13-15 63 Sparks St., Ottawa, Ont.

Mr. W. E. Simpson, of Swastika, director of the Cassel Cyanide Company of Canada, Limited, and representative of London interests in search of mining property in Northern Ontario, will sail on Saturday for England for a conference with principals. Mr. Simpson will remain in Europe until the middle of June.

99.8 OF POPULATION OF COCHRANE VACCINATED

Smallpox Situation Now Said to be Definitely Cleared Up.

From the general reports from Cochrane it would appear that the smallpox situation is cleaned up now. Of course, there are the usual tall yarns told about the situation in Cochrane. None of them are really worth contradicting, nor is there much use in contradicting them. Possibly the best way to treat them is to make this statement: That, in view of the difficulties and troubles so bravely met by Cochrane in the last year or two, it is a pretty mean trick now to lie about the Town, or to state hurtful things about Cochrane without being absolutely sure they are true. The truth of the smallpox situation in Cochrane will not be very injurious to the Town. Financially, the matter has been a serious one for Cochrane, but it is likely that Cochrane will rise again victorious after this trouble just as the town has triumphed over all the disasters striking it in past years.

In the last issue of The Northland Post, of Cochrane, under the official Board of Health heading, the following paragraphs appear relative to the smallpox situation:—

"It looks as if the smallpox situation was cleaned up now. There have been no new cases and two of the early cases are leaving the isolation hospital probably tomorrow. The universal vaccination in town has been a strong factor to protect the town, and it is estimated that over 99.8% of the entire population has been vaccinated.

Miss Halley and Miss Healy, Provincial Nurses, who have been here this week, are both leaving tomorrow after having completed the census of the town with regard to vaccination, and they feel well satisfied with the outcome.

"The clinics at the Town Hall have been crowded every day showing the co-operation of the public.

"Congratulations have been received by the local Board of Health for the way in which the danger has been overcome, and further danger averted through the vaccination of almost the entire population."

BANKS NOT OPEN AFTER SUPPER ON PAY NIGHTS

Thursday last was the first Pay Day on which the banks used the new plan of closing at 6 p.m., instead of keeping open after supper as in the past on pay nights. The new plan was announced several weeks ago and kept well before public attention, so as to cause the minimum of inconvenience. Apparently the new plan works all right, as no complaints are heard. The public have until 6 p.m. to do banking business on Pay Days, and this seems to give practically all the convenience desired in this line. On the other hand, closing at 6 p.m. means a great deal to the bank staffs, relieving the staffs from burdensome hours on Pay Days.

ANSONVILLE POSTMASTER NOW ILL WITH SMALLPOX

According to information coming to The Advance to-day the Postmaster at Ansonville, (The Wye), near Iroquois Falls, is ill with smallpox. Ansonville is taking precautions to prevent the possible spread of the disease. Iroquois Falls commenced preventive measures some weeks ago when smallpox developed in Cochrane. This week these precautions have been emphasized in Iroquois Falls. There is free vaccination for all, and all are urged to take advantage of this and in other ways to assist in guarding against any spread of the disease to the Paper Town. There has been general vaccination in Iroquois Falls recently and if there is any sign of smallpox getting into the town itself compulsory measures will be taken in regard to vaccination and other safeguards.

MUSICAL EVENING AT CALEDONIANS ON FRIDAY

On the syllabus, the regular meeting of the Caledonian Society of Timmins to be held in the L.O.O.F. Hall on Friday evening of this week, March 28th, is to be "Musical Evening." The programme will be in charge of Mr. Jas. Geffs, which is assurance that it will be one of outstanding merit. There will be vocal solos, duets, quartettes and choir numbers likely as well as fine instrumental numbers. All Scots and Scots-women and their friends will always find a welcome at the Caledonian Society meetings, and Friday evening's programme promises to be especially attractive. In addition to the musical numbers there will be the usual dancing, with Old Land dances favoured, as well as the regular tasty line of pleasing refreshments.

ASTHMA USE RAZ-MAH

No Smoking—No Spraying—No Snuff Just Swallow a Capsule

Restores normal breathing, stops mucus gatherings in the bronchial tubes, gives long nights of quiet sleep; contains no habit-forming drug. \$1.00 at your druggists. Send 4c in stamps for a generous sample. Templetons, 142 King West, Toronto.

RAZ-MAH GUARANTEED RELIEF

RYAN, MURRAY DRUG CO., LTD. Reed Block Timmins, Ont.

TIMMINS NOTES

Born—At their apartments, Gordon Block, Timmins, on Monday, March 24th, 1924, to Mr. and Mrs. B. D. Kelly,—a son.

Mrs. Robt. Dye and daughter, Jeanette Helen, left on Monday for a visit to Mrs. R. E. Sullivan, Kirkland Lake.

Band Leader F. J. Wolno is making the best sort of recovery at the Hospital after his recent operation, and it is expected he will be out again this week.

GOOD OLD GREYHOUNDS STILL IN WINNING LINE

By defeating the Sons of Ireland 3-0 on Saturday and '3-2 Monday evening the Sault Ste. Marie Greyhounds won the round with the Eastern Champions 6-2. They have only the Western Champions to overcome now to gain the highest honours, and here's hoping! The Sault have certainly given high hockey honour to the North Land by their fine sportsmanship and good hockey and the whole North Land is cheering them and backing them to win the cup and the final championship for this year. The games will be played on Thursday and Saturday of this week.

NEW ADDITION FOR THE SCHUMACHER PUBLIC SCHOOL

School trustees of S.S. No. 2, Township of Tisdale, met Tuesday evening last to study completion plans submitted for new addition to Public School in Schumacher.

The plans submitted by A. H. Cederberg were accepted and tenders on the construction of the new addition will shortly be called for.

A. H. Cederberg is also at the present preparing plans and specifications for a new store building, etc., for Messrs. L'Euyer & Smith, the well-known plumbing and heating firm in Timmins.

Plans and specifications for an office building for the Canadel Gold, Limited are also being prepared by the same architect.

SOME PEOPLE NOT PLAYING THE GAME SQUARELY

Some months ago a few cases of measles, developed into a regular epidemic of the disease in Timmins, largely because a number of people would not play the game fairly. Children, whose parents knew the youngsters had the disease or had been exposed to the disease, were sent to school or allowed to mingle with other unaffected children, thus making opportunity for the spread of the disease. Quarantine was not properly observed, and in many cases there was a mean disregard shown for the safeguarding of others. At present there are several cases of scarletina in town and the same sort of situation may develop as caused the measles epidemic. Some flagrant cases of disregard for the safeguarding of the general public health are reported, and whether these are true or not, it is a fact that there are many people who are not trying to protect others as much as they might, to put it mildly. The Health authorities have done their best to minimize danger of epidemics, but the co-operation of the public is necessary, absolutely so. Play the game! Give others the best deal! It is the only way for good fellows and good citizens to act.

Many accidents are caused by sending the body out to work and the mind out to play.

As in mechanics and economics, so in human relations, every action is followed by an equal and opposite reaction.

Every day a fresh beginning. Listen, my soul, to the glad refrain and, spite of old sorrow and older sinning, take heart of the day and begin again.—Susan Collidge.

The measure of a great man is not how much money he has made, nor how high he climbs on the social ladder, but how great are the benefits he has brought to humanity.

ANNUAL MEETING OF THE TIMMINS TENNIS CLUB

To be Held in Town Hall on Monday Evening, April 7th. Big Membership Desired.

The annual meeting of the Timmins Tennis Club will be held in the Town Hall on Monday evening, April 7th, at 8 p.m. At this meeting the officers will be elected for the ensuing season and plans made for a big year for tennis in Timmins. A big membership is desired for the ensuing year. There should be at least 50 active members to make the Club the success it may easily be. Past seasons have been successful ones in Timmins for tennis and 1924 should be the best yet. All interested in tennis should turn out for the annual meeting in the Town Hall on Monday evening, April 7th.

"Young man, can I get into the park through that gate?"

"I guess so, lady, I just saw a load of hay go through."

"But, Billy, if I married you with your income, you couldn't even dress me."

"Well, with a few lessons I could learn."

Poker—"Won't your wife miss you?"

Chip—"No, she's a pretty fair shot."

"Are you in favor of clubs for women?" asked the female with the square chin.

"Sure," answered the old bachelor; "clubs, sandbags, or any old thing."—Chicago News.

"I suppose, Henry," said the old gentleman to his new son-in-law, "that you are aware the check for fifty thousand dollars I put among your wedding presents was merely for effect."

"Oh, yes, sir," responded the cheerful Henry, "and the effect was excellent. The bank cashed it this morning without a word."—Vanity Fair.

MADE IN CANADA BY CANADIANS—FOR CANADIANS

The Fuller Wonder Mop is but one of the 45 famous Fuller Brushes "made in Canada" that are making housework lighter in thousands of Canadian homes.

You'll say it's a wonder after you have used it, for it's soft, fluffy, dust-absorbing strands seem to gather the dust like magic and hold it until you are ready to shake it out! It's rightly named, the

FULLER WONDER MOP

Ask the Fuller man to show you this Wonder Mop when you are ready to shake it out! Better still, write or phone him when he calls at your home. You will be at home.

GOOD ATTENDANCE AT PROSPECTORS' CLASSES

Classes Opened on Friday Last With Attendance of About Half a Hundred.

Dr. W. L. Goodwin came to town last week to conduct the annual Prospectors' Classes here, the opening class being on Friday. There was a large attendance for the opening, and interest continues and increases. An encouraging feature is the fact that many attending this year's classes were also in the classes in previous years. Evidently there is found such value in the classes that those attending find it well worth their while to return each succeeding year.

The classes continue all through this week. Among the branches of study are:—"Practical study of minerals and rocks," "Practice in spotting minerals and rocks, etc." There are also illustrated lectures on the

Elements of Geology, etc. One of the specially helpful features of the course is the readiness of Dr. Goodwin to answer questions or discuss any of the many points that come up in prospecting work. Prospectors in this district are generally agreed that the classes are particularly helpful and decidedly well worth while.

She—"I'm not myself tonight." Brute—"Then we ought to have a good time."

Lawyer—"Well, what shall we ask for—trial by judge or jury?"

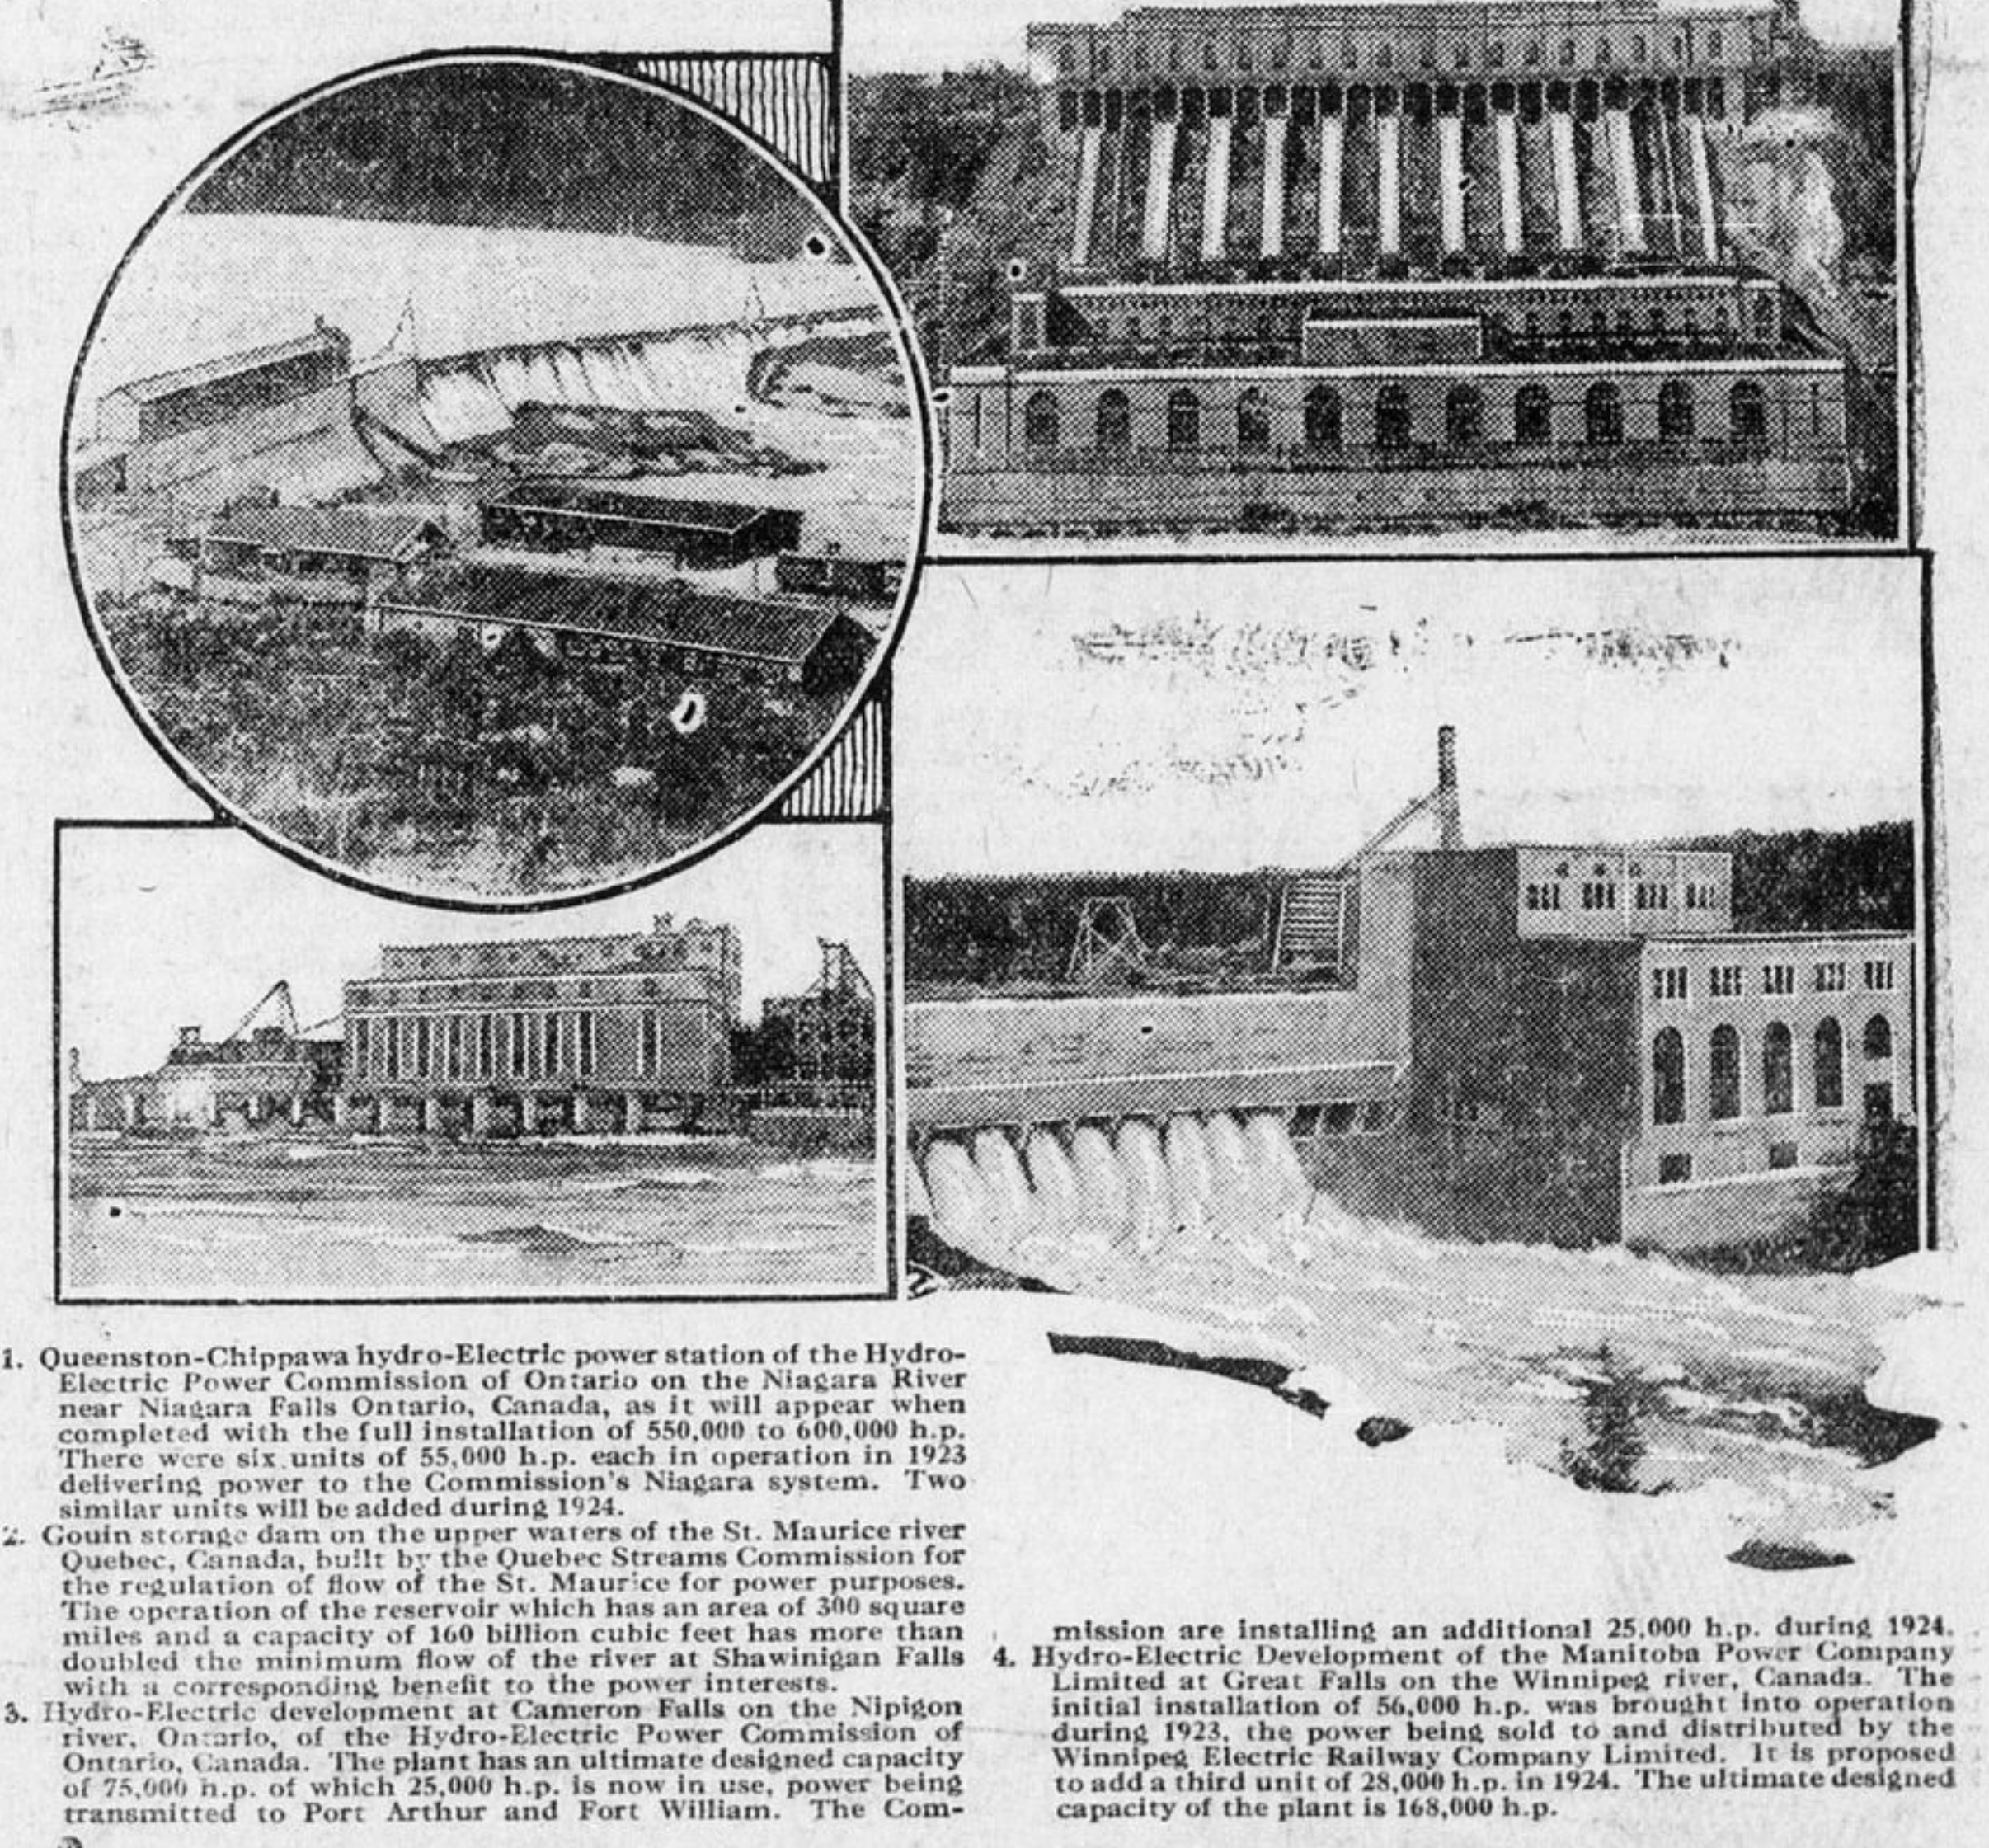

Client—"Take the judge, Doc. I've done plumbing for nearly everybody in this town."

First Radio Bug—When I get tuned up I can get WLJAZ.

Second Radio Bug—When I get tuned up I can get WJAZ.

Third Ditto—That's nothing; last night I came home all tuned up with H-O-O-C-H and got H. E. Double L.—Whiz Bang.

Canada's Part in Power Conference

Canada will play an important part in the first World Power Conference that is to be held in London, England, from June 30th to July 12th, and this because after the United States, she possesses greater potential water powers than any other country and because in point of per capita production of electric power she stands almost at the head of all nations, her production, in this respect being three times greater than that of the United States.

This is rapidly becoming the electric age, a fact which the impending Conference, which is being held under the auspices of the British Electrical and Allied Manufacturers Association in co-operation with several of the most technical, scientific and industrial institutions throughout the World, emphasizes greatly. The Canadian committee consists of the leading members of the electrical engineering profession with Dr. Charles Cammell, deputy Minister of Mines as chairman.

So far as Canada is concerned the hydro-electric development is a twentieth century development. A quarter of a century ago there was very little hydro-electric development in Canada. In 1910 the turbine installation of water power plants in Canada was but 985,000 h.p.; in 1915 it was 2,075,000 h.p.; in 1920 it was 2,483,000 h.p.; in 1923 it was 3,228,000 h.p. Next year it is expected to be 4,000,000 h.p., the indications being that 5,000,000 h.p. will be reached by 1930.

Canada is very fortunate in that her large water powers are located comparatively close to the centres of her industrial life. When it comes to ability to use her water powers she is immeasurably better off than the United States, 70 per cent of the latter being in the Western States, remote from industrial centres. Within a radius of 300 miles of the Long Sault rapids on the St. Lawrence river, there are available water powers exceeding 9,000,000 horse power. As it is through the development of water power that other operations are made cheaper, capital for it can be more readily secured, and it is for this reason that the power producing industry has progressed more rapidly than any other in Canada during the past few years.

Briefly, the objects of the Power Conference are to consider how the industrial and scientific sources of power may be adjusted nationally and internationally; by considering the potential resources of each country in hydro-electric power, oil and minerals, by comparing experiences in the development of scientific agriculture, irrigation and transportation by land water and air; by conferences of civil, mechanical, marine and mining engineers; by consultation of the consumers of power, and the manufacturers of the instruments of production, by discussion on the financial and economic phases of the industry, by conference on the possibility of establishing a permanent World Bureau for the collection of data, the preparation of inventories of the world's resources and the exchange of industrial and scientific information through the representatives of the various countries.

It will be seen then, that the Dominion's part in the Conference cannot be a small one and that through the dissemination of knowledge of her resources she stands to gain considerably. It is interesting to note in this connection that for every new power scheme which calls for large investment, the money comes chiefly from abroad. Indeed it is probably that since 1918 several hundreds of millions of dollars have been secured in this way and it is impossible to overestimate the importance of water-power development as a means of attracting capital to Canada.

1. Queenston-Chippawa hydro-Electric power station of the Hydro-Electric Power Commission of Ontario on the Niagara River near Niagara Falls Ontario, Canada, as it will appear when completed with the full installation of 550,000 to 600,000 h.p. There were six units of 55,000 h.p. each in operation in 1923 delivering power to the Commission's Niagara system. Two similar units will be added during 1924.
2. Gouin storage dam on the upper waters of the St. Maurice river Quebec, Canada, built by the Quebec Streams Commission for the regulation of flow of the river at Shawinigan Falls with a corresponding benefit to the power interests.
3. Hydro-Electric development at Cameron Falls on the Nipigon river, Ontario, of the Hydro-Electric Power Commission of Ontario, Canada. The plant has an ultimate designed capacity of 75,000 h.p. of which 25,000 h.p. is now in use, power being transmitted to Port Arthur and Fort William. The Commission are installing an additional 25,000 h.p. during 1924.
4. Hydro-Electric Development of the Manitoba Power Company Limited at Great Falls on the Winnipeg river, Canada. The initial installation of 56,000 h.p. was brought into operation during 1923, the power being sold to and distributed by the Winnipeg Electric Railway Company Limited. It is proposed to add a third unit of 28,000 h.p. in 1924. The ultimate designed capacity of the plant is 168,000 h.p.
