**NEW TOWNSITE BEING  
 OPENED NEAR SCHUMACHER**

This week's formal announcement is made of the opening of a new townsite, just east of Schumacher, on the property of the Gold Centre Mining Co. The new townsite is very favourably located being a short distance from Schumacher and near to the McIntyre, the Schumacher and other mining properties. The new townsite is on the south of the T. & N.O. Railway at Schumacher. It comprises sixty lots, 40 by 100 feet. It is the intention to apply for a flag station for the new townsite.

**CLOSE TO TWENTY CASES  
 FOR THIS WEEK'S COURT**

There are about a score of cases for police court tomorrow, though most of the cases are not serious affairs. There are seven simple and unadorned drunks, one of them a woman. In addition there are three charged with being drunk in a public place. One man is charged with charge of having liquor in a public place. One man is charged with driving a motor truck without the necessary license. The alleged theft of a dog forms the basis for another case. Three charges of having cows at large on the streets will come before Magistrate Atkinson. A young man named Brown, who has lived here for some time, is charged with illegally having gold ore in his possession.

**UP-TO-DATE DRY CLEANING  
 PLANT FOR TIMMINS.**

Mr. T. F. King, has just about completed a plant that will be just as up-to-date as any Dry Cleaning establishment in any city. In two new buildings on Spruce street, in the Moneta extension adjoining the town, part of the machinery is already installed and the balance is now being assembled. Mr. King has engaged an expert Dry Cleaner and expects to have everything completed and working about the fifteenth. Besides the Dry Cleaning machinery there are also new Hoffman Presses in which dry steam is used in pressing, which put a real finishing touch to the garments. This will be a great convenience to the people of Timmins and, in fact, the whole North Country, as at the present time any work along these lines has to be sent to some city. 37

**ASSOCIATED BOARDS TO  
 MEET AT IROQUOIS FALLS**

The Associated Boards of Trade will hold their next regular quarterly session at Iroquois Falls either this month or next. There are a number of resolutions to come before the meeting. Among those sent in by Timmins Board of Trade is one asking the Government to take up the Power question in this North Land. The resolution refers to the rumoured merger of the power interests, to the vital importance of power to the industries of the country, the need for power at the lowest possible rate and the necessity for safeguarding industries and people against possible monopolies. The resolution concludes with the request that legislation be presented and enacted to enable the development and distribution of all water power in New Ontario by the public at cost and to prevent any further development of power by private enterprise. Another resolution from Timmins Board asks the Government to consider the British Columbia plan for primary education by correspondence courses. It is urged that such a plan, if practical, would provide education for hundreds of children of the settlers who are now deprived of schooling. The plan has been in successful use in British Columbia for five years and has also been adopted by Alberta.

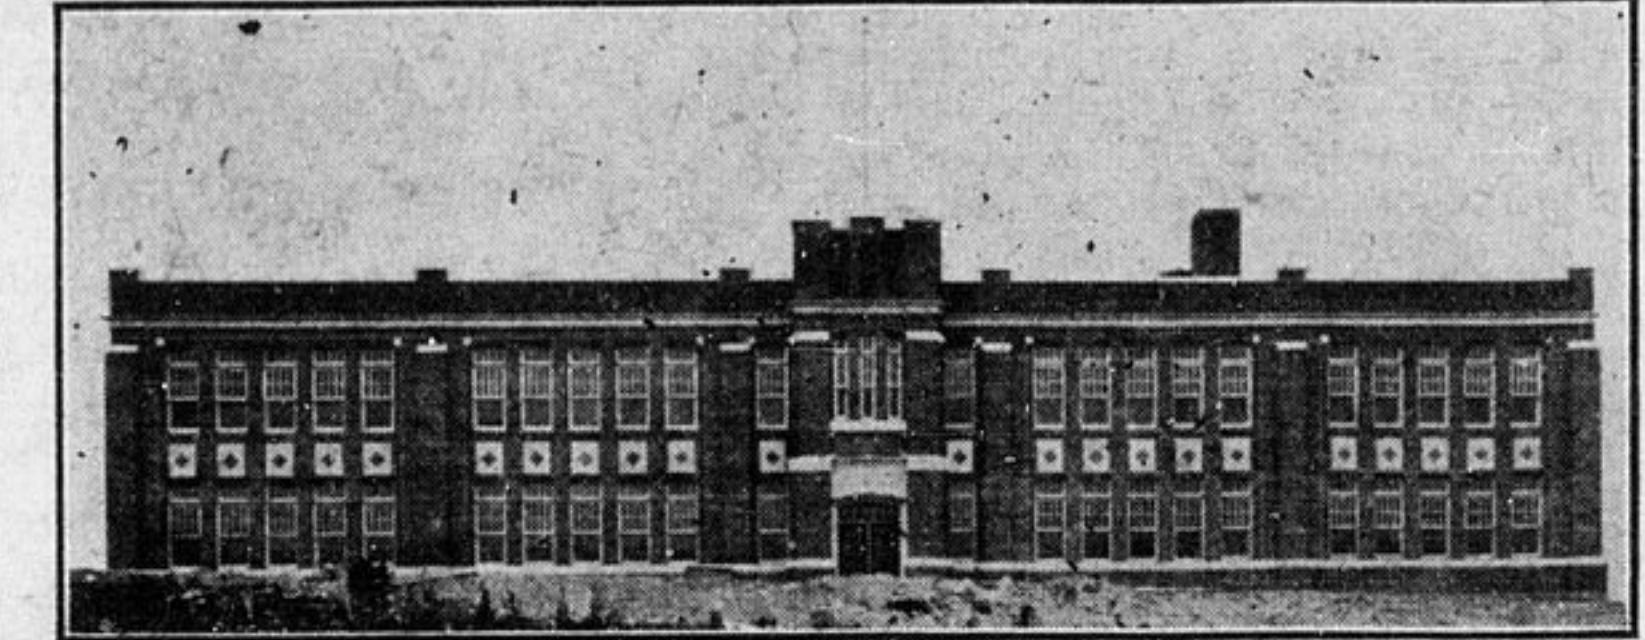

This year, for the second time, a number of the names of married women were left off the Cobalt Voters' List, and there was considerable objection, perhaps, especially because of the approaching Provincial vote on the O.P.A. By order of the Town Council the assessor was ordered to prepare another list to include the names omitted and to submit this list to the District Judge for approval to remedy the matter.

**A Fine Appearing Building  
 And As Fine As It Appears**

TIMMINS NEW HIGH SCHOOL A CREDITABLE STRUCTURE, FIRE PROOF, COMMODIOUS, WELL-EQUIPPED, AND ATTRACTIVE. SIX BIG CLASSROOMS, SCIENCE AND CHEMISTRY ROOMS, WELL-APPOINTED GYMNASIUM, SHOWER AND SPRAY BATHS, ETC.

Situated on an elevation of ground in what is generally known as West Timmins, the new high school can be seen from a considerable distance and from many sections of the town. Its appearance is particularly attractive and artistic, and its accommodation, arrangement and equipment equal its prepossessing appearance. The accompanying picture gives some idea of the fine appearance of the new High School building, but to be fully appreciated the structure has to be seen and inspected. During their recent visit to Timmins Baron Byng and Lady Byng both expressed special pleasure at the handsome appearance and finished equipment of the new High School.

A two-storey structure of brick and tile, as nearly fire-proof as can be made, the school has a length of approximately 150 feet. There are ample grounds for the school, the equivalent of two blocks being reserved for the building and grounds. Upstairs and down, wide, high corridors run the whole length of the structure; the various rooms opening off the corridors. There are three entrances, a main entrance in the centre of the front, the boys' entrance at the one end, and the girls' entrance at the other. There are six big class rooms, approximately 36 feet by 22 feet each and with 14-foot ceilings that give a pleasing spaciousness to the rooms. In addition, the building contains a special Physics Laboratory, a Chemistry Room, a Gymnasium, a Library, Teacher's Rooms, Cloak Rooms for both boys and girls,

Lavatories, Baths (spray baths for both boys and girls), and all the rest of a modern school equipment and accommodation. The Chemistry Room and Physics Laboratory are specially well-equipped. Benches, tables, lockers, cabinets and other equipment have been provided in up-to-date style. A closed cabinet for use in making any noxious gases required in the experiments is a feature of the Chemistry Room. The equipment of the Physics Dept. includes a lantern of the latest type. To most visitors the big gymnasium, with its complete and up-to-date equipment, will be of special interest. Among the equipment will be found—the ladders, the trapeze, the parallel bars, the swinging rings, dumbs, Indian clubs, etc. There has also been provision made for the playing of basketball and softball. Healthful and wholesome exercise for the students has been well considered.

The library in one of the turrets of the building is provided with a goodly array of the classics and works of reference for the students. The equipment of the various classrooms is of the very best. Modern desks and seats are both comfortable and convenient. The blackboards are of the best quality of genuine slate. There is an electric bell to call school recess and dismissal. An electrical clock in each room keeps time, with emphasis on the special times, such as the opening and closing of classes during the day. Every room is provided with a special thermometer registering the exact temperature of the room. Drinking fountain and other comforts and conveniences for the students have been generously provided. At suitable places in the corridors there are supplies of hose and other fire prevention equipment for use in case of any danger of fire.

The interior finish of the building is both attractive in appearance and serviceable. The building is heated by a steam heat equipment, the plant being located in a cement basement with ample provision for the storing of a supply of coal. A first-class ventilation system is installed, a hot air fan, fresh air distributor and other equipment practically assuring healthy air at proper temperature at all times. There is every reason for pride in the new High School. It is a credit to the town, the High School Board, the contractors and all others concerned. Messrs. Shultz Bros., of Brantford, were the contractors. The plumbing and heating work was done by the old reliable firm of A. Brazeau & Son, Timmins. Mr. E. M. Allworth was the electrical contractor. Mr. F. Valois carried through the painting and decorating throughout. The architects were Pennington & Boyd, of Windsor, Ont., and the finished structure is a lasting tribute to their skill and design.

**ARRESTED WHILE MOVING  
 TO NEW QUARTERS AT NIGHT**

Monday evening W. R. H. Brown, a young fellow who has been in town for some time past, was placed under arrest on a charge of illegally having gold ore in his possession. The manner in which the arrest occurred was rather odd. Brown had been living in one shack in Mattagami and decided to move to another. He selected a rather late hour for his moving and he also cut through lots that were in deep darkness. Carrying a couple of suitcases and a bundle he walked right into the arms of Chief Greer and Deputy Chief Salley who were not looking for him but were out on altogether different business. Brown's explanation for moving in such a way and at such a time did not impress the police very much. The Chief also was curious as to what some of the bags and bundles might contain. Accordingly Brown was escorted to the shack that he said was his new home, and there a quantity of gold ore was discovered among his effects. His explanation of how he came into possession of this gold ore was not satisfactory to the police and as a result he was asked to spend the night at the Hotel de Greer. Brown will come before Magistrate Atkinson tomorrow (Thursday) on a charge of being illegally in possession of gold ore.

An item in Saturday's Toronto Star said that at the request of County Crown Attorney John M. Greer, of Cochrane, a Toronto detective last week took in charge Mr. Max Levine at a down town hotel in the city. The accused was taken back to Cochrane, according to The Star item, to answer to a charge of fraud.

 CHECKS CHILLS & CRAMPS

**THE WEATHER HANDICAPS  
 CROPS IN THE DISTRICT**

Hay a Fair Crop. Peas and Beans Good. Roots Fairly Good. Blueberries a Big Crop.

Settlers and others interested in the district appear to agree that this year's crops in this area will not be as good as usual. The weather has not been propitious. The hay crop, now harvested, has not been bad, but it would have been better with better weather. Grain has been good for a green crop, but naturally has been slow ripening on account of the weather.

Roots have been fairly good. Anything that will stand the cold weather shows up well. Peas and beans have been very good crops. Beets have been unusually good. Cabbage and Turnips have been good crops this year. Potatoes in sandy loam have been below the average crop for this district; in low-lying land the potato crop has been a failure.

Some damage has been done by recent frosts. For instance, last week many of the settlers had their tomato crop frozen out of existence. Some vegetable marrows of unusual size and quality are reported from up the river, but these were protected by blankets at night.

The native fruits this year supported a popular theory that when blueberries are a big crop the raspberries are poor. Blueberries this year were a bountiful crop, while the raspberries were neither plentiful nor of quality to write home about.

Mr. M. Wernick, District Manager for the Toledo Scale Co., returned last week to his home at North Bay after being laid up here for some ten days as a result of an injury to his back. In lifting a set of scales he wrenched his back and was laid up as a consequence. It will be two or three weeks before he will be fully recovered.

**POLICE DOG PUPPIES
