THE GROWING OF ALFALFA IN NORTHERN ONTARIO

Drainage One of First Essentials. Use of Culture on Seed Important Other Helpful Points.

Mr. J. P. S. Ballantyne, Superintendent of the Dominion Experimental Station at Kapuskasing, sends The Advance the following very interesting article which will undoubtedly prove of value to settlers in the district:—

Of all the legume crops that are grown in Northern Ontario none has given such out-standing results as alfalfa. It is only within the past few years that the successful growing of this crop in Northern Ontario has been seriously considered, but the results obtained during the past four years at Kapuskasing have proved that alfalfa can be successfully grown and the seed matured.

In the growing of alfalfa one of the first essentials to be considered is drainage. If good naturally drained soils cannot be located on the farm, then under-drains should be installed. The first seeding of alfalfa at Kapuskasing was on practically virgin, naturally drained soil which had been broken, sown to a crop of fall wheat, fall ploughed, and treated with two tons of ground limestone per acre in the spring, after which the alfalfa seed was sown broadcast, and in rows twelve inches apart, with and without nurse crops. The seed was inoculated and twenty pounds per acre was used for seeding. This was heavy, but as there was no alfalfa bacteria in the soil, the amount sown was not too much.

It is very important that culture be used on the seed, and the farmers of Northern Ontario who are considering the growing of alfalfa will be well advised to procure sufficient culture for treating their seed. This can be obtained free of charge from Dominion Chemist, Experimental Farm, Ottawa.

In seeding alfalfa with a nurse crop, barley will be found one of the best, although oats may be used, but the latter should be cut before they mature in order to give the alfalfa plants a chance to develop before winter.

The following figures will show how successfully this legume has been able to establish itself at this Station. In 1921 the yield from one acre was 1790 pounds and on the same land in 1923 the yield was 3 tons 407 pounds. The yield of alfalfa sown without nurse crop was 2 tons 1,054 pounds, in 1921 and in 1923 the yield was 3 tons 676 pounds. The yields shown above show us that alfalfa is not at its best until the third year. The farmers of Northern Ontario would be well advised in sowing at least one acre of alfalfa in 1924. If loss is feared in trying out alfalfa for the first time, 6 pounds of Canadian-grown seed may be sown with the regular hay mixture. All that is risked in this way is the price of the seed.

"The Least Noise or Excitement Made Me Tremble," says Mrs. Beaulieu

Never before in the world's history have there been so many cases of nervous collapse, with "jumpy" nerves, accompanied by fits of depression, as since the Great War. This condition applies not only to men and women but to children. These run-down conditions affect every part of the human system, bringing indigestion, headaches, weakness, insomnia, anemia and finally, if not checked, that most insidious and dreaded disease, consumption. To protect the system, there is only one thing to do, tone and build up the body with Carnol. Carnol helped Mrs. Beaulieu She says:

"I don't know how to express my gratitude to you for all that Carnol has done for me. I was terribly depressed. I had no appetite. The least exertion tired me. I couldn't sleep. The slightest noise or excitement made me tremble. My nerves were 'jumpy'. I was losing weight. Finally I consulted my doctor and he told me that I was completely run down and I needed a tonic. 'The best tonic for your case,' said he, 'is Carnol.' I took Carnol for a month and I feel so well today that it is hard to realize that six weeks ago I was in such poor health."—Mrs. Frs. Beaulieu, Rivière du Loup. 39

VISITORS' NIGHT AT THE A.S.D. CLUB LAST WEEK

Visitors' Night at the A.S.D. Club last Wednesday evening drew a large crowd and proved one of the most enjoyable evenings of the winter's schedule at the Club. A number of the young married people of the town had been invited to be present, for the occasion. This was the first Visitors' Night held by the Club since it was founded three years ago, and the success attending the dance last Wednesday augurs well for it being an annual or semi-annual affair.

The music for the dancing was provided by "Scotty" Wilson, piano, Frank Rodger, saxophone, C. E. McDonald, drums, F. Wolno and Ted Whaley, violins. E. Conn played a selection on the guitar for a waltz. The music rendered by these musicians was one of the reasons why the evening was the success it was.

Among the features for the evening was a Lucky Number dance, Miss Rita Sims and Mr. J. Jackson winning the prizes for this number. A whistling solo by Mr. Wm. Andrews was another enjoyable feature of the programme. Miss Leone McIntosh contributed a solo, "Dream Daddy," which was much enjoyed.

The refreshments served by the young lady members of the Club were as usual an enjoyable part of the evening's programme, and were up to the high standard set at previous Club gatherings.

The meeting this evening, owing to the Vimy Ridge Banquet at South Porcupine, will be the usual Cards and Dancing. On April 16th it is intended to hold another Bridge Party, these events having proved a success for previous meetings. On April 23rd the annual Juvenile Party will be held, and the last meeting of the month will be a Novelty Masquerade Party.

PLAN AIRSHIP SERVICE BETWEEN N. Y. AND NORTH

Project Under Consideration to Make Rapid Transit Between Big Centres and Mining Areas.

During the late unarmament war, The Advance repeatedly suggested that if there was one particular field where the airship appeared to have special possibilities and usefulness it was in this great North Land with its immense distances to be travelled. After the war, the Laurentide Air Service proved of great advantage in the far North, and recently the same company has arranged to operate a flying boat service from Angliers on the C.P.R. to the Quebec Mining field. Large flying boats, to carry five passengers, will meet all C.P.R. trains at Angliers. Now along come despatches that say that a plan is at present under way to establish aerial transportation service between New York City and the mining fields of Ontario and Quebec. The promoter is quoted as saying:—"I believe the proposed aerial line, properly financed and fully equipped, with proven pilots, in a manner that would guarantee safety to the passengers, will not only meet a general demand in that vast mining field, but will also prove to be an exceedingly profitable undertaking." It is generally believed that a considerable volume of passenger traffic would appear to be assured from the very outset. The project is said to be favourably received by the directors and officials of mining companies operating in the North. Further word in regard to the proposed plans will be awaited with interest.

PRODUCTION OF DOME MINES FOR THE MONTH OF MARCH

Dome Mines made a good showing in the month of March. The production in March was \$355,645.00, as against \$349,299.00 in February and \$326,420.00 in January of this year. It will be noted that Dome production has shown a notable increase this year from month to month. The increase over the same period last year is even more marked, March of last year having a production of only \$259,866.00.

NOTICE

NOTICE is hereby given that a By-Law was passed by the Council of the Corporation of the Town of Timmins on the 24th day of March, 1924, providing for the borrowing of Forty Thousand Dollars upon debentures to pay for the erection of a new addition to the existing Central Public School in the said Town and that such By-Law was registered in the Registry Office of Land Titles, Haileybury in the District of Cochrane, on the 26th day of March, 1924.

Any motion to quash or set aside the same or any part thereof must be made within three months after the first publication of this notice and cannot be made thereafter.

Dated this 2nd day of April, A.D., 1924.

H. E. MONTGOMERY, Town Clerk.

CALL AND BE CONVINCED

\$200 to \$400 Saved on this Studebaker Light-Six

Here is a car priced at \$1,465 which, built by ordinary methods, would cost you from \$200 to \$400 more.

It is in scores of ways the leader of its class. No rival car compares in the value that it offers.

It is built by the largest maker of fine cars in the world. By a maker who builds 150,000 quality cars per year. So such major costs as engineering, overhead, dies, etc., are divided by 150,000.

It is built in a model plant, with up-to-date machinery. And the savings go to you in values none can match.

Some extra values

Same steels as we use in the costliest cars we build. On some we pay 15% premium to makers to get them exactly right.

Designed and built under an engineering department which costs \$500,000 yearly.

Each car gets 32,000 tests and inspections in the making.

The bodies are beautiful creations. The finish and coach work show the final touch.

More Timken bearings than any competitive car within \$1,500 of its price.

Genuine leather cushions, ten inches deep. Unusual equipment.

Crankshafts machined on all surfaces as was done in the Liberty Airplane Motors. This to insure perfect balance.

25,000-mile audited tests made on 329 cars show lower operating cost by 11.4% than the average of its rivals.

72-year traditions

Built by a maker whose name for 72 years has stood for quality and class. Whose assets of \$90,000,000 are staked on serving you better than others. Whose model factories costing \$50,000,000 have been mostly built in the past five years. By Studebaker, for whose cars last year 145,167 people paid \$201,000,000. Whose sales have almost trebled in three years.

Come see what this Light-Six offers. See its many extra values, its beauty, its comfort, its luxury.

Do that and you will choose this car if you have in mind anywhere near this price.
