President. Secretary.

OPENING LEAGUE MATCH PROVED GOOD FOOTBALL

First Match in the P.D.F.L. Resulted in 2-2 Draw.

Brief reference was made last week to the opening match in the Porepine District Football League series, on April 27th. As noted the match resulted in a draw, 2 to 2. The contestants were the Hollinger team, last year's league winners, and the Town A team. Perhaps, further reference to this match, the first of football proper for the season, may be of interest.

The Hollinger trotted out on the field with their old team almost intact as last year. Berg was missing, being out of town. One new introduction was J. Landers. This was his first match in senior company. Previously he was with the Juniors, known as the Town "B" team last year. His skills in football is worthy of senior company. The team has made some changes in the positions, Larmer taking his place between the posts. The backs are the same and play the same. There was one change in the halves, Short replacing C. Warne. The forwards made two changes, Dedrickson going to inside left. He was goalkeeper last year. The other change was Landers outside right.

The Town "A" also had a reshuffle; A. Cadman in goal; Street going to full back; the other place at back was filled by Jock Nicholson who no doubt is the only player in football to-day who started football in the Porepine camp, his career going back to 1912 to 1914 when he played for "Golden City" (Porepine), when there were three teams, Porepine, South Porepine and Dome Mines, and his play in this match was like good old days. There was a change in the halves, in Rankin filling left position. The old warhorse, Fergy, was at centre half, with Cooper partnering him. The forwards were much the same.

The first half opened with much kicking the ball about the field, but settled down to attacks. The Town made an attack and scored what looked like an offside goal. This started real first-class football. The Hollinger took the offensive and equalized in a few minutes. The next ten minutes was fine football in midfield, and some nice passing of the ball was witnessed. The Holly made a bold attack and gave Cadman a grounder to stop. It looked like a sure goal, but he slid along the ground and saved it with the tip of his fingers and came in for applause from the spectators. The Holly kept up the pressure and penned the Town in their own territory until Fergy shot the ball clear, the forwards taking it down. Haly made an attempt to head a dangerous pass and the Town was awarded a penalty for the attempt. Street took the spot kick and scored. The Holly went right down from the kick-off. Street intercepted and mis-kicked the ball. Cadman went to save; the ball struck the post and bounded to the other side for Satrang to kick it in. The score being 2-2 end of the first half.

The Town started the attack after the change-over and gave the Holly backs plenty to do, but they were equal to do it. The Town had a fine chance to score when the ball was passed in front of the goal mouth, but the punch was missing and so was the ball, for Landers was well away down touch and his pass was accurate. Street intercepted it, but the Holly still pressed with Landers, Satrang and Petterson all having a shot on goal but were unsuccessful. Dunbar made a fine run and centered, but Petterson was watched too closely for any tricky work and was not given a chance to shoot. Roberts went away on the right and passed to Adamson, and after a fine play got the ball to Lambie who missed a sure goal. The ball came back to the Town's end, and it was now past twilight and impossible to play football, but it kept on until you could just see bits of white flitting about and neither team able to follow the ball at the whistle, the match ending a draw. This match went the full 90 minutes while last year's league matches were only 70. This was the cause of darkness before time.

INCOME FROM GOLD MINES HIGHEST IN THEIR HISTORY.

Preliminary estimates for the first quarter of 1925 show the income from the gold mines of Northern Ontario to be the highest of any quarter in their history. The income of the mining companies in the Porepine district is estimated at between \$5,800,000 and \$6,000,000, while the income in the Kirkland Lake district was approximately \$1,300,000.

The annual Tennis Club Dance is to be held on Friday evening of this week, May 8th, in the Masonic Hall.

TO STABILIZE MINING INDUSTRY IS GOVT. AIM

Hon. Chas. McCrea Makes Inspiring Address to Canadian Club at Kitchener.

"The object of the government is to stabilize the mining industry so that capital will be willing to invest, recognizing the fact that it is being fairly treated so far as the government and the laws of the Province are concerned. Millions are to be made for Canadians if Canadians realize what a growth will result from the development of the mining industry, have courage and are willing to play an increasing part in the development of the latter will be to industry generally throughout the Province and Canada," Hon. Charles McCrea, Minister of Mines of the Provincial government, said to the members of the Waterloo County Canadian Club at Kitchener last week.

"There is no market like the home market. Sixty per cent. of the agricultural products of Canada are, I understand, consumed in this country. The vision I see is a larger population in this vast stretch of territory so rich in mineral wealth, Northern Ontario. What will it mean to Canadians, and, therefore, to Kitchener, if there are more people in this territory who will spend money derived from the mining industry? The prosperity of older Ontario, and therefore Kitchener, will be greatly affected by the development of that territory. But Canadians must play the game and be willing to go up there and face hard work. They must be ready to take chances which are ten to one as compared to the opportunities that the pioneers of Old Ontario had," he said.

Mr. McCrea whose subject was the "Mining Industry of New Ontario," gave interesting figures on the growth of that industry. He stated that in 1924 the total mineral production was \$75,000,000, and referring to the loan of \$40,000,000 raised by the Government last year, he said it had been well expended, for calculating

HON. MR. LYONS SPEAKS ON FORESTRY OVER THE RADIO

Hon. James Lyons, Provincial Minister of Lands and Forests, was the principal speaker over the Canadian National Railways station at Toronto when the National System placed its radio facilities at the disposal of the National Campaign of "Save the Forests Week." Mr. Lyons gave a comprehensive outline of just what the forests of wood products industries meant to Canada from an economic view point and made an eloquent plea to tourists and vacationists to do everything humanly possible to prevent forest fires.

the annual production as only that of 1924 by the end of 25 years the total mineral wealth taken out of the mines would be over \$2,000,000,000.

The Minister, after outlining the development of the various lines of mining, stated that, whereas the total gold production in the first three months of 1924 was \$5,735,000, the value of that of the first three months this year was \$6,900,000. Based on the figures of last year and the increase to date, the total production for this year would be \$28,000,000, exclusive of the production of new mines. The minister also stated that the Department would give special study next year to deep mining and would send a representative to South Africa for that purpose.

The Minister stated that it was an encouraging fact that investors of Great Britain, who had been behind in taking advantage of the possibilities of this great mineral country, and had allowed Canadians and Americans to take precedence in the capital invested were now realizing the possibilities, were investing their capital in the mining industry. "Looking into 1925, I must say, that I was never so optimistic as regards the mining industry of Ontario," he said.

On Thursday (to-morrow) evening the Altar Girls' Society of St. Anthony's church are giving a Card Party in the Parish Hall. Good prizes. Special musical programme.

Cleans Like China

When you use SMP Enamelled Ware Utensils, you never need to scrape, scour and scrub the way some wares demand. Hot water, soap, a cloth—that's all you need to clean them. It washes like china, has the cleanliness and surface of china, but wears like steel. Don't be the slave of your cooking ware; equip with clean, pure sanitary, lasting

Some People Have Funny Ideas

What do you think Carnation Milk is like? Do you think it is "thick as molasses in January"? *It isn't.* Do you think it is syrupy sweet? *It isn't.* Do you think it has a funny taste? *It hasn't.* Do you think something is "put in" to make it keep? *There isn't.* Do you think some of the food value is taken out? *It isn't.*

Pure Milk in a modern package—that's all

Carnation Milk is just pure milk with part of the natural water content taken out by evaporation. All the food value of full-cream milk is left in. No artificial sweetening or other preservative is added. Each can is hermetically sealed and sterilized to keep its contents pure, sweet, and utterly safe. Carnation Milk is a great aid to better baking because of its convenience, safety and richness. Always ready for use on your pantry shelf—none is wasted because it keeps sweet for several days when opened. Sold by grocers everywhere—order several tall (16 oz.) cans or by the case of 48 cans.

The Coupon Below Sent Today will bring you free Mary Blake's Carnation Recipe Book, beautifully illustrated, its 32 pages packed with over 100 tested recipes. Mrs. Blake has made a long study of home-made cooking and her suggestions are timely and useful. Send the coupon today. Meanwhile, try these recipes:

CARNATION BREAD
1 1/4 cups water, 3/4 cup Carnation Milk, 2 teaspoons salt, 2 tablespoons shortening, 7 cups flour, 1 cake compressed yeast, 2 teaspoons sugar. Soak yeast in a small amount of lukewarm water. Measure the salt, sugar and shortening into a mixing bowl. Add the scalded milk and water. When lukewarm add the yeast and mix thoroughly. Then add the flour gradually. When stiff enough to handle, turn the dough on a floured board and knead until smooth and elastic. Put into a bowl, cover and let rise in a warm place about one and one-half hours or until double its bulk, then make into loaves and put in baking pans. Cover, and again let stand in a warm place about one hour or until it has doubled its bulk, then bake about forty-five minutes. This makes two loaves of bread.

SUNSHINE CAKE
5 egg yolks, 1 cup sugar, 7 egg whites, 3/4 teaspoon salt, 3/4 cup flour, 3/4 teaspoon cream of tartar, 1 teaspoon orange or lemon extract. Beat the yolks of eggs thoroughly. Sift flour twice, sift sugar once. Beat whites until foamy, add cream of tartar and beat until stiff. Fold sugar in lightly, add beaten yolks, then add flavoring and cut and fold in flour. Bake about fifty minutes in a moderately hot oven. This serves twelve to fifteen people.

This coupon entitles you to one copy of Mary Blake's Cook Book which contains over 100 carefully tested recipes. Cut out this coupon and mail to Carnation Milk Products Company, Ltd., Aylmer, Ont.
