

FACTS ABOUT TEA SERIES—No. 6

Appearance of Tea No Guide

The only way to test tea is to taste it. Many people have the idea that a finely rolled and tippy tea is superior in flavour to a large rough leaf. In reality this is not of necessity the case. The altitude at which the tea plant grows determines the amount of essential oil and alkaloid theine in the leaf. The essential oil gives tea its flavour; the theine contributes the stimulating value. The only way to insure always receiving a uniform quality is to insist upon a skilfully blended and scientifically sealed tea like "SALADA" whose reliability, goodness and delicious flavour have become a household word.

"SALADA"

SPECIAL EVENT AT THE A. S. D. CLUB TONIGHT

It Will be Gentlemen's Night Next Week Will be Ladies' Night

Men's Night at the A.S.D. Club this evening promises to be something special in every way, and all the members of the Club attending this evening are assured of the best of good times. The programme for the evening is in the hands of the gentlemen members of the Club, and those who remember the excellent evening provided last season on Men's Night can expect a repetition of that evening tonight.

The regular dance held last Wednesday evening was one of the most enjoyable of the regular dances held this season. There was a good attendance of the members present, the music was good and everything tended to a good time. Two Paul Jones were held during the evening, these enjoying their usual popularity. A broom dance, and a ladies' tag were also among the popular dances. Miss Rhoda Macleod looked after the serving of the refreshments in her usual capable way.

After lunch, C. G. Pirie, vice-president of the Club, announced the receipt of lists from a Toronto firm, who specialize in masquerade costumes, and asked the members to get in touch with members of the executive during the next few days, so that preliminary orders may be sent. It was also announced that a list was available for any who wished to invite friends to the Masquerade Ball, to place the name and address, so that an invitation will be sent. The executive wish to have the list completed by this evening if possible.

The meeting next Wednesday evening will be in charge of the ladies. Ladies' Night has always been one of the popular nights of the Club, and it is expected that the event next week will be up to the standard set by the young ladies at previous events of this nature. On May 20th, the Club will hold another Visitor's Night. Each member can invite some friend or friends to the Club that evening, who are not eligible for membership in the Club. The last Wednesday in May, will be a regular night. The season will close on May 29th with a Masquerade in the Masonic Hall.

SWASTIKA NOW IN THE LIMELIGHT ONCE MORE

Remarkable Discovery Reported A Quarter of a Mile From Swastika.

It is some time, indeed, since mining news about Swastika has been given special prominence. Swastika has been rather sidetracked (though on the main line) by its neighbour, Kirkland Lake. It is odd that just after Kirkland had secured its own railway and so had overcome the communication handicap with the more favourably situated Swastika, that Swastika should take the centre of the stage and for the moment eclipse in interest the more prominent Kirkland. Such is the case for the minute. The following despatch last week tell the story in detail:—

What is likely to prove the extension southwest of the Kirkland Lake area ore bodies and one of the breaks, is a remarkable discovery by H. Dix Rogers and J. S. Leete, who have been working on a vein four miles from Tyrell's mine and a quarter of a mile north of Swastika for the last few weeks. The vein occurs between walls of red feldspar porphyry, at the surface, showing only one foot wide with values from unpicked grades of six dollars, while now at ten feet down in the shaft that has commenced by handsteeling the vein has consolidated itself to four feet wide, heavily mineralized, the wall at the north being mineralized also. This gague consists of quartz and feldspar, porphyry carrying iron and copper pyrites and some molybdenite.

It is some years since any development has taken place in Swastika until Mr. Jowsey began preparing for work on the Kirkland Gateway last year, but this is regarded as of prime importance because it is the first time that any prospecting has been done in the porphyry. Mr. Rogers figures that the porphyries in this area, if developed, will no doubt reveal ore bodies similar to those on the Kirkland Lake main break, the formation and geological conditions being identical.

"The break we are working on," he says, "is running northeast and southwest and I hope to find an extension of some of the ore bodies running in that direction. Very little development has been done here."

Logically it is thought the prospects of this property are equally good as were those of Kirkland Lake in a similar stage of development in the early days. The property belongs to the Pittsburg Corporation, of which Mr. David S. Hayes is president and Mr. Rogers, himself, a director. Two years ago a thirty-foot shaft was sunk elsewhere on a feldspar porphyry outcrop alongside the sediments.

SEVEN-YEAR-OLD YOUNGSTER DROWNED IN BOSTON CREEK.

A sad accident occurred last week at Boston Creek when Francis Joseph Welcome, a seven-year-old lad, who was playing on the bridge over the river, fell into the water and was carried down stream and drowned. His mother, who was gathering driftwood nearby, was unable to do anything to save her child. Provincial Officer H. Finger, of Timmins, and J. Kenny of South Porcupine, went down last week and after much search were able to locate the body and recover it. The body had caught in some brush some 300 feet away from the place where the little lad had tumbled into the water. The police reported the details of the case to the coroner and an inquest was not deemed necessary.

A meeting to organize a Women's Missionary Society Auxiliary will be held in the Presbyterian church on Thursday evening of next week, May 14th, at 8 p.m. A member of the Temiskaming Presbytery will be present and will give an address on the work of the W.M.S.

GO! to the Canadian Pacific Rockies This Summer

See glorious Banff, charming Lake Louise, Field, Yoho Valley and Glacier. Stop at luxurious Canadian Pacific hotels, or splendidly constructed rustic Bungalow Camps. Through daily train connections from North Bay.
