**WHO IS THAT MAN BEHIND YOUR PRESCRIPTION**  
 In point of Law every druggist is equal but it is practice that makes perfect. Experience in pharmacy, as in all lines of endeavour, professional or otherwise, marks that vital difference between the worker experimenting, and the worker who really KNOWS. Bring all your prescriptions to us for that observance of scientific ability and care, prompted by knowledge and supported by our experience.

**The Safest Way to be Safe**  
 You never can tell when injury will overtake you or the children.  
 Even the slightest pin-prick may cause infection.  
 Always have on hand a good antiseptic, plenty of powder, plasters and Johnson & Johnson's Red Cross Absorbent Cotton. This is very important.

**Every Lens is its Own Prescription.**  
 Many people are under the impression that when they break a lens they must produce a written prescription to have it duplicated, or else send to a far-away city where their original prescription is kept on file. The importance of having broken lenses accurately duplicated cannot be over-estimated, but it is only necessary to bring us the broken pieces; we can replace your lens in a few hours.
