We've had a party line for years."
