RED ROSE TEA "is good tea"

And most grocers recommend it.

TWO SPECIAL COMEDIES AT OLD EMPIRE THEATRE.

Two special comedies are slated for the Old Empire Theatre next week. On Monday and Tuesday, Feb. 2nd and 3rd, "Second Youth," described as a humorous classic, will be the feature. Walter Catlett and Alfred Lunt are supported by a clever cast in this side-splitter.

On Friday and Saturday, February 6th and 7th, Larry Semon will appear in "The Girl in the Limousine." This is the first seven-reel comedy to star Larry. Usually, he has featured in two-reelers. "The Girl in

the Limousine," is of a different type to the regular Larry Semon comedy, but all who enjoy Larry usually will be delighted with this longer and better comedy while it is also making hosts of new friends for him. He is supported by Claire Adams, Charlie Murray, Lucille Ward, Larry Steers, and Oliver Harding. The New York newspapers describe "The Girl in the Limousine," as a melodramatic farce comedy that makes ideal entertainment and provides real, genuine comedy and humor.

A woman's tears are the most powerful water power known to man.

Watches Clocks and Jewelry.

Why send them to Toronto, when you can get them repaired in Timmins, at **F. W. WHITFORD'S** 28 Second Avenue, near Rink. Whose work has long given satisfaction in the North Land and is backed by a thorough Old Country Practical Experience. Every repair carries a twelve months' guarantee. Note address and come and enquire Our Charges.

THIS TO BE THE GREATEST YEAR YET FOR THE MINES

So Says Hon. Mr. McCrea in Interesting Address at Toronto Last Week.

The untiring activity of Hon. Chas. McCrea in keeping the mining industry to the front is a matter of much interest and pleasure in the North Land. A despatch last week from Toronto tells of another of Hon. Mr. McCrea's able and informative addresses. This despatch dated Jan. 23rd, says:—

"When the Hon. Charles McCrea, Minister of Mines, addressed the Toronto branch of the Canadian Institute of Mining and Metallurgy, at the Engineers Club, Tuesday night, at the banquet given in his honor, he prefaced his remarks by saying that he had been warned to avoid the questions of high explosives and the O.T.A. As he was talking to men who were experts on mining, those present knew when he said that the possibilities of Northern Ontario had hardly been scratched, he was not merely boasting, but stating a fact not yet fully realized in Canada.

"The outlook for mining at the beginning of 1925 couldn't be more optimistic," said the Minister, and his audience, who knew conditions in the North better than any other body of men in the world, showed by their applause that they agreed. "All signs warrant the statement," said Mr. McCrea, "the production of gold, silver and nickel should be stepped up by five or ten million dollars without any difficulty this year. The nickel industry is beginning again to feel the throb of bigger operation." "Silver production," he said, "has been given new hopes from the developments in Gowganda, Cobalt and South Lorrain. Everything points to an increased gold production in Dome, Hollinger, McIntyre and the big Kirkland Lake mines. There is no indication of any of these mines reaching the end of their ore reserves. Capital, too, is going in freely for gold and silver development."

Mr. McCrea paid a tribute to Canadian engineers, who, he said, are playing and will play a great part. He stressed the point that Canadian engineers are more qualified to handle the work in Ontario than the more competent from other fields. "I will always advise outside capitalists who wish to interest themselves in Northern Ontario mining, to consult Canadian engineers," he said, and added that he would like also to say a word for the prospectors who suffered a good deal of hardship and showed the great spirit that is aboard in the North.

He then made two interesting announcements. "A world's gold conference is being planned in Johannesburg, South Africa, in 1925, and Ontario has been invited to send a representative. "This," he said, "we shall do. The Department feels that at this time when a period of deep mining is approaching in Northern Ontario, it will be of inestimable benefit to have data available here as to the experience of the South African deep mining operations on the Rand." He suggested that the Canadian Institute of Mining and Metallurgy should also arrange to send a representative to Johannesburg.

Mr. McCrea's second announcement was that Mr. Willet G. Miller Ontario's Provincial Geologist, has been elected the president this year of the British Geological Institute in London and he is going overseas shortly to receive his inauguration to office. This is a high honor for an English association to pay to Canada and to Ontario.

In concluding the Minister of Mines spoke of the fact that the Canadian business men at large were showing a keener interest in Northern Ontario as indicated by the remarks of Sir John Aird of the Bank of Commerce and W. G. Gooderman of the Bank of Toronto, recently. "I hope," said Mr. McCrea, "that the day is not far off when our Canadian banks will have an experienced staff of experts, to investigate and recommend the loaning of money for legitimate mining enterprise. When this comes, as I believe it will, the first bank to do it will be adding another milestone to the mining history in Canada."

Mr. McCrea was followed by Mr. Victor Ross, vice-president of the Imperial Oil Company, who stated that in his opinion the administration of Canada's mining resources was one of the most important for the consideration of Canadian statesmen. "Business men, I believe," said Mr. Ross, "are beginning to see that the economic salvation of Canada lies in her mineralized rocks."

WHOLE FAMILY WIPED OUT BY BROWER TWP. FIRE.

Last week reference was made in these columns to the disastrous fire at the home of Mr. N. Bedour, Brower Township. The mother and five children were burned to death in the fire that destroyed the home. Only the father escaped with his life. He wandered in bare feet and partially clothed and in a half-dazed condition to a neighbor's house about a mile away. He was taken to the hospital

at Cochrane. He died at the hospital from the burns and exposure he had endured. This means that the fire wiped out the whole family of seven,—the father, mother and five young children. So far as the tragedy can be reconstructed, it would appear that on account of the severe cold the beds had been drawn close to the stove. Possibly some of the bed clothing came in contact with the red hot stove. In any event the beds caught fire, and the resulting smoke and flames, and the fact that there were no means at hand to fight the fire doomed the building and its occupants from the start. Mr. Bedour was able to get out of the burning house himself, but the burns received in attempting to rescue his family, and his dazed condition due to his injuries, gave him practically no chance to save himself in the severe cold that obtained at the time.

Recently there has been considerable staking of claims in McCann and Playfair Townships, the prospectors going in from Matheson chiefly.

WHERE DO YOU EAT?

QUEENS HOTEL
If you eat away from home and you demand good food, properly cooked and courteously served, you must eventually become a patron of our Dining Room.
Courtesy, Service and Satisfaction are the three things that have built our business.
Business Folks Lunch every day from 12 to 2—50c.
Special Sunday evening Dinner, serving local Chicken and Turkey.—50c.
